

# Grandstream Networks, Inc.

DP75x Series

**DP750/DP720 – User Guide**

# DP750/DP720 - User Guide

## WELCOME

Thank you for purchasing Grandstream DP750 DECT IP Base Station and DP720 DECT Handset.

The DP750 is a powerful DECT VoIP base station that pairs with up to 5 of Grandstream’s DP720 DECT handsets to offer mobility to business and residential users. It supports a range of 300 meters outdoors and 50 meters indoors to give users the freedom to move around their work or home space, delivering efficient flexibility. This DECT VoIP base station supports up to 10 SIP accounts and 5 concurrent calls while also offering 3-way voice conferencing, full HD audio and integrated PoE. A shared SIP account on all handsets will add seamless unified features that gives users the ability to answer all calls regardless of location in real-time. The DP750 supports a variety of auto-provisioning methods and TLS/SRTP/ HTTPS encryption security. When paired with Grandstream’s DP720, the DP750 offers a powerful DECT VoIP base station that allows any business or residential user to create a cordless VoIP solution.

The DP720 is a DECT cordless VoIP phone that allows users to mobilize their VoIP network throughout any business, warehouse, retail store and residential environment. It is supported by Grandstream’s DP750 DECT VoIP base station and delivers a combination of mobility and top-notch telephony performance. Up to five DP720 handsets are supported on each DP750 while each DP720 supports a range of up to 300 meters outdoors and 50 meters indoors from the base station. The DP720 touts a suite of top-notch telephony features including support for up to 10 SIP accounts and two concurrent calls per handset, full HD audio, a 3.5mm headset jack, multi-language support, a speakerphone and more. When paired with Grandstream’s DP750 DECT Base Station, the DP720 offers a powerful DECT VoIP handset that allows any business or residential user to create a cordless VoIP solution.

## PRODUCT OVERVIEW

### Feature Highlights

The following tables contain the major features of the DP750 / DP720:

DP750	
	<ul style="list-style-type: none"><li>○ 5 handsets.</li><li>○ 10 accounts.</li><li>○ 10 lines.</li><li>○ 5 concurrent calls.</li><li>○ PoE power support.</li><li>○ 300m range outdoor / 50m range indoor.</li></ul>

Table 1: DP750 Features at a Glance

<p><b>DP720</b></p> 	<ul style="list-style-type: none"> <li>○ DECT cordless HD.</li> <li>○ 1.8 inch (128×160) TFT color LCD.</li> <li>○ 250 hours standby / 20 hours talk time.</li> <li>○ 15 languages embedded.</li> <li>○ 10 accounts.</li> <li>○ 2 concurrent calls</li> <li>○ 5 ring modes.</li> </ul>

Table 2: DP720 Features at a Glance

## DP750 Technical Specifications

The following table resumes all the technical specifications including the protocols / standards supported, voice codecs, telephony features, languages and upgrade/provisioning settings for the Base station DP750.

<b>Air Interface</b>	<p><b>Telephony standards:</b> DECT</p> <p><b>Frequency bands:</b></p> <ul style="list-style-type: none"> <li>○ 1880 – 1900 MHz (Europe), 1920 – 1930 MHz (US)</li> <li>○ 1910 – 1920 MHz (Brazil), 1786 – 1792 MHz (Korea)</li> <li>○ 1893 – 1906 MHz (Japan), 1880 – 1895 MHz (Taiwan)</li> </ul> <p><b>Number of channels:</b> 10 (Europe), 5 (US, Brazil or Japan), 3 (Korea), 8 (Taiwan)</p> <p><b>Range:</b> up to 300 meters outdoor and 50 meters indoor</p>
<b>Peripherals</b>	<p>5 LED indicators: Power, Network, Register, Call, DECT</p> <p>Reset button, Pairing/Paging button</p> <p>One 10/100 Mbps auto-sensing Ethernet port with integrated PoE</p>
<b>Protocols/Standards</b>	SIP RFC3261, TCP/IP/UDP, RTP/RTCP, HTTP/HTTPS, ARP/RARP, ICMP, DNS (A record, SRV, NAPTR), DHCP, PPPoE, SSH, TFTP, NTP, STUN, SIMPLE, LLDP-MED, LDAP, TR-069, 802.1x, TLS, SRTP, IPv6 (pending)
<b>Voice Codecs</b>	G.711μ/a-law, G.723.1, G.729A/B, G.726-32, iLBC, G.722, OPUS, G.722.2/AMR-WB (special order), in-band and out-of-band DTMF (in audio, RFC2833, SIP INFO), VAD, CNG, PLC, AJB
<b>Telephony Features</b>	Hold, transfer, forward, 3-way conference, downloadable phonebook (XML, LDAP, up to 3000 entries), call waiting, call log (up to 300 records), auto answer, flexible dial plan, music on hold, server redundancy and fail-over
<b>Sample Applications</b>	Currency (pending)
<b>QoS</b>	Layer 2 QoS (802.1Q, 802.1p) and Layer 3 QoS (ToS, DiffServ, MPLS)

<b>Security</b>	User and administrator level access control, MD5 and MD5-sess based authentication, 256-bit AES encrypted configuration file, TLS, SRTP, HTTPS, 802.1x media access control, DECT authentication & encryption
<b>Multi-language</b>	English, Czech, German, Spanish, French, Arabic, Hebrew, Italian, Russian, Netherlands, Japanese, Polish, Chinese Simple, Chinese Tradition, Korean, Portuguese, Slovakian, Serbian, Swedish and Turkish.
<b>Upgrade/ Provisioning</b>	Firmware upgrade via FTP/HTTP/HTTPS, mass provisioning using TR-069 or AES encrypted XML configuration file
<b>Multiple SIP Accounts</b>	Up to ten (10) distinct SIP accounts per system  <b>Each handset</b> may map to any SIP account(s)  <b>Each SIP account</b> may map to any handset(s)
<b>Ring Group</b>	Flexible options when multiple handsets share the same SIP account <ul style="list-style-type: none"> <li>○ <b>Circular Mode:</b> all phones ring sequentially, starting with the phone after the one which rang last.</li> <li>○ <b>Linear Mode:</b> all phones ring sequentially in the predetermined order, starting with the first phone each time.</li> <li>○ <b>Parallel Mode:</b> all phones ring concurrently; after one phone answers, the remaining available phones can make new calls</li> </ul>
<b>Power &amp; Green Energy Efficiency</b>	Universal Power Supply Input AC 100-240V 50/60Hz; Output 5VDC, 1A; Micro-USB connection; PoE: IEEE802.3af Class 1, 0.44W–3.84W
<b>Package Content</b>	Base unit, Universal Power Supply, Ethernet cable, Quick Installation Guide, GPL Statement
<b>Dimensions</b>	28.5 mm (H) x 130 mm (W) x 90 mm (D)
<b>Weight</b>	Base unit: 143g, Universal Power Supply: 50g; Package: 360g
<b>Temperature and Humidity</b>	Operation: -10° to 55°C (14 to 131°F); Storage: -20° to 60°C (-4 to 140°F);  Humidity: 10% to 90% non-condensing
<b>Compliance</b>	FCC: Part 15D, 47 CFR 2.1093, Part 15B  CE: EN60950; EN301489-1-6; EN301406  RCM: AS/NZS60950  ANATEL: #2288-16-9452

Table 3: DP750 Technical Specifications

## DP720 Technical Specifications

The following table resumes all the technical specifications including the protocols / standards supported, voice codecs, telephony features, languages and upgrade/provisioning settings for the DP720 handset.

<b>Air Interface</b>	<p><b>Telephony standards:</b> DECT</p> <p><b>Frequency bands:</b></p> <ul style="list-style-type: none"> <li>○ 1880 – 1900 MHz (Europe), 1920 – 1930 MHz (US)</li> <li>○ 1910 – 1920 MHz (Brazil), 1786 – 1792 MHz (Korea)</li> <li>○ 1893 – 1906 MHz (Japan), 1880 – 1895 MHz (Taiwan)</li> </ul> <p><b>Number of channels:</b> 10 (Europe), 5 (US, Brazil or Japan), 3 (Korea), 8 (Taiwan)</p> <p><b>Range:</b> up to 300 meters outdoor and 50 meters indoor</p>
<b>Peripherals</b>	<p>1.8 inch (128×160) color TFT LCD</p> <p>23 keys including 2 softkeys, 5 navigation / menu keys, 4 dedicated function keys for SEND, POWER/END, SPEAKERPHONE, MUTE</p> <p>3-color MWI LED</p> <p>3.5mm headset jack</p> <p>Removable belt clip</p> <p>Micro-USB port for alternative charging and non-battery operation</p>
<b>Protocols/Standards</b>	Hearing Aid Compatibility (HAC) compliant
<b>Voice Codecs</b>	G.722 codec for HD audio and G.726 codec for narrow band audio (G.711μ/a-law, G.723.1, G.729A/B, iLBC and OPUS are supported via companion DECT base station DP750), AEC, AGC, Ambient noise reduction
<b>Telephony Features</b>	Hold, transfer, forward, 3-way conference, call park, call pickup, downloadable phonebook, call waiting, call log, auto answer, click-to-dial, flexible dial plan, music on hold
<b>Sample Applications</b>	Currency (pending)
<b>HD Audio</b>	Yes, in both Handset and Speakerphone modes
<b>Security</b>	DECT authentication & encryption
<b>Multi-language</b>	English, Czech, German, Spanish, French, Hebrew, Italian, Netherlands, Japanese, Chinese, Chinese simple, Polish, Russian, Chinese Simple, Chinese Tradition, Korean, Portuguese, Slovakian, Serbian, Swedish, Turkish and Arabic.
<b>Upgrade/Provisioning</b>	Software Upgrade Over-The-Air (SUOTA), handset provisioning Over-The-Air
<b>Multiple Line Access</b>	Each handset may access up to 10 lines
<b>Power &amp; Green Energy Efficiency</b>	Universal Power Supply Input AC 100-240V 50/60Hz; Output 5VDC 1A; Micro-USB connection; Rechargeable 800mAh Ni-MH Low Self-Discharge (LSD) AAA batteries (250 hours of standby time and 20 hours of talk time)
<b>Package Content</b>	Handset unit, universal power supply, charger cradle, belt clip, 2 batteries, Quick Installation Guide

<b>Dimensions (H x W x D)</b>	Handset: 155 x 50 x 26 mm, charger cradle: 35 x 63.5 x 54 mm
<b>Weight</b>	Handset: 138g, charger cradle: 71g, universal power supply: 50g; Package: 360g
<b>Temperature and Humidity</b>	Operation: -10° to 50°C (14 to 122°F); Charging: 0 to 45°C (32 to 113°F); Storage: -20° to 60°C (-4 to 140°F); Humidity: 10% to 90% non-condensing
<b>Compliance</b>	FCC: Part 15D; 47 CFR 2.1093 & IEEE1528-2013, Part68, Part 15B  CE: EN60950; EN301489-1-6; EN301406; EN50360; EN62209-1  RCM: AS/NZS60950; AS/ACIF S004  ANATEL: #2288-16-9452

Table 4: DP720 Technical Specifications

## GETTING STARTED

This chapter provides basic installation instructions including the list of the packaging contents and also information for obtaining the best performance with the DP720 IP DECT phone and its base station DP750.

