

GRANDSTREAM
CONNECTING THE WORLD

Enterprise Layer 2+ Managed Network Switch

GWN7801(P) - GWN7802(P) - GWN7803(P)

The GWN7800 series are Layer 2+ managed network switches that allow small-to-medium enterprises to build scalable, secure, high performance, and smart business networks that are fully manageable. It supports advanced VLAN for flexible and sophisticated traffic segmentation, advanced QoS for prioritization of network traffic, IGMP Snooping for network performance optimization, and comprehensive security capabilities against potential attacks. The PoE models provide smart dynamic PoE output to power IP phones, IP cameras, Wi-Fi access points and other PoE endpoints. The GWN7800 series can be managed in a number of ways, including the local web user interface of the GWN7800 series switch. The series is also supported by GDMS Networking and GWN Manager, Grandstream's cloud and on-premise Wi-Fi management platform, and GWN Series Router. The enterprise-grade GWN7800 series are the ideal managed network switches for small-to-medium businesses.

8/16/24 Gigabit Ethernet ports and 2/4 Gigabit SFP ports

Smart power control to support dynamic PoE/PoE+ power allocation per port for the PoE models

Supports deployment in IPv6 and IPv4 networks

ARP Inspection, IP Source Guard, DoS protection, port security & DHCP snooping

Embedded controller to manage switch; GDMS Networking and GWN Manager, Grandstream's cloud and on-premise Wi-Fi management platform, and GWN Series Router

Built-in QoS allows for prioritization of network traffic

Compliance	FCC, CE, RCM, IC, UKCA					

Features & Benefits

Powerful Business Processing Capabilities

- Unicast routing via ACL for data routing between network segments.
- DHCP Server and Relay to assign IP address to hosts in the network.
- GVRP(pending) for dynamic VLAN distribution, registration and attribute propagation, reduces manual configuration and ensure configuration.
- Built-in QoS, including Port Priority, Priority Mapping, Queue Scheduling, Traffic Shaping and Rate Limit.
- ACL to realize the filtering of data packets by configuring matching rules, processing operations and time schedule, and provide flexible security access control policies.
- IGMP Snooping and MLD Snooping to meet the needs of multi-terminal HD video surveillance and video conference.
- IPv6 to meet the needs of the network transition from IPv4 to IPv6.

Multiple Security Prevention Mechanism

- Static MAC table, dynamic MAC table to allow data transmission, and filter MAC table to avoid network attacks.
- Packet filtering based on binding of IP address, MAC address, VLAN and port.
- ARP Inspection to protect against ARP spoofing and ARP flooding attacks such as gateway spoofing and man-in-the-middle attacks that are common in LANs.
- IP/IPv6 Source Guard to prevent illegal address spoofing including IP(v6)/MAC/VLAN spoofing and IP(v6)/VLAN spoofing.
- DoS Protection, including Land Attack, Smurf Attack, TCP SYN Attack, Ping Flooding and more.
- 802.1X, MAC, RADIUS, AAA, TACACS+ authentications to provide authentication function for LAN devices.
- Port security. When the number of MAC addresses learned by a port reaches the maximum number, it will be set to error-down status automatically or stop learning to prevent MAC address attack and control the network traffic of the port.
- DHCP/DHCPv6 Snooping. Only allow DHCP/DHCPv6 packets from trusted ports to keep the enterprise DHCP/DHCPv6 environment safe.

Diverse Reliability Protection

- Support fault detection and alarm for power supply and fan, and automatically adjust the fan speed based on temperature changes to better adapt to the environment.
- Multiple reliability protection at device level, such as overcurrent protection, overvoltage protection, overheat technology and surge protection.
- STP/RSTP/MSTP to guarantee fast convergence, improve fault tolerance, ensure network stability and link load balance, and provide redundant link utilization.
- Compatible with PVST(+)/RPVST(+) for faster convergence. Optimizing network performance through VLAN-based network load balance.
- ERPS(pending), loopback detection to identify and remove loops on the network
- Loopback detection to keep the port in normal use.
- Link aggregation to increase bandwidth, improve reliability and load balancing.
- Storm control to prevent traffic impact.

PoE Power Supply Capability (Only GWN780XP series support)

- PoE power supply and comply with the IEEE 802.3af/at standards to meet the PoE power supply requirements of security monitoring, audio and video conferencing, wireless signal coverage and more scenarios.
- Support setting user-defined time period to control the power supply of PoE port on Web GUI.
- Setting priority of PoE port on Web GUI. When remaining power is insufficient, it will power the device of high-priority port.
- The maximum output power is 30w per port. Users can set the maximum power that can provide via Web GUI.
- Dynamic power negotiation via LLDP-MED.

Easy Management and Maintenance

- Managed by Web GUI, CLI(Console, Telnet) and SNMP(v1/v2c/v3).
- Monitoring CPU and memory, Ping, Traceroute, UDLD(TBD) and Copper Test to analysis failed network node easily.
- RMON, Syslog, traffic statistics and sFlow(pending) to optimize network.
- LLDP and LLDP-MED for convenient query and communication status judgement.
- Managed by GDMS Networking and GWN Manager, and also support managed by GWN router

Power & Green Energy Efficiency

- All Ethernet ports support EEE(Energy Efficient Ethernet), fast transitions between normal operation and low power states with low traffic and low power consumption
- Intelligent control of fan speed based on environmental temperature. Precise temperature control, energy saving and noise reduction.

IPv4/IPv6 Dual Protocol Stack

- IPv4 routing protocol, including IPv4 static routing to satisfy different networking needs.
- IPv6 routing protocols, including IPv6 static routing to satisfy different networking needs.
- Not only deployed in pure IPv4 or IPv6 networks, but also deployed both in IPv4 and IPv6 networks, to fully meet the networking needs.
