This type of symbol is used to alert users to a specific operating procedure that must be emphasized in order to operate the unit safely.

### WARNING

#### Power and ground connection

Unplug this unit from power outlets if it emits smoke, an abnormal smell or makes unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped and contact an authorized service center.

Use only the power source marked on the unit. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.

For safety purposes this unit is equipped with a grounded plug. If you do not have this type of outlet, please have one installed. Do not defeat this safety feature by tampering with the plug.

Do not place objects on the power cord. Install the unit where no one can step or trip on the cord.

Do not overload power outlets and extension cords. This can result in the risk of fire or electric shock.

Completely insert the AC adaptor/power plug into the power outlet. Failure to do so may cause electric shock and/or excessive heat resulting in a fire.

Regularly remove any dust, etc. from the AC adaptor/power plug by pulling it from the power outlet, then wiping with a dry cloth. Accumulated dust may cause an insulation defect from moisture, etc. resulting in a fire.

Never touch the plug with wet hands. There is a danger of electric shock.

#### Installation

Place the unit securely on a stable, level surface. Serious damage and/or injury may result if the unit falls.

To prevent the risk of fire or electrical shock, do not expose this product to rain or any type of moisture.

Make sure that the unit is installed in a well ventilated room so as not to increase density of ozone in the air. Since ozone is heavier than air, it is recommended that air at floor level be ventilated.

#### Operating safeguards

Turn the power switch OFF before cleaning. Do not use liquid or aerosol cleaners.

Do not cover slots and openings on the unit. They are provided for ventilation and protection against overheating. Never place the unit near radiators, or in a place where proper ventilation is not provided.

## 1. Important Information

Never push any objects through slots in this unit. This may result in the risk of fire or electric shock. Never spill any liquid on the unit.

To reduce the risk of electric shock, do not disassemble this unit. Take the unit to an authorized service center when service is required. Opening or removing covers may expose you to dangerous voltage or other risks. Incorrect reassembly can cause electric shock when the unit is subsequently used.

Follow all warnings and instructions marked on this unit.

Do not spill liquids (detergents, cleansers, etc.) onto the telephone line cord plug, or allow it to become wet at all. This may cause a fire. If the telephone line cord plug becomes wet, immediately pull it from the telephone wall jack, and do not use (KX-MB2030 only).

Unplug this unit from power outlets and refer servicing to an authorized service center when any of the following conditions occur:

- If the power cord is damaged or frayed.
- If the unit has been exposed to rain or water, or liquid has been spilled into the unit. Do not use a microwave oven to speed up the drying process of any parts of the unit to avoid permanent damage.
- If the unit does not work normally by following the operating instructions. Adjust only controls covered by the operating instructions. Improper adjustment may require extensive work by an authorized service center.
- If the unit has been dropped or physically damaged.
- If the unit exhibits a distinct change in performance.

### USB cable/LAN cable

To assure continued emission limit compliance;

- use only shielded USB cable (Example: Hi-Speed USB 2.0 certified cable).
- use only shielded LAN cable (category 5 straight cable).

## CAUTION

### Installation and relocation

After moving the unit from cold areas to warmer areas, wait approximately 30 minutes before turning on the power switch to allow the unit to adjust to the ambient temperature. If the power switch is turned on too soon after a sudden climate change, condensation may form inside the unit, causing malfunction.

Never turn the unit upside down or sideways when moving it.

Never install telephone wiring during a lightning storm (KX-MB2030 only).

Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations (KX-MB2030 only).

Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface (KX-MB2030 only).