### Equipment Packaging

DP720	DP750
<ul style="list-style-type: none"> <li>○ 1 Handset unit</li> <li>○ 1 Universal power supply 5V</li> <li>○ 1 Charger cradle</li> <li>○ 1 Belt clip</li> <li>○ 2 Rechargeable batteries</li> <li>○ 1 Quick Installation Guide</li> </ul>	<ul style="list-style-type: none"> <li>○ 1 Base unit</li> <li>○ 1 Universal power supply 5V</li> <li>○ 1 Ethernet cable</li> <li>○ 1 Quick Installation Guide</li> <li>○ 1 GPL Statement</li> </ul>

Table 5: Equipment Packaging

Figure 1: DP750 Package Content

Figure 2: DP720 Package Content

### Important Note

Check the package before installation. If you find anything missing, contact your system administrator.

## Connecting DP750

Figure 3: DP750 Back View

You have two options for power and network connection of the base station: AC power or Power over Ethernet (PoE)

### Note

For better signal range, we recommend to install DP750 horizontally with LED side facing toward the usage area. For example, if you just put it on a desk, the LED better face up, if you mount it on the ceiling, it better LED face down, in both cases, it toward the space area.

## Connecting via AC power

1. Connect the micro-USB connector into the related port on the base station and connect the other end of the power adapter into an electrical power outlet.
2. Connect the supplied Ethernet cable between the Internet port on the base station and the Internet port in your network or the switch/hub device port.

Figure 4: Connecting the Base station

## Connecting via PoE

To connect the base station using PoE, you need to connect the Ethernet cable provided (or 3rd party network cable) between the Network Socket on the base station to Ethernet port of your PoE switch/hub.

## Setting up DP720 handset

Please follow below steps to insert batteries into the handset:

1. Open the battery compartment cover.
2. Insert the batteries in the correct polarity.
3. Close the battery compartment cover.

### Note

Please charge the batteries fully before using the handset for the first time

Figure 5: Setting up the DP720

## Battery Information

- **Technology:** Nickel Metal Hydride (Ni-MH)
- **Size:** AAA
- **Voltage:** 1.2V
- **Capacity:** 800mAh
- **Charging time:** 12 hours from empty to full
- **Standby time:** up to 250 hours

- **Talk time:** up to 20 hours' active talk time

In order to get the best performance of your DP720 handset, we recommend using original batteries provided in the package or batteries compliant with above specifications.

**Disclaimer**

The abovementioned battery specifications can vary and depend on many factors (age of the battery, number of recharge cycles, real capacity...). The recharge cycles of the battery are limited; thus, it might need to be replaced if the battery performance is low. The number of charge cycles and battery life are affected by usage and configuration.

**Note**

Be careful when inserting the batteries into your handset to avoid any risk of short-circuit, which lead to damage your batteries and/or the handset itself. Do not use damaged batteries which can increase the risk of serious harm.

**Setting up the Charge Station**

Please refer to the following steps for setting up the charge station and charging the handset:

1. Connect the DC plug on the power adapter to the micro-USB connector on the charge station.
2. Connect the other end of the power adapter into an electrical power outlet.
3. After setting up the handset and the charge station, place the handset in the charge station.

Figure 6: Setting up the charge station

**DP750 LED Patterns**

The DP750 has 5 LED lights on it. Please see on the following table the meaning of each light.

Table 6: DP750 Led Patterns

LED	Status
	Indicates power ON/OFF
	Indicates access to the Network. Remains ON while there is Access to the Network
	Indicates if a SIP account is registered

LED	Status
	Indicates status of the lines.  <b>Blinking:</b> A line is in use. <b>Solid ON:</b> All lines are free.
	The radio icon for pairing the DP720 and DP750, if we keep pressing the radio button it starts blinking indicating pairing attempt.

## DP720 Handset Description

The LCD screen and the keypad are the main hardware components of the DP720.

Figure 7: Handset Keys Description

Key	Description
1. <b>Power and Charging Indication Light</b>	<b>Red:</b> Charging. <b>Green:</b> Charge completed.  <b>Blinking:</b> Missed call(s) or Voice Mail received.
2. <b>Earphone</b>	Delivers audio output.
3, 5 <b>Left and right softkeys</b>	Correspond to functions displayed on the LCD. These functions change depending on the current context.
4. <b>LCD display</b>	Shows call information, handset status icons, prompt messages, etc.
6. <b>4 Arrow key combination</b>	Permits navigation of the cursor through the displayed menu options.
7. <b>OK/Selection key</b>	Selects the option chosen by the cursor. (Enters the main menu from the home screen.)

	Key	Description
8.	<b>Off-hook / Dial key</b>	Enters dialing mode, or dials number entered.
9.	<b>On-hook / Power key</b>	Terminates calls, or turns the handset on / off.
10.	<b>Alphanumeric Keypad</b>	Provides the digits, letters, and special characters in context-sensitive applications. For + sign, press and hold key 0.
11.	<b>Hands-free / Speaker key</b>	Switches between handset and hands-free / speaker modes.
12.	<b>Mute key</b>	Activates or deactivates the mute feature.
13.	<b>Microphone</b>	Picks up audio earpiece and hands-free calls.

Table 7: Handset Keys Description

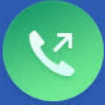

## DP720 Icons Description

The following table contains description of each icon that might be displayed on the screen of your DP720.

	<b>Battery status</b> Not equipped with battery
	<b>Battery status</b> Battery empty
	<b>Battery status</b> Battery low
	<b>Battery status</b> Battery normal
	<b>Battery status</b> Battery full
	<b>Battery status</b> Charging
	<b>Signal status</b> Not subscribed
	<b>Signal status</b> Not in range

	<p><b>Signal status</b></p> <p>Signal very low</p>

## DP720 Handset Menu

The handset has an easy-to-use menu structure. Every menu opens a list of options. To open the main menu, press "Menu" (left softkey) when the handset is on and in standby mode. Press Arrow keys to navigate to the menu option you require. Then press "Select" (left softkey) or **OK/Selection key** to access further options or confirm the setting displayed. To go to the previous menu item, press "Back" (right softkey). You can press **Power** key at any time to cancel and return to standby mode. If you do not press any key, the handset automatically reverts to standby mode after 20 seconds.

Figure 8: DP720 Menu Structure

<b>Cont acts</b>	Display the contacts created on the handset DP720 and/or the ones imported via XML or LDAP on DP750.
<b>Call Histo ry</b>	<p>Display the call history:</p> <ol style="list-style-type: none"> <li>1. <b>Missed Calls.</b></li> <li>2. <b>Accepted Calls.</b></li> <li>3. <b>Outgoing Calls.</b></li> <li>4. <b>All Calls.</b></li> </ol> <p>Note: You can add contacts to <b>Shared Contacts</b> directly from call logs.</p>
<b>Regis trati on</b>	<ul style="list-style-type: none"> <li>○ <b>Register</b></li> </ul> <p>Register your handset to base station.</p> <ul style="list-style-type: none"> <li>○ <b>Deregister</b></li> </ul> <p>Deregister your handset from base station.</p> <ul style="list-style-type: none"> <li>○ <b>Select Base</b></li> <li>○ Select base station.</li> </ul>

## Settings

### 1. Handset Name

Change the Handset name.

### 1. Phone Language

Select the language to be displayed on the phone's LCD. (Default is English.)

### 1. Date/Time

Configure date and time on the Handsets.

### 1. Audio

Specify ringtones for internal/external calls, the volume, advisory tones (Keypad, Confirmation, Low battery notifications).

### 1. Display

Configure backlight, LCD timeout (Idle/Call), LCD brightness, Message Waiting Prompt and menu key timeout.

### 1. Network Settings

Configure IP addresses and select DHCP/Static IP mode.

### 1. SIP Settings

Configure/View SIP accounts settings.

### 1. System Settings

Change Base PIN code, perform factory reset, reboot base and configure repeater mode.

### 1. Firmware Upgrade

Upgrade the firmware version of the Handsets.

### 1. Factory Functions

#### o Keypad Diagnostic

All LEDs will light up, and the LCD will display a table listing the names of all keys in red. Press any key to diagnose; the key's name will display in blue. After all keys are diagnosed, a prompt message ("PASS") will display; press "Back" (right softkey) to exit.

**Note:** User can long press arrow UP key to exit at any time.

#### o Audio Loopback

Speak to the phone using speaker/Handsets/headset. If you can hear your voice, your audio is working fine. Press "Exit" softkey to exit audio loopback mode.

#### o LCD ON / OFF

Select this option to turn off LCD. Press any button to turn on LCD.

#### o LCD Diagnostic

Select this option to enter LCD Diagnostic mode. Press "Next" (left softkey) to display white screen. Continue pressing the left softkey to view all remaining screens (black, blue, red, and green) and then exit. End the test early by pressing the right softkey.

#### o LED Diagnostic

Enters this option and press "1" to start LED Diagnostic (you will notice that the color of the LED will be changing). Press "2" to quit.

- *System Monitoring*

Displays RSSI, battery voltage and charging current and RPN information.

## BASIC OPERATIONS

### Turning the Handset ON / OFF

#### To turn ON the handset

- Long press on **Power key**  until the LCD screen lights up.

#### To turn OFF the handset

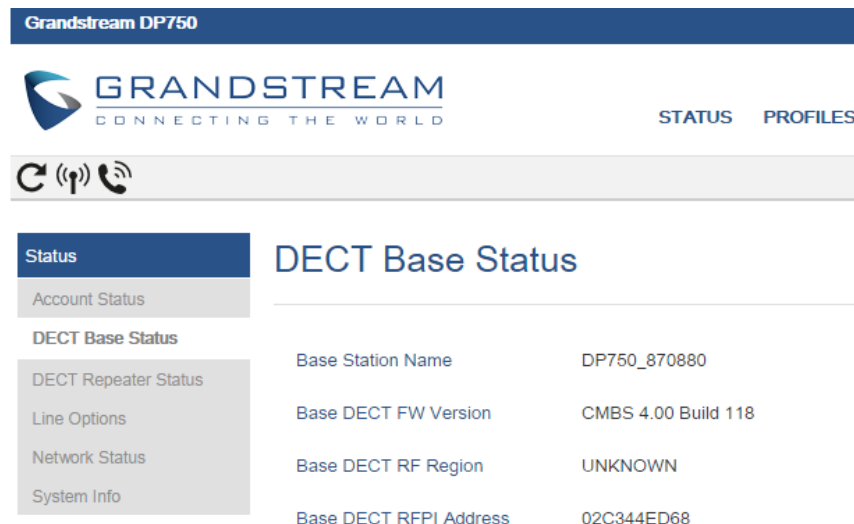

- Long press on **Power key**  again when the handset is idle until the display turns off.

### Setup Wizard

Setup wizard shows at first access to DP720 or factory reset allowing users to configure handset language and date/time. Users can quit at any time by pressing "**Skip**" (left softkey).

### Register DP720 Handset to DP750 Base Station

1. On DP750 Base station, press and hold the Radio/Page button for 7 seconds until the Radio icon starts blinking to start Subscription process. Or Access web UI, and press **Subscribe** icon  to **Open Subscription**.

The screenshot shows the Grandstream DP750 web interface. At the top, there is a blue header with the text "Grandstream DP750". Below the header is the Grandstream logo and the tagline "CONNECTING THE WORLD". To the right of the logo are the links "STATUS" and "PROFILES". Below the logo is a navigation bar with icons for Home, Subscribe, and Radio. The main content area is titled "DECT Base Status" and contains a table of information.

Status	DECT Base Status

Base DECT RFPI Address	02C344ED68

Figure 9: DECT Status – Subscribe

2. On DP720, press **Subscribe** softkey if available on the main screen or access **Menu** → **Registration** → **Register** while the DP750 Radio icon is blinking.

**Note:** "Subscribe" softkey appears only if DP720 is not registered to any DP750 base station.

3. Select **BaseX** (X=1-4) corresponding to the desired base station DP750, then press **Subscribe**.
4. The DP720 will search for nearby base stations and will display the RFPI code and base station name of the discovered DP750.
5. Press **Subscribe** to pair with the displayed DP750.

6. The DP720 will display **Easy Pairing** on the LCD and play an audible buzz when successful. Then it will return to the home screen, displaying the handset name and number assigned by the registered base station.

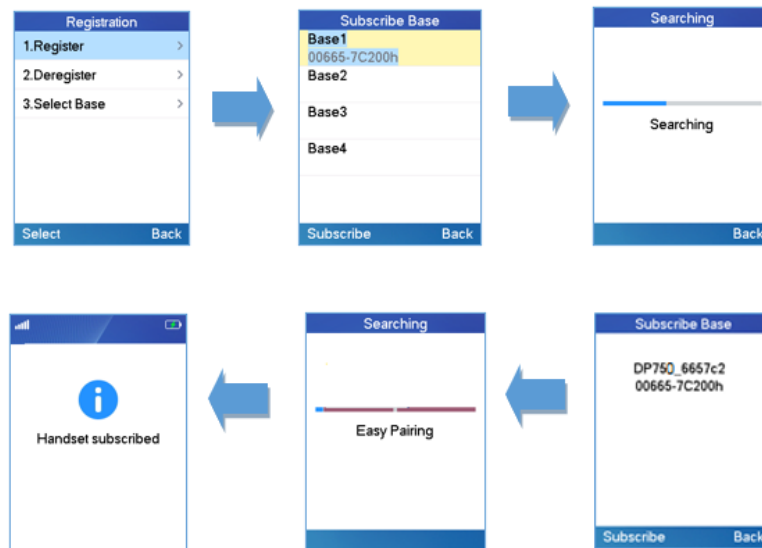

Figure 10: Registration process

## Using DP720 with Multiple DP750 Base Stations

DP720 is able to be registered to up four different DP750 base stations.

### Registering DP720 to an additional DP750 base station

Considering DP720 is previously registered to an initial base station, please follow below steps to register a handset to an additional base station:

1. Press **Menu** (left softkey or the selection key) to bring up operation menu.
2. Use arrow keys to reach **Registration** and select **Register**.
3. Navigate to an unsubscribed base using arrow keys, and click on **Subscribe**.
4. Make sure that the subscription is opened on the new base station.

Figure 11: Multiple Base Stations Registration

### Switching Between Different Base Stations

1. Press "Menu" (left softkey or the selection key) to bring up operation menu.
2. Use arrow keys to reach **Registration**.
3. Navigate to **Select Base** using arrow keys.
4. Select the desired base station and press **Select**.

Figure 12: Switching Between Base Stations

## Unregister the DP720

### o Using DP720 Handset:

1. On DP720, press "Menu" (left softkey  or the selection key ) to bring up operation menu.
2. Press arrow keys to move the cursor to **Registration**, then press "Select" (left softkey).
3. Navigate to **Deregister**.
4. Select the Handsets to be unregistered and press "Deregister" (left softkey).
5. Enter the system PIN code (default: 0000).
6. Press "Done" (left softkey) to confirm or "Back" (right softkey) to cancel.

### o Using DP750 Base Station UI:

1. Access DP750 Web Interface.
2. Go to **Status** → **DECT Base Status**.
3. Locate the handset to unregister and press "**Unsubscribe**" button.

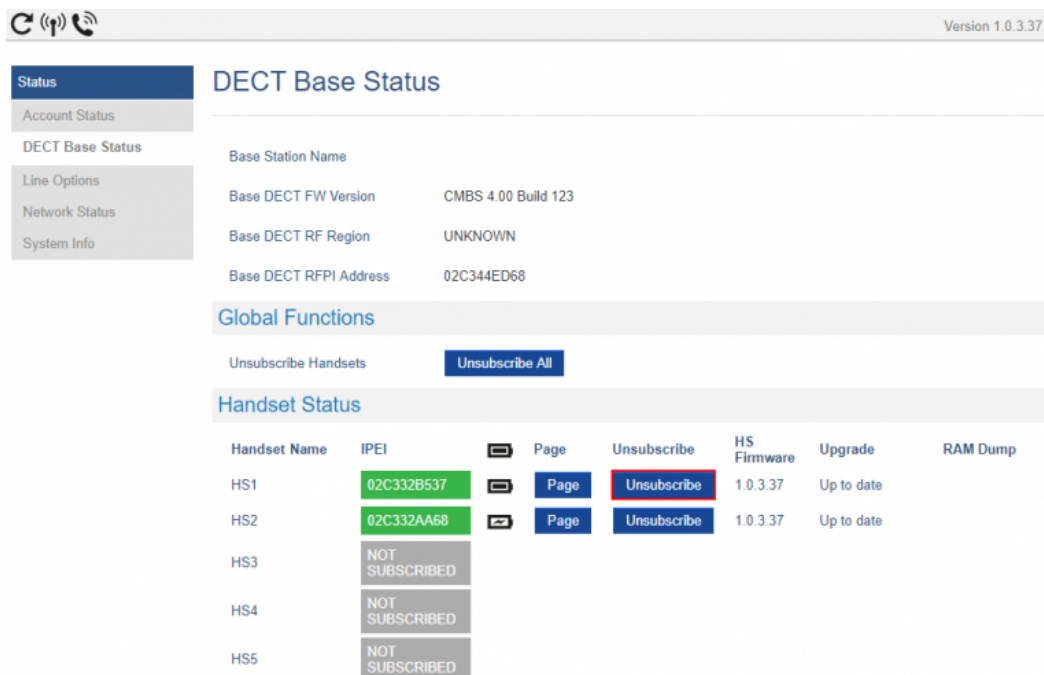

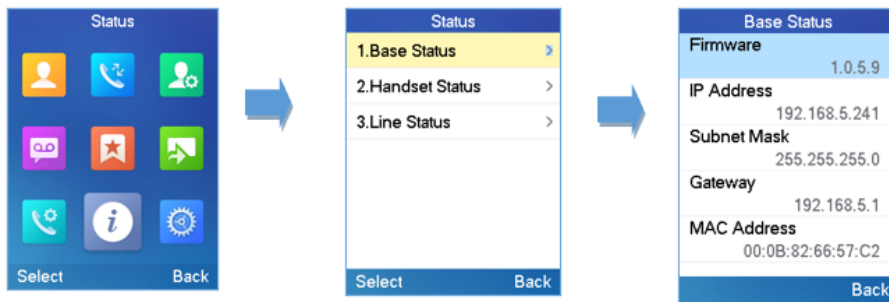

Figure 13: Unregister DP720 from DP750 web UI

## Obtain DP750 Base Station IP Address via paired DP720

DP750 is by default configured to obtain IP address from DHCP server where the unit is located. In order to know which IP address is assigned to your DP750, please follow below steps using a paired DP720 handset with your DP750 base station. Please see [Register DP720 Handset to DP750 Base Station](#) .

1. Press "Menu" (left softkey)  or **OK** button  on DP720 to view operation menu.
2. Press Arrow (Up, Down, Left, Right) keys to move the cursor to **Status** icon , then press "Select" (left softkey)  or **OK** button , then select **Base Status**.
3. Using Arrow keys, navigate down to view the IP address of the DP750.

## Key Lock

You can lock the keypad against unintentional entries. It is, however, still possible to pick up incoming calls even with the keypad locked.

### o To enable the Keypad Lock

1. Press the **Pound key "#"**  and hold for approximately 2 seconds.
2. The display shows Keypad Locked briefly and the key lock icon  appears in the display.

### o To disable the Keypad Lock

5. Press and hold **Pound key "#"**  to unlock the keys.
6. Keypad Unlocked appears briefly in the display and a windows prompt will be displayed to confirm that the keypad is unlocked.

## Locating a DP720 Handset from DP750 Base station

In some situations, you may have a DP720 handset incorrectly positioned and you don't know its current location. You can locate a DP720 handset from his registered DP750 base station using below steps:

### Locate via DP750 Web UI

1. Access the Web GUI of your DP750 using the admin's username and password. (Starting HW version 1.7A the default admin username is 'admin' while the admin password is the random password that can be found on the sticker at the back of the unit. For lower hardware versions; the default username and password are: admin/admin).
2. Press **Login** to access your settings and navigate to **Status → DECT Base Status** tab.
3. Choose which handset to locate and press its corresponding **Page** button.

**Note:** If you press **Page All** icon , all registered DP720 handsets will be receiving paging call.

1. A paging call will be received on the selected DP720 handset.
2. Once located, you can press any key on the handset or press **Page** or **Page All** to end paging call.

Figure 14: Locate Handset via Web UI

## Locate via DP750 Base station

1. On DP750 Base station back side, press **Radio/Page** button

2. All registered handsets will receive Paging call.

3. Once located, you can end the paging calling by pressing any key on the handsets or by pressing again **Radio/Page** button.

## Checking System Status

You can view the system status on your handset including the following information of the system:

Item	Description
<b>Model (RF)</b>	Displays the product model, hardware version and DECT region of DP720. i.e.: <b>DP720 1.4A (EU)</b>
<b>Firmware</b>	Current firmware version installed on DP720.
<b>IP Address</b>	IP address of the base station DP750 if registered.
<b>Subnet Mask</b>	Subnet Mask of the base station DP750 if registered.
<b>Gateway</b>	Gateway IP of the base station DP750 if registered.
<b>MAC address</b>	MAC address of the base station DP750 if registered.

<b>IPEI</b>	International Portable Equipment Identifier.  Unique "serial number" for DECT handsets.
-------------	---

Table 9: DP720 Info description

o **To check the handset status**

1. Press **Menu** (left softkey  or the selection key ) to bring up operation menu.
2. Use arrow keys to reach **Status** menu , then select Handset Status.

## Basic Network Settings

Once connected to the network, DP750 base station will attempt to contact a DHCP server to obtain valid network settings (e.g., IP address, subnet mask, gateway address and DNS address) by default.

The users could also configure basic network settings manually from a registered DP720 Handset. In order to configure the network settings manually, please follow the steps below:

1. Press **Menu** to bring up operation menu.
2. Use arrow keys to reach **Settings**  and access **Network Settings** menu.
3. Enter the system PIN code (default: 0000) and press the softkey "**Done**".
4. To change to static IP, press **Left** or **Right** to select **Static** from the **IP Settings** field.
5. Enter valid values in the **IP Address**, **Subnet Mask**, **Gateway**, **DNS Server** fields.
6. Press softkey "**Save**" to save and apply the new changes.  
**Note:** A prompt message will be displayed to confirm that the new settings are saved successfully
7. The DP70 will display a reboot confirmation message, select "**Yes**" to apply the new settings or "**No**" to avoid rebooting the DP750.

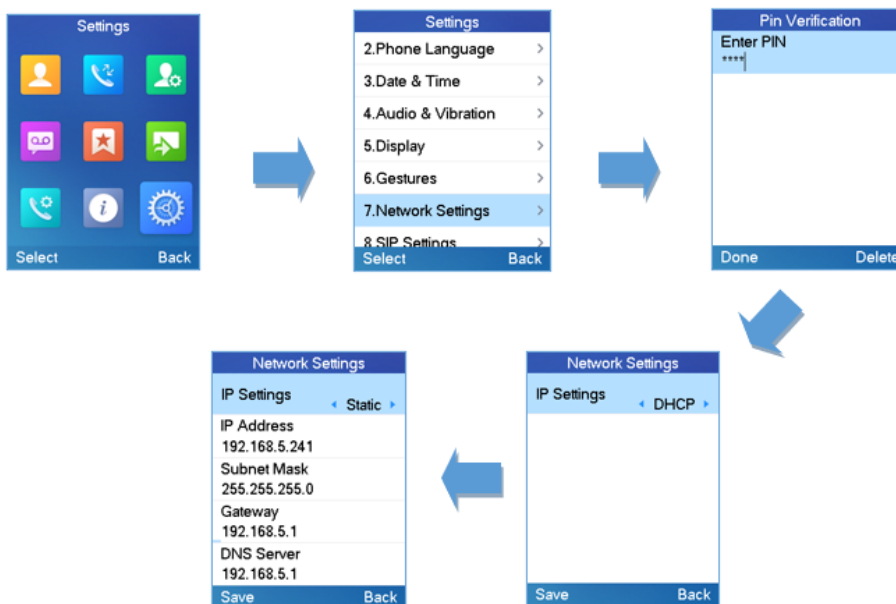

Figure 15: Network Settings configuration

## Change Menu and LCD Timeout

1. Press **Menu** to bring up operation menu.
2. Use arrow keys to reach **Settings** .

3. Navigate to **Display**, and then press "Select" (left softkey).
4. Set desired time in seconds for Backlight timeout and for Menu timeout. Available value: 15 seconds, 30 seconds, 60 seconds or disabled. (Default is 30 seconds)
5. Press **Save** (left softkey) to save and apply the new settings.

## Return to Idle Screen

Press the **Power Key**  to quickly exit the menu and return back to the main idle screen.

If you do not press any key in a period of time, the LCD screen will automatically exit the menu and return to the idle screen as well.

When you are navigating on the handset's menu, and you receive an incoming call, the LCD screen will automatically exit the menu and you can either accept or reject the call. When the call is terminated, the LCD screen will return back to the idle screen.

## Register a SIP Account

DP750 supports up to 10 SIP accounts, 5 handsets. Each handset can be configured up to 10 accounts. Please be aware that line settings will be affected by DID settings (hunting group settings) in "DECT → SIP Account Settings". For more details about "Hunting Group", please refer to "[Administration Guide](#)".

## Register Account via Web User Interface

1. Access your DP750 base station web UI by entering its IP address in your favorite browser.
2. Enter your admin's username and password (Starting HW version 1.7A the default admin username is 'admin' while the admin password is the random password that can be found on the sticker at the back of the unit. For lower hardware versions; the default username and password are: admin/admin).
3. Press **Login** to access your settings.
4. Go to **Profiles** tab and select a profile to use.  
**Note:** DP750 supports up to 4 profiles. A profile is a set of settings including general settings, network settings, SIP setting, audio setting, call settings and ring tones, etc.  
A profile can be used with different SIP accounts.
5. In **General Settings**, set the following:
  - **Profile Active** to **Yes**.
  - **SIP Server** field with your SIP server IP address or FQDN.
  - **Failover SIP Server** with your failover SIP server IP address or FQDN. Leave empty if not available.
  - **Prefer Primary SIP Server** to **No** or **Yes** depending on your configuration. Set to **No** if no failover SIP server is defined. If "**Yes**", account will register to primary SIP server when failover registration expires.
  - **Outbound Proxy** with your outbound proxy IP address or FQDN. Leave empty if not available.
  - **Voice Mail Access Number** Allows users to access voice messages. This value is usually the VM portal access number. For example: configuring the access code to "\*97,,password" will automatically dial the Voice Mail box and enter the password.
6. Press **Save and Apply** to save your configuration.
7. Go to **DECT → SIP Account Settings**

Figure 16: SIP Settings

8. Configure your SIP details in desired account:

- o **Account:** Select Account row to configure (Account 1 – Account 10).
- o **SIP User ID:** User account information, provided by VoIP service provider (ITSP). Usually in the form of digit similar to phone number or actually a phone number.
- o **Authenticate ID:** SIP service subscriber’s authenticate ID used for authentication. Can be identical to or different from SIP User ID.
- o **Password:** SIP service subscriber’s account password to register to SIP server of ITSP. For security reasons, the password will field will be shown as empty.
- o **Name:** Any name to identify this specific user.
- o **Profile:** Select the corresponding Profile ID (1/2/3/4).
- o **HS Mode:** Assign the account to specific handset (HS1, HS2...) or hunting group mode.
- o **Active:** Set to **Yes**. If set to **No**, account is disabled and will not register.

9. Press **Save and Apply** to save your configuration.

Account	SIP User ID	Authenticate ID	Password	Name	Profile	HS Mode	Active
Account 1	1400	1400	*****	1400	Profile 1	HS 1	<input type="radio"/> No <input checked="" type="radio"/> Yes
Account 2	1401	1401	*****	1401	Profile 1	Circular	<input type="radio"/> No <input checked="" type="radio"/> Yes

Account 6					Profile 1	Circular	<input type="radio"/> No <input checked="" type="radio"/> Yes
Account 7					Profile 1	Circular	<input type="radio"/> No <input checked="" type="radio"/> Yes
Account 8					Profile 1	Circular	<input type="radio"/> No <input checked="" type="radio"/> Yes
Account 9					Profile 1	Circular	<input type="radio"/> No <input checked="" type="radio"/> Yes
Account 10					Profile 1	Circular	<input type="radio"/> No <input checked="" type="radio"/> Yes

Figure 17: SIP Accounts Settings

After applying your configuration, your phone will register to your SIP Server.

You can verify if your DECT phone has registered with your SIP server from your DP750 web interface under Status → Account Status (a green background with Yes under SIP Registration column for corresponding account indicates the account has been successfully registered).

Status		Account Status

Figure 18: Account Status

## PHONE SETTINGS

This chapter will help you with the instruction for configuring and changing the settings of your DP720,

### Editing the Handset's name

The procedure to change the handset's name is as follows:

- o **Using DP720 Handset:**
- o Press **Menu** to bring up operation menu.
- o Use arrow keys to reach **Settings** .
- o Navigate to select **Handsets Name**, and then press "Select".
- o Enter the desired name and press "Rename" and then the DP720 will display a confirmation message that the rename operation was successful.

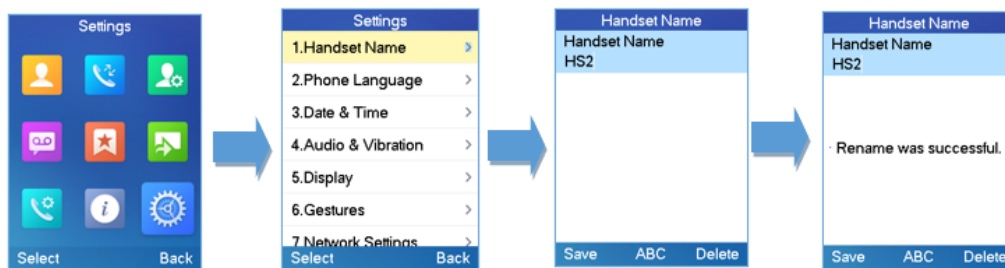

Figure 19: Handset Name editing

- o **Using DP750 Base Station UI:**

1. Access DP750 Web Interface.
2. Go to **DECT → General Settings**.
3. In "Handset Settings" section, change **Handset Name** to desired name.

Handset Settings			
Handset	Handset Name	Handset Phonebook	Offhook Auto-dial
HS1	HS1	PB1 ▼	<input type="text"/>
HS2	HS2	PB2 ▼	<input type="text"/>
HS3	HS3	PB3 ▼	<input type="text"/>
HS4	HS4	PB4 ▼	<input type="text"/>
HS5	HS5	PB5 ▼	<input type="text"/>

Figure 20: Edit Handset Name from DP750

## Changing the Base PIN Code

Users can change their code PIN by following the steps below:

- o **Using DP720 Handset:**

1. Press **Menu** to bring up operation menu.

2. Use arrow keys to reach **Settings**

3. Navigate to select **System Settings**, and then press "Select".

4. Enter the current code PIN (By Default is 0000), a new window will be displayed inviting you to enter the new password, when done press "**Save**" (left softkey) and a prompt message will be displayed to confirm that the new code PIN has been saved successfully.

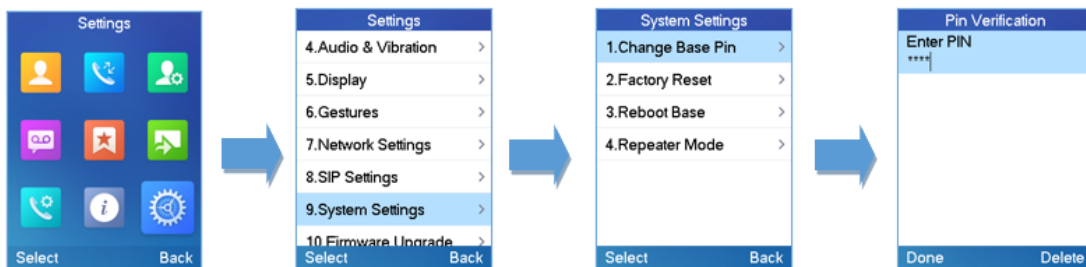

Figure 21: Changing Admin Base PIN Code from DP720

- o **Using DP750 Base Station UI:**

1. Access DP750 Web interface.

2. Go to **DECT → General Settings**.

3. Set new PIN code in **Admin PIN Code** field.

Note: Only digits accepted. Minimum allowed length is 4 digits.

Figure 22: Changing Admin Base PIN Code from DP750

## Selecting Phone Language

The DP720 supports displaying texts in different languages. The handset supports 20 languages (see the table of the technical specifications). The default language of the handsets is English. You can change the language according to your requirement. To change the language of the handsets, please proceed as follows:

1. Press **Menu** (left softkey or the selection key) to bring up operation menu.
2. Use arrow keys to reach **Settings**  .
3. Navigate to select **Phone language**, then select the desired language and press "Select" (Left softkey). The LCD screen prompts "Change phone language to xxx (xxx is the language you selected)"
4. Press "Yes" (left softkey) to accept the change. Text displayed on the handsets will change to the selected language.

Figure 23: Handset Language

## Activate/Deactivate Hands-Free Mode

This function allows you to make a call without having to hold the handsets in your hand.

1. Press the **Hands-free key**  while you are making a call or on the idle screen to activate hands free mode.
2. Press the **Hands-free key**  again to deactivate the hands-free function.

## Muting the Microphone

Press the **Mute key**  to switch off the microphone during an established call. You can now talk freely without the other party hearing you and the icon of mute  will be displayed on the screen. Press the **Mute key**  again to switch the microphone back on.

## Adjusting Speaker and Earpiece Volume

Press left key  or right key  while you are on an established call to set the volume of the earphone / speaker. You can choose between 5 different levels. The default level is 3:

## Ringtones

### Setting the Ringer Volume on the Handset

You can adjust the ringer volume for an incoming call to one of 6 levels (level 1 to 5 and off). Level 5 is the highest level. (The DP720 Handset is set to level 3 by default).

In order to configure the desired ringer volume, proceed as follows:

1. Press **Menu** to bring up operation menu.

2. Use arrow keys to reach **Settings** .

3. Navigate to select **Audio** → **Volume**.

4. Press the left and right arrow keys to change repeatedly and set the desired volume.

5. Press "Save" to confirm the volume, and a message prompt will be displayed to confirm that the new volume has been successfully saved.

 If you select **OFF**, the icon appears in the display and the handset will not ring for incoming calls.

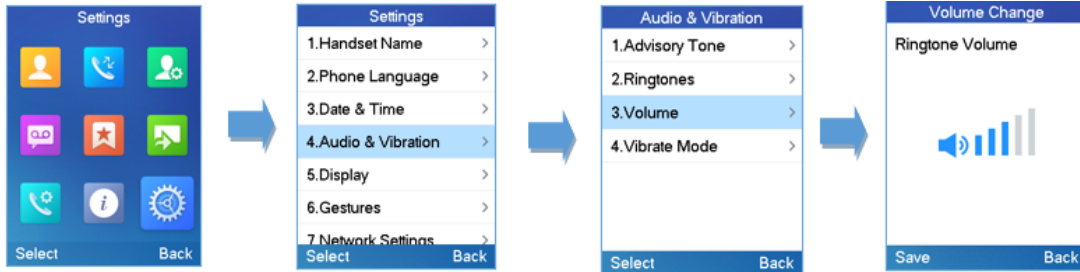

Figure 24: Ringer Volume

## Setting the Ringer Melody on the Handset

You can change the ringer melody for an incoming call. The device has 8 different ringer melodies for you to choose from (1-8). The default setting for the ring tone for a call is melody 1.

In order to configure the desired melody, proceed as follows:

1. Press **Menu** (left softkey or the selection key) to bring up operation menu.

2. Use arrow keys to reach **Settings** .

3. Navigate to select **Audio** → **Ringtones**.

4. Press "Select" (left softkey) to confirm the ringtones selected and a message prompt will be displayed to confirm that the new ringtones has been set successfully.

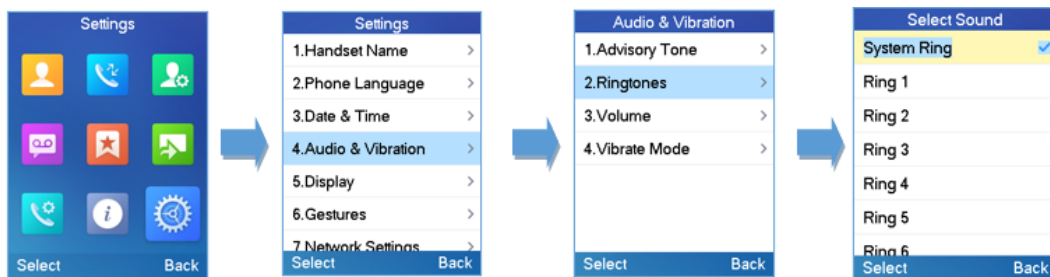

Figure 25: Calls Ringtones

## Advisory Tones

Advisory tones are acoustic signals, which inform you of different actions and states on your handset. The following advisory tones can be configured independently of each other:

- **Keypad tone:** it's played when a user presses any key of the keypad (even during calls).
- **Confirmation:** it's played when a user saves settings or places the handset in the charger cradle.
- **Low battery:** it's played if the capacity of the batteries is low or the handset requires charging.

### To configure the advisory tones

1. Press **Menu** (left softkey or the selection key) to bring up operation menu.

2. Use arrow keys to reach **Settings** .

3. Navigate to select **Audio** → **Advisory tones** and choose which tone you want to change it.

4. Press the left and right arrow keys to either enable or disable the desired tones.

5. Press "Save" (left softkey) to confirm, and a message prompt will be displayed to confirm that the new settings has been successfully saved.

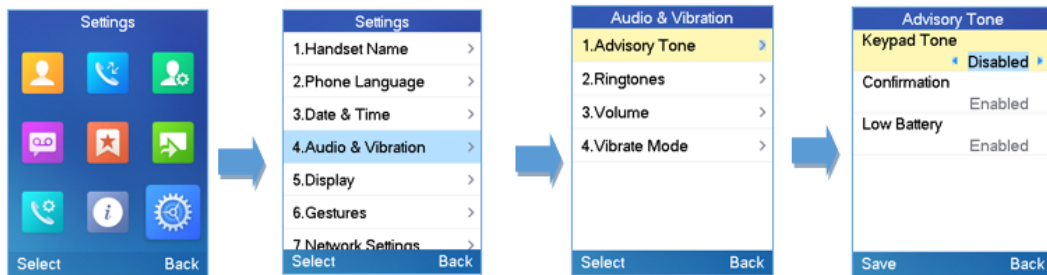

Figure 26: Advisory Tone

## Ringtones Customization

DP750/720 allow users to use custom ringtones. Custom ringtones will be stored on DP750 base station and only selected custom ringtone will be downloaded to specific DP720 handset.

DP750 base station supports up to 10 custom ringtones.

Custom ringtone should be generated using GS Ringtone Tool and named **ring[1-10].bin** (example: ring1.bin , ring6.bin).

To use custom ringtones, follow below steps:

### Step 1: Generate Custom Ringtone(s)

1. Download "Ringtone Generator" tool available at <http://www.grandstream.com/support/tools>
2. Run the tool and select your ringtone file to convert.

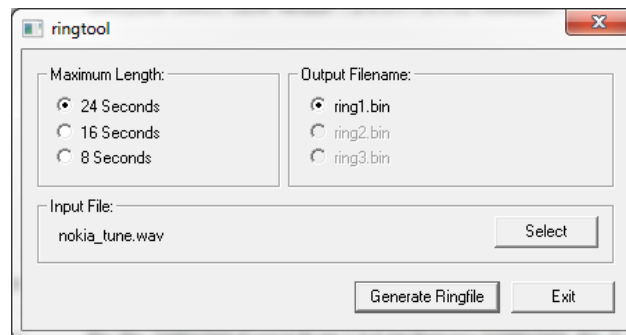

Figure 27: Generating Custom Ringtone (Windows)

### Note

Currently only 16-bit linear PCM audio is supported for .wav files. The sampling rate should be automatically detected and the audio will automatically be down sampled to 8kHz. Stereo channels are also detected and mixed to produce mono output. .pcm files should be pre-formatted to 16-bit 8kHz mono format.

3. Press "Generate Ringfile" to finish the process. Ringtone with filename "ring1.bin" will be created at same location as ringtone tool.

### Step 2: Download Custom Ringtone(s) to DP750 Base Station

1. Make generated ringtone files available in your FTP, HTTP or HTTPS server.
2. Access DP750 Web GUI and go **Maintenance** → **Firmware Upgrade** page.
3. Set "**Upgrade Via**" to FTP, HTTP or HTTPS (depending on server type hosting ringtone files).

4. Set "**Firmware Server Path**" to IP address or the FQDN of the server.
5. Set "**Firmware Upgrade and Provisioning**" to "Always Check for New Firmware".
6. Update the change by clicking the "**Save and Apply**" button. Then "**Reboot**" or power cycle the base station to download the ringtone(s).

### Step 3: Assigning a Custom Ringtone for a DP720 Handset

1. Access DP750 Web GUI and go **DECT** → **HS Settings** → **HS# Settings** page.
2. In **Custom Ringtone**, select a custom ringtone from the dropdown list.

#### Note

If the list is not showing downloaded custom ringtone(s), press  and check again.

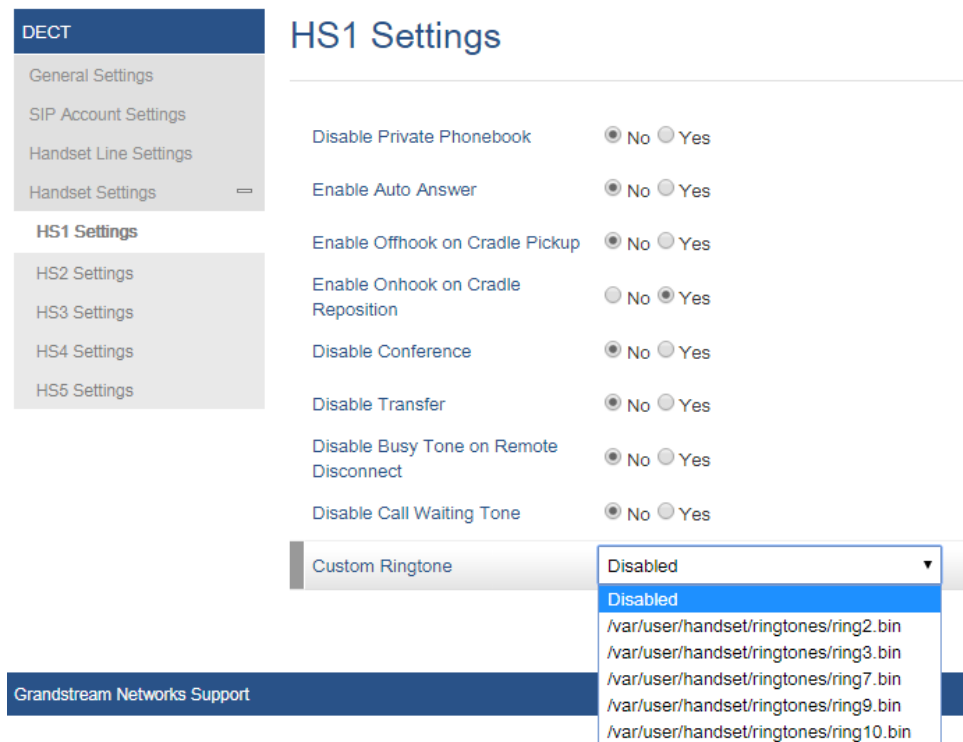

Figure 29: Custom Ringtone on DP750

3. Press "Save and Apply". DP720 handset will download the ringtone locally before using it. (DP720 LCD screen will display download progress at this stage).

4. On DP720 Handset menu, access Settings → Audio → Ringtones. Select **Custom Ringtone** using up/down arrow keys and press "Select" softkey.

**Note**

DP720 handset can use one custom ringtone only.

## Date and Time

On the DP720 the Date and time are displayed on the idle screen and it obtains the date and time from the Simple Network Time Protocol (SNTP) server by default. If your handset cannot obtain the date and time from the SNTP server, you need to configure the date and time manually. You can configure the time format and date format respectively. The handset supports two formats for time (12 Hour or 24 Hour) and three date formats (DD/MM/YYYY; MM/DD/YYYY; YYYY/MM/DD).

### To configure date and time manually

1. Press **Menu** (left softkey ) or the selection key ) to bring up operation menu.
2. Use arrow keys to reach **Settings** .
3.  Navigate to **Date and time**. Edit the current values in the Date & Time fields (you can change the date / time format using the left key ) or right key ) and press "Set" (left softkey ) .
4. Press "Save" softkey to apply your changes.

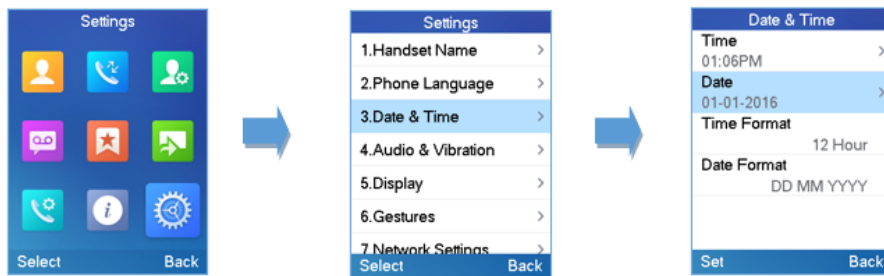

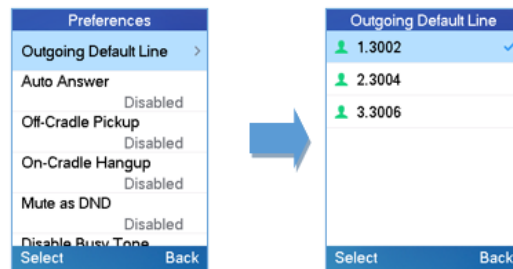

Figure 30: Date and Time Settings

## Outgoing Default Line

When a Handsets is configured with more than one line, users can change the default outgoing line on DP720 handset using keypad **Menu → Preferences → Outgoing Default Line**.

## Factory Functions

The factory functions include the following diagnostic options:

- **Keypad Diagnostic**
- **Audio loopback**
- **LCD on / off**
- **LCD diagnostic**
- **System Monitoring**

1. Press **Menu** (left softkey or the selection key) to bring up operation menu.

2. Use arrow keys to reach **Settings**

3. Navigate to select **Factory Functions** and choose which diagnostic, you need to perform:

- **Keypad Diagnostic**

All LEDs will light up. All keys' name will display in red on LCD screen before diagnosing. Press any key on the keypad to diagnose the key's function. When done, the key's name will display in blue on LCD with a prompt message (**PASS**). To exit press "Back" (right softkey).

**Note:** Long arrow UP key at any time to exit diagnostic mode.

- **Audio loopback**

Speak to the phone using speaker/handsets/headset. If you can hear your voice, your audio is working fine. Press "Back" (left softkey) to exit audio loopback mode.

- **LCD ON / OFF**

Selects this option to turn off LCD. Press any button to turn on LCD.

- **LCD Diagnostic**

Enters this option and press Left/Right arrow key to do LCD Diagnostic (you will notice that the color of the LCD will be changing). Press right softkey to quit.

- **LED Diagnostic**

Enters this option and press "1" to start LED Diagnostic (you will notice that the color of the LED will be changing). Press

"2" to quit.

- **System Monitoring**

Displays RSSI, battery voltage and charging current and RPN information.

Figure 31: Factory Functions

## DP720 Handset Firmware Upgrade

The DP720 handset can detect if a new firmware is available when it is registered to a base station.

Figure 32: New Firmware Available Notification

To upgrade the firmware on your handsets, follow the steps below:

1. Press **Menu** to bring up operation menu.
2. Use arrow keys to reach **Settings** .
3. Navigate to select **Firmware Upgrade** and press the softkey "Select".
4. The LCD screen will display a prompt message to confirm the firmware downloading / upgrading press the right softkey "Back" to dismiss the upgrade process.

Figure 33: Firmware Upgrade

## Reboot DP750 Base Station

1. Press **Menu** to bring up operation menu.

2. Use arrow keys to reach **Settings** .

3. Navigate to select **Settings** → **System Settings** and choose **Reboot Base**.

4. Enter Base PIN code (by default the PIN code is: 0000).

5. The LCD screen will display a prompt message to confirm rebooting the base station, press “Yes” (left softkey) to confirm or press “No” (right softkey) to cancel.

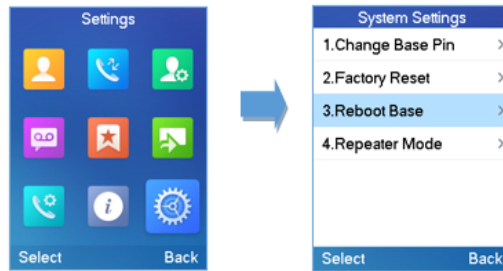

Figure 34: Rebooting the Base Station

## Reset DP720 Handset

The users can reset the new settings made on the handsets after performing factory reset. To reset your handsets to the default settings:

1. Press **Menu** to bring up operation menu.

2. Use arrow keys to reach **Settings** .

3. Navigate to select **Settings** → **System Settings** and choose **Factory Reset**.

4. The LCD screen will display a prompt message to confirm restoring factory settings, press “Yes” (left softkey) to confirm and then the handsets will reboot to apply the default settings or press “No” (right softkey) to cancel.

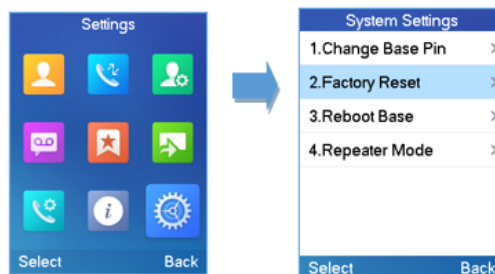

Figure 35: Resetting the Base Station

## CALL OPERATIONS

This chapter will guide you to place calls, transferring and holding the incoming calls.

### Placing calls

To place calls, you can use the following mode:

- **Earpiece mode:** pressing the off-hook key to dial out.
- **Speakerphone mode:** pressing the speakerphone key to dial out.
- **Headset mode:** pressing the off-hook key to dial out using connected headset.

During the call, you can switch the call mode by pressing the corresponding keys or connecting a headset.

### Make a Call using a Line

Making calls require the use of SIP lines. So, you should first register the SIP account to the handset beforehand, after registering the sip lines, you can assign one or more outgoing lines for the handset. The handset can only use the assigned outgoing line(s) to place calls.

**Please refer to the following methods to make calls using a line:**

**Method 1:**

o Via default outgoing line:

1. Enter the desired number using the keypad.
2. Press **Dial key**  or **Speaker key** . The handset will use the default outgoing line to dial out.
3. To terminate the call, press **Hang-Up key** .

**Note:** To change the default outgoing line, please refer to [Outgoing Default line](#).

o Selecting the outgoing line:

1. Enter the desired number using the keypad.
2. Press the left softkey  "Call".
3. Select the desired line to dial out.
4. To terminate the call, press **Hang-Up key** .

**Method 2:**

1. Press **Dial key**  or **Speaker key**  to enter the pre- dialing screen.
2. Enter the number to dial using the keypad.
3. Press **Dial key** , # (Use # as dial key" must be configured in web configuration) or wait for 4 seconds and the call will be initiated automatically.
4. To terminate the call, press **Hang-Up key** .

During the call, you can switch the call mode by pressing the corresponding keys and cancel the dialing operation by pressing the on-hook key. During the call conversations, you can press the left and right navigation keys to adjust the volume. The call duration is displayed on the LCD screen while the call is in progress and call summary will be displayed once the call is terminated.

**Notes**

- To dial "+" please keep pressing "0" key for about 2 seconds.

- To dial from contacts list, choose a contact using navigation keys and press **Dial key** .

**Dialing from Call history**

Users may use their call history entries to initiate calls.

1. Press **Menu** (left softkey  or the selection key ) to bring up operation menu.
2. Use arrow keys to reach **Call History** icon  and then press "Select" (left softkey .
3. Select the desired entry, then press **Dial key**  to establish the call.

### Note

In step 3, users can press "Options" softkey followed by "Edit Dial" option to initiate the call.

The call history list stores the last dialed phone numbers. When the memory of the redial number list is full, the handset will automatically erase the oldest dialed number when a new number is dialed

### Note

Redialing can be performed via the pound key "#" when configured accordingly.

## Dialing from Phonebook

Users may use their private or shared contacts to initiate calls.

1. Press **Contacts** (right softkey ) to access phonebook menu.
2. Select **Private** or **Shared** phonebook.
3. Select the contact to call.
4. Press **Dial Key**  to initiate the call.

### Note

In step 3, users can press "Options" softkey followed by "Edit Dial" option to initiate the call.

## Intercommunication

Users may make phone calls between different handsets directly without remembering each user's phone number.

1. Go to Handset GUI -> Shortcut
2. Configure a navigation key (up, down, left or right key) to "Intercom".
3. Press the key just configured at the idle state.
4. Choose the handset name that you want to call.

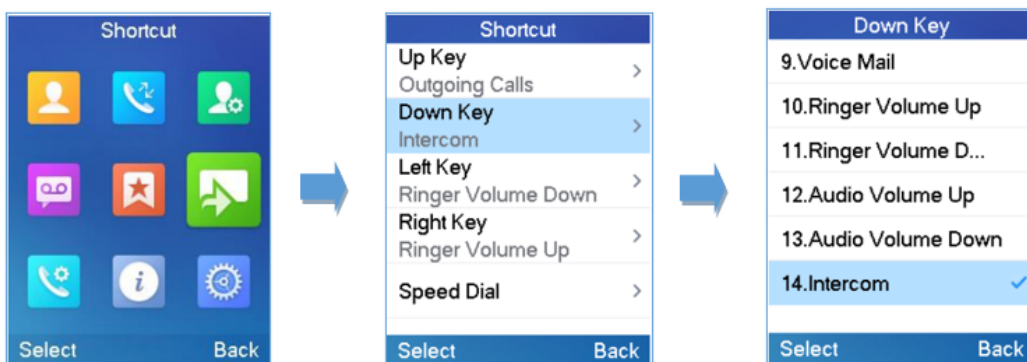

Figure 36: Shortcut Setting

## Answering Calls

When receiving an incoming call, you can answer the call using following steps:

- o **Earpiece mode:**

Press **Dial Key**  to pick up the call, or "Accept" softkey (left softkey ).

- **Speakerphone mode:**

Press **Speaker Key**  to pick up the call.

- **Headset mode:**

Press **Dial Key**  to pick up the call, or "Accept" softkey (left softkey  ) using a connected headset.

#### Notes

- To answer an incoming call during an established call, press **Dial Key** , or the **Speaker Key** , or the "Answer" softkey. The incoming call is answered, and the original call is placed on hold.
- You can switch off the ringer temporarily by pressing **Silent** softkey.

## Auto Answer

Users can enable Auto Answer feature to accept and automatically answer incoming calls.

If enabled, DP720 Handset will automatically answer incoming calls using speaker mode.

To activate / deactivate the auto answer feature:

- **Using DP720 Handset Menu**
  1. Press **Menu** to bring up operation menu.
  2. Select **Preferences** → navigate to **Auto Answer** using the up/down arrow keys.
  3. Switch between **Enabled/Disabled** using left/right arrow keys and "Save" after **Enabling** / **Disabling** the option.
- **Using DP750 Base Station Web Interface**
  1. Access DP750 Base Station Web Interface.
  2. Go to DECT → Handset Settings → HS# Settings.
  3. Set "Enable Auto Answer" to "Yes". (By default, set to "No").

## Off-Cradle Pickup

Users can enable Off-Cradle Pickup feature to automatically answer incoming calls after picking up DP720 Handset from its cradle. Incoming calls will be automatically answered using earpiece mode.

#### Notes

- DP720 Handset should be resting on its cradling and then picked up for this feature to work.
- "Auto Answer" feature should be set to "No" to work properly.

To activate / deactivate the off-cradle pickup:

- **Using DP720 Handset Menu**
  1. Press **Menu** to bring up operation menu.
  2. Select **Preferences** → navigate to **Off-Cradle Pickup** using the up/down arrow keys.
  3. Switch between **Enabled/Disabled** using left/right arrow keys and "Save" after **Enabling** / **Disabling** the option.
- **Using DP750 Base Station Web Interface**
  1. Access DP750 Base Station Web Interface.
  2. Go to DECT → Handset Settings → HS# Settings.

3. Set "Enable Onhook on Cradle Reposition" to "Yes". (By default, set to "No").

## Ending Calls

To terminate the calls, press **Hang-Up key** .

## On-Cradle Hang-up

Users can enable On-Cradle Hang-up feature to automatically end ongoing calls after placing DP720 Handset on its cradle.

To activate / deactivate the on-cradle hang-up feature:

- **Using DP720 Handset Menu**

1. Press **Menu** to bring up operation menu.
2. Select **Preferences** → navigate to **On-Cradle Hang-up** using the up/down arrow keys.
3. Switch between **Enabled/Disabled** using left/right arrow keys and "Save" after **Enabling** / **Disabling** the option.

- **Using DP750 Base Station Web Interface**

1. Access DP750 Base Station Web Interface.
2. Go to DECT → Handset Settings → HS# Settings.
3. Set "Enable Off hook on Cradle Pickup" to "Yes". (By default, set to "No").

## Rejecting Calls

To reject an incoming call, press **Hang-Up key**  or "Reject" softkey (right softkey .

## Direct IP Call

Direct IP calling allows two parties, that is, a handset and another VoIP device, to talk to each other in an ad hoc fashion without a SIP proxy.

### Elements necessary to complete a Direct IP Call:

- Both DP720 and other VoIP Device, have public IP addresses, or
- Both DP720 and other VoIP Device are on the same LAN using private IP addresses, or
- Both DP720 and other VoIP Device can be connected through a router using public or private IP addresses (with necessary port forwarding or DMZ).

Users can perform IP calls using Star code following the below steps:

1. Pick up the handset and press **Dial key** .
2. Dial **\*47** followed by the target IP Address.

**Note:** You can enter directly \*47 + target IP address, and then press the dial key to initiate the call.

Examples of direct IP calls

1. If the target IP address is 192.168.0.160, the dialing convention is **\*47 then 192\*168\*0\*160**, followed by pressing the "#" key if it is configured as a send key or wait 4 seconds. In this case, the default destination port 5060 is used if no port is specified.
2. If the target IP address/port is 192.168.1.20:5062, then the dialing convention would be: **\*47 or Voice Prompt with option 47, then 192\*168\*0\*160\*5062** followed by pressing the "#" key if it is configured as a send key or wait for 4 seconds.

## Notes

To accept incoming direct IP call, **Use Random Port** setting should be set to **NO**. If set to **YES**, it can only dial out. The setting is available on DP750 web interface → Profile → SIP Settings → Basic Settings.

## Call Hold/Resume

During an established call, you can put the call on hold and resume following below steps:

1. Press the left softkey  to access the call **Options** and then navigate to **Hold**.
2. Press "Select", left softkey  to put the call on hold.
3. To resume the call, access the options menu again and navigate to **Resume**, then press **Select**.

## Call Waiting

This feature will notify you of a new incoming call during an established call, and display the incoming call information visually on the LCD screen and a call waiting tone will be heard. If this feature is disabled, the new incoming call will be automatically rejected.

There are 2 ways to activate call waiting feature either using DP720 Handset Menu or using DP750 Base Station Web Interface.

### o Using DP720 Handset Menu

1. Press **Menu** to bring up operation menu.
2. Use arrow keys to reach **Call Features**  → navigate to **Call waiting** sub-menu.
3. Select the account for which you want to enable the Call waiting feature, and then press left softkey "Select".
4. Choose between **Enabled** and **Disabled** options and press the softkey "Save", a prompt message will be displayed to confirm that the call waiting is **enabled / disabled**.
5. During an established call, press  (dial key) to put first call on hold and answers second incoming call. If no second incoming call, pressing  will give the ability to initiate another call while first one is on hold.

## Note

You can switch between active/on-hold calls by pressing **Options** → **Swap**.

### o Using DP750 Base Station Web Interface

1. Access DP750 Base Station Web Interface.
2. Go to DECT → Handset Settings → HS# Settings.
3. Set "Disable Call Waiting Tone" to "No". (Default is No).
4. Press "Save and Apply" button to confirm.

## Do Not Disturb

You can activate or deactivate the DND mode for your accounts registered on the handset under the call settings. If DND mode is activated for a specific line, all incoming calls will receive busy treatment depending on your configuration (forward to voice mail, busy tone...)

**To enable or disable the DND mode, follow the next steps**

1. Press **Menu** to bring up operation menu.
2. Use arrow keys to reach **Call Features**  → navigate to **Do Not Disturb** sub-menu.

3. Select the account on which you want to enable / disable the DND mode and then press "Select"
4. Choose between **Enabled** and **Disabled** options and press softkey "Save" to accept the changes, a prompt message will be displayed to confirm that the DND is **enabled / disabled**.

You can navigate to Status → Line status to check if the **DND** mode is enabled on the base station.

## Call Forward

The call forward feature will allow you to forward all the incoming calls to the desired number. Three possible call forward types are available on the DP720.

- **Forward all:** All the incoming calls are immediately forwarded.
- **Busy Forward:** Incoming calls are immediately forwarded if the line is busy.
- **No Answer Forward:** Incoming calls are forwarded if not answered after a period of time.

**To enable the call forward, please refer to the following steps:**

1. Press **Menu** to bring up operation menu.
2. Use arrow keys to reach **Call Features**  → navigate to **Call Forward** sub-menu.
3. Select the account on which you want to enable/disable the call forward feature and press "Select".
4. Select the type of call forwarding and enter the number to forward the calls, and then press "Save" (left softkey) to apply the settings, a prompt message will be displayed to confirm that the new settings have been saved successfully.

## Paging

The DP720 supports paging other handsets internally without having any sip Account registered. Similarly, to the base station paging button, Inter-Handsets paging features enables handsets to ring other handsets. The feature can be enabled from LCD menu → Call Features → paging.

## Call Transfer

The DP720 supports the call transfer feature, you can transfer a call to another party using one of the following ways:

- **Blind transfer:** Transfer a call directly to another party without consulting
- **Attended transfer:** Transfer a call with prior consulting.

### Blind Transfer

1. Press the "Options" softkey (Left softkey  ) during a call, and then select **Blind Transfer**.
2. The initial call will be put on hold; enter the number you want to transfer the call to.
3. Press on **Transfer** softkey and the call will be transferred to the number or the handset specified.

### Attended Transfer

1. Press Left softkey "Options"  during a call, and then select **Attended Transfer**.
2. Choose the line and enter the number you want to transfer the call to, then press **Dial key**  or **Call** softkey.
3. Once the second call is established, press **Transfer** softkey to Transfer the call.

## Transfer between handsets

The Call Transfers can also be done between handsets without SIP account. The DP75x can transfer a call to another handset even if it has no SIP account registered.

## Speed Dial

Speed dial allows users to perform single-digit dialing to predefined numbers. This feature is particularly useful to speed up dialing frequently used or hard to remember numbers. A maximum of 8 speed dial numbers is allowed. Allowed

For example, the digit key 2 is configured as a speed dial key and assigned the number 2000, the phone will dial out the number 2000 directly when you long press digit key 2.

- **To assign the frequently used numbers as speed dial keys:**

1. Press **Menu** to bring up operation menu.

2. Access to **Shortcut**  and then use Arrow keys to reach **Speed Dial** sub-menu.

Or;

Long press the representative number from 2 to 9 to set. (Note: The Speed dial number should not be already set on chosen representative number, otherwise long press will initiate a call to configured speed dial number).

1. Choose the digit key (2-9) to set and press **Options** or **OK** button. Three options will be available:

- **Edit:** To configure manually a contact as speed dial. Users need to enter "First Name", "Last Name" and "Number". (Note: First Name + Number or Last Name + Number are accepted).
- **From Contacts:** To set a contact from the phonebook directory to be as speed dial.
- **To Modify a Speed Dial:**

Repeat above 2 steps.

At step 2, re-edit /re-assign a contact from the shared or private directory as speed dial on selected key.

- **To Delete a Speed Dial:**

Repeat above 2 steps.

At step 2, select **Clear Entry** option and press **OK** or **Select** to confirm.

## 3-Way Conference

The DP720 supports creating a local conference with other parties (including handset starting the conference).

### To start a 3 Way conference, follow below steps:

1. Press the **Dial key**  to place a call to the first party.

2. Press left softkey "Options" , then select **Conference**

3. Enter the number of the second party you want to add to the conference and press **Dial Key** .

To drop the conference call, press  or "End" softkey.

### Note

- Conference can be bridged before third party answers.
- Since 1.0.17.3, if the handset bridged 2 calls into a conference, he now able to kick one of the participants without ending the whole conference, or he can also hold and unhold participants without kicking them off the

call, press "Options" > Hold or Kick option.

## Voice Mail

The voice mail feature ensures that you will never miss any important messages. It permits either to leave voice mails to someone else or receive and listen to voice mails via the handset

### Set Voice Mail Feature Code

There are 2 ways to set Voice Mail Feature Code, either using DP720 Handset Menu or using DP750 Base Station Web Interface.

Note: The Voice Mail Feature Code depends on the service provider or IP-PBX used. For example, if UCM6xxx as SIP server, the Voice Mail Feature Code is \*97.

#### o Using DP720 Handset Menu

1. Press **Menu** (left softkey or the selection key) to bring up operation menu.
2. Access to **Voice Mail**  and then select **Set Voice Mail** sub menu.
3. Select the account and enter the "VM Access Number", then press "Save" softkey.

#### o Using DP750 Base Station Web Interface

1. Access DP750 Base Station Web Interface.
2. Go to Profiles → Profile X → General Settings.
3. Configure **Voice Mail Access Number**.

### Play Voice Mail Messages

1. Press "Menu" to bring up operation menu.
2. Access to **Voice Mail**  and then select **Play Message** sub menu.
3. Select the account to retrieve your voice messages saved on your voice mail.

Or;

Long press digit "1" key to dial configured Voice Mail feature code using Default Line.

#### Notes

- o Users can access directly voicemail menu to play messages, by clicking on "View" (left softkey  ) when the notification of a new voicemail pops up on the DP720's LCD screen.
- o If VM is protected by a password, users can enter the password using DP720 keypad after reaching Voice Mail system. The password is defined on the service provider or IP-PBX side.

### PTT (Push-To-Talk)

The DP720 support the Push to talk (PTT) features which is a technology based on the instantaneous communication commonly employed in wireless cellular phone services using a button to switch the device from voice transmission mode to voice reception mode. This feature is similar to "walkie talkie" use and the PTT mode switches a phone from full duplex mode, where both parties can hear each other simultaneously, to half duplex mode, where only one party can speak at one time. Multiple parties to the conversation may also be included.

### Configuration:

PTT feature is always enabled on the base station, to use the PTT feature, users need to enable the PTT on handset at: Handset **Menu** → **Preferences** → **PTT** → set **"Enabled"**. Also, to use PTT, the handset needs a dedicated a soft key to push and then to talk, user can choose to use either LSK (Left Softkey) or RSK (Right Softkey) in Shortcuts settings. (If you forgot to enable the PTT, when you press the PTT softkey, it will redirect you to the setting to enable it before you can use it.)

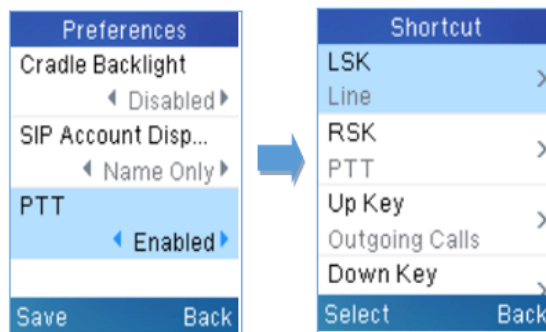

Figure 37: Enabling PTT and assigning a softkey to it

Users can configure "DECT PTT Silence Timer" on the Web UI at → DECT → General Settings. When a PTT call established, any handset who enabled PTT feature will automatically join the PTT call. if there is no one talking, after certain time, the PTT call will be closed. This timeout setting is to determine how long the PTT call will be closed after being idle status. If set to 0, the timer will be disabled, and the PTT will be remaining forever until all party exit the PTT call.

### Functionality:

1. Users could press and hold the configured softkey (LSK or RSK) from any screen to quickly initiate PTT call.

Figure 38: PTT Call Establishment

2. Available handsets (subscribed to the same base station) will receive the PTT call.
3. Keep holding PTT key while speaking.

The channel status will change to Sending PTT to indicate that you are transmitting as displayed on the following screenshot.

Figure 39: PTT Transmission

To terminate PTT call, press  button.

#### Note

User should expect a delay of 6-8 seconds to establish PTT call due to DECT signaling, and which will not exist once PTT call is established.

## Call Features

The DP750/DP720 supports traditional and advanced telephony features including caller ID, caller ID with caller Name, call forward etc.

Table 10: Call Features

<b>*30</b>	<b>Block Caller ID</b> (for all subsequent calls) <ul style="list-style-type: none"><li>Off hook the phone;</li><li>Dial *30.</li></ul>
<b>*31</b>	<b>Send Caller ID</b> (for all subsequent calls) <ul style="list-style-type: none"><li>Off hook the phone;</li><li>Dial *31.</li></ul>
<b>*67</b>	<b>Call with Caller ID Blocked</b> (per call) <ul style="list-style-type: none"><li>Off hook the phone;</li><li>Dial *67 and then enter the number to dial out.</li></ul>
<b>*82</b>	<b>Call with Caller ID Enabled</b> (per call) <ul style="list-style-type: none"><li>Off hook the phone;</li><li>Dial *82 and then enter the number to dial out.</li></ul>

<b>*93</b>	<p><b>Cancel Delayed Call Forward.</b> To cancel the delayed call forward:</p> <ul style="list-style-type: none"> <li>○ Off hook the phone;</li> <li>○ Dial *93;</li> <li>○ Hang up the call.</li> </ul>

## RESTORE FACTORY DEFAULT SETTINGS

### Warning

Restoring the factory default settings will delete all configuration information on the phone. Please backup or print all the settings before you restore to the factory default settings. Grandstream is not responsible for restoring lost parameters and cannot connect your device to your VoIP service provider.

Please follow the instructions below to reset the phone:

1. Press **MENU** button to bring up the keypad configuration menu;
2. Select **Settings** and enter;
3. Select **System Settings → Factory Reset**;
4. A warning window will pop out to make sure a reset is requested and confirmed;
5. Press **Yes** softkey to confirm and the phone will reboot.
6. To cancel the Reset, press **No** softkey instead.

Users also can perform factory reset using combo keys on DP720 during booting up prior it's fully booted, to give DP720 the ability to recover from some extreme cases like self-reboot or stuck right after booted up.

Please refer to following procedure for DP720 factory reset using combo key:

1. Connect the USB cable and power off DP720.
2. Power on DP720 and wait for Green LED.
3. Press 3 times Central Key (OK/Selection Key) quickly after Green LED on.
4. Press Speaker Key (left bottom) first and then Mute Key (right bottom) after Red LED on.
5. DP720 LED will start blinking in 3 colors: Green, Red and Orange if factory reset successful triggered.
6. Wait for about 1-3 minutes, the DP720 will boot up with setup wizard for initial language and date format settings.

## CHANGE LOG

This section documents significant changes from previous versions of user guide for DP750/DP720. Only major new features or major document updates are listed here. Minor updates for corrections or editing are not documented here.

#### **Firmware Version 1.0.19.6**

- No major changes.

#### **Firmware Version 1.0.19.4**

- No major changes.

#### **Firmware Version 1.0.19.3**

- No major changes.

#### **Firmware Version 1.0.19.2**

- Added option to use # as Redial key. [[Redial key](#)]

#### **Firmware Version 1.0.17.8**

- No Major changes.

#### **Firmware Version 1.0.17.4**

- No major changes.

#### **Firmware Version 1.0.17.3**

- Added ability to manage 3-way conference from handset. [[3-way conference](#)]

#### **Firmware Version 1.0.17.1**

- No major changes.

#### **Firmware Version 1.0.15.15**

- No major changes.

#### **Firmware Version 1.0.15.6**

- No major changes.

#### **Firmware Version 1.0.15.3**

- No major changes

#### **Firmware Version 1.0.15.2**

- Add support to input provisioning server username and password on handset UI when base station is trying to download a config file from a password protected server.
- Added support to delete a paired base station from the handset.

#### **Firmware Version 1.0.13.8**

- Added support for handsets to internally page other handsets without accounts registered. [[Paging](#)][[Call Features](#)]
- Updated the CPE to 1.0.1.141 to better support GDMS.

#### **Firmware Version 1.0.13.0**

- No major changes

#### **Firmware Version 1.0.11.12**

- Added support for Intercom feature. [[Intercommunication](#)]
- Added support for transfer between HS internally without SIP. [[Transfer between handsets](#)]

- Added option for blind transfer and attended transfer. [[Call Transfer](#)]
- Added DP720 charging current displaying. [[Factory Functions](#)]

#### **Firmware Version 1.0.11.4**

- No major changes

#### **Firmware Version 1.0.11.2**

- Added Chile time zone.

#### **Firmware Version 1.0.9.9**

- Added support to configure Voice Mail access number on DP75X web UI. [[Voice Mail Access Number](#)]

#### **Firmware Version 1.0.9.1**

- Added support for Intercom feature. [[Intercommunication](#)]

#### **Firmware Version 1.0.7.5**

- Changed DP720 GUI to new design with new style.
- Added support for Push-to-Talk for DP720. [[PTT \(Push-To-Talk\)](#)]
- Disable DP720 auto upgrade to 1.0.7.X or above.
- Improved DP720 built-in ringtones.

#### **Firmware Version 1.0.4.10**

- No major changes.

#### **Firmware Version 1.0.4.7**

- Added the ability to display Account Name only. [[SIP Account Display](#)]
- Added SRTP icon on handset UI. [[DP720 Icons Description](#)]
- Updated German translations for both DP750 Web UI and DP720 handset UI.

#### **Firmware Version 1.0.4.2**

- Added support for DP720 to use Audio Loopback test when it is not registered to the base station. [[Audio loopback](#)]
- Play keypad tone during the call if it is enabled. [[Advisory Tones](#)]

#### **Firmware Version 1.0.3.40**

- Increased the number of digits that can be dialed on the handset (23 digits).

#### **Firmware Version 1.0.3.37**

- No major changes

#### **Firmware Version 1.0.3.31**

- Added language support for Slovakian, Swedish. [[Multi-language](#)]

#### **Firmware Version 1.0.3.23**

- Removed Tools/alarm menu from DP720 GUI, replaced by Status menu. [[Status](#)]
- Added keypad tones for non DTMF keys on DP720.
- Added subscribe softkey in idle screen if HS no subscribed on DP720.
- Added the ability to customize DP720 ringtones. [[Ringtones Customization](#)]
- Added DP720 walk through setup wizard after factory reset. [[Setup Wizard](#)]

- Added support for more languages and updated translation.
- Added DP720 factory reset combo key to be able to recover the device during booting up. [[DP720 factory reset using combo key](#)]

#### **Firmware Version 1.0.2.16**

- Re-arranged the Handset Menu Settings. [[DP720 Handset Menu](#)]
- Changed menu "Line Status" in Call Settings to "Lines".
- Changed menu "Number" in set voice Mail to "VM Access Number".
- Added headset detection and icon for DP720 dial mode screen. [[DP720 Icons Description](#)]
- Added ability to bridge conference before third party answers. [[3-Way Conference](#)]
- Added ability to reboot from DP720 handset. [[Reboot DP750 Base Station](#)]
- Improved alarm snooze icon.
- Added DP720 LCD auto turn on feature when pickup from or reposition to charger.
- Added + button support for keypad dialing. [[DP720 Handset Description](#)] [[Make a Call using a Line](#)]
- Improved support for Czech, Dutch, German, Hebrew, Japanese, Korean, Turkish languages.

#### **Firmware Version 1.0.1.14**

- Added snooze time settings for alarm function.
- Added snooze icon.
- Updated alarm icon.
- Removed IVR (Interactive Voice Response).
- Added contact name to delete confirmation.
- Added use Line from Contacts when dialing out of phonebook. [[Dialing from Phonebook](#)]
- Added VM, missed calls, headset icon. [[DP720 Icons Description](#)]
- Removed "Intercom" feature.
- Removed "Internal Call" from audio ring tone menu.
- Adjusted Call History and Contacts menu architecture. [[DP720 Handset Menu](#)]
- Moved "Edit Dial" option to last one in Call History and Contacts menu option. [[Dialing from Call history](#)] [[Dialing from Phonebook](#)]
- Hide empty fields when displaying contact info.
- Hide icon after press back key in idle misses call or VM alert screen.
- Moved "Standard ring" to last one of ring tone list. [[Ringtones](#)]
- Missed Call can be dialed back via related SIP profile using softkey. [[Dialing from Call history](#)]

#### **Firmware Version 1.0.1.4**

- Added Call and Delete softkeys during off-hook dial. [[Placing calls](#)]
- Added left softkey for Voice mail alert window to enter the Play Message window. [[Play Voice Mail Messages](#)]
- Added Display line name info immediately after off-hook. [[Placing calls](#)]
- Changed to only press ESC key to show factory menu.
- Added Dial number immediately after off-hook.
- Added Dialing GUI enhancements.
- Added ability to configure menu key timeout. [[Change Menu and LCD Timeout](#)]
- Added Handset will prompt "Saved successfully" if configuring call forward settings in ring group.
- Added advisory tone for handset put in and out of cradle.
- Added ability to configure menu key timeout.
- Added when last name is none use the first name for speed dial record name.

- Added when handset enter IVR, press RSK hold key will delete dial number.
- Added stop dial tone if first key not number key after off hook

#### **Firmware Version 1.0.0.16**

- This is the initial version for DP750/DP720.
