About This Guide

Thank you for choosing Yealink T2 series IP phones, which deliver the industry's leading HD audio quality and a wide range of business telephony features, such as Call Hold, Call Transfer, Busy Lamp Field, Call Recording, Multicast Paging and Conference over an IP network. Meanwhile, it features a compact appearance, robust performance and cost efficiency for daily desktop voice communications.

This guide provides everything you need to quickly use your new phone. Firstly, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Quick Start Guide which can be found in your phone package before you set up and use the IP phone. As you read this guide, keep in mind that some features are configurable by your system administrator or determined by your phone environment. As a result, some features may not be enabled or may operate differently on your phone. Additionally, the examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen.

This user guide contains information for the following Yealink products:

- SIP-T29G IP phones
- SIP-T27P IP phones
- SIP-T27G IP phones
- SIP-T23P IP phones
- SIP-T23G IP phones
- SIP-T21(P) E2 IP phones (including SIP-T21 E2 and SIP-T21P E2 IP phones)
- SIP-T19(P) E2 IP phones (including SIP-T19 E2 and SIP-T19P E2 IP phones)

Read the [Yealink Products Regulatory Notices guide](#) for all regulatory and safety guidance.

Related Documentation

You can obtain additional information on the following phone's support pages:

- [IP Phone SIP-T29G](#)
- [IP Phone SIP-T27P](#)
- [IP Phone SIP-T27G](#)
- [IP Phone SIP-T23P](#)
- [IP Phone SIP-T23G](#)
- [IP Phone SIP-T21\(P\) E2](#)
- [IP Phone SIP-T19\(P\) E2](#)

The following types of related documents are available on each support page:

- Release Notes, which details bug fixes and feature enhancements when an update is released.
- Quick Start Guide, which describes how to assemble your phone and configure the basic phone features.
- Wall Mount Installation Guide, which provides detailed instructions for how to use an optional wall mount bracket to mount your phone on the wall.
- Administrator Guide, which provides the detailed information on how to configure phone features for system administrator.
- Regulatory Notice, which provides information for all regulatory and safety guidance.

In This Guide

This guide mainly takes the SIP-T27G IP phone as an example. Chapters in this guide include:

- Chapter 1 [About This Guide](#)
- Chapter 2 [Getting Started with Your Phone](#)
- Chapter 3 [Customizing Your Phone](#)
- Chapter 4 [Audio Settings](#)
- Chapter 5 [Directory](#)
- Chapter 6 [Call History](#)
- Chapter 7 [Call Features](#)
- Chapter 8 [Advanced Features](#)
- Chapter 9 [Optional Accessories with Your Phone](#)
- Chapter 10 [Maintaining Your Phone](#)
- Chapter 11 [Appendix - Menu Structure](#)

Getting Started with Your Phone

This chapter provides the overview of phone hardware and screen layout, and how to navigate your phone for the best performance.

Topics

Hardware Overview

Yealink T2 series IP phone has distinct hardware types:

Hardware	T19(P) E2	T27P/T23P/T23G/T21(P) E2	T27G	T29G
Screen	Grayscale	Grayscale	Grayscale	Color
Line Keys	No	Yes	Yes	Yes
USB Port	No	No	Yes	Yes

Topics

[T2X Series Hardware](#)

[Power LED Indicator](#)

[Line Key LED](#)

T2X Series Hardware

NO.	Item	Description
1	LCD Screen	Shows information about your phone, such as calls, messages, soft keys, time and date.
2	Power LED Indicator	Indicates call status, message status and phone's system status.
3	Line Keys	Access your phone lines and features. The SIP-T19(P) E2 IP phone does not have Line keys.
4	Soft Keys	Access the function displayed on the screen above the soft keys. The soft keys change depending on what you are doing at the time.
5	Navigation Keys	<ul style="list-style-type: none"> • Scroll through information or options displayed on the screen. • Access History and Directory respectively.
	 OK Key	Confirms actions or answers incoming calls.
	Cancel Key	Cancels actions or rejects incoming calls. On the SIP-T23G/T23P/T21(P) E2 IP phone, you can also use it to mute or unmute an activate call. The SIP-T19(P) E2 IP phone does not have Cancel Key.
6	HEADSET Key	Toggles the headset mode on or off. The LED indicator glows green when the headset is activated. Only the SIP-T29G/T27P/T27G IP phone has a key light.
7	HOLD Key	Places a call on hold or resumes a held call. The SIP-T23G/T23P/T21(P) E2/T19(P) E2 IP phone has HOLD key.
8	TRAN Key	Transfers a call.
9	Speakerphone Key	Toggles the speakerphone (hands-free) mode or not.
10	RD Key	Redials a previously dialed number.
11	MESSAGE Key	Accesses your voice messages. The LED indicator glows green when receiving a new voice mail. The SIP-T19(P) E2 IP phone does not have a key light.
12	CONF Key	Creates a conference with another party. The SIP-T23G/T23P/T21(P) E2/T19(P) E2 IP phone does not have CONF key.
13	MUTE Key	Toggles the microphone on or off. The SIP-T23G/T23P/T21(P) E2 IP phone does not have MUTE key.
14	 Volume Key	Adjust the volume of handset, headset, speaker, ringer, or media.
15	Keypad keys	Allow you to enter numbers, letters, and special characters. If a menu item has an index number, you can use the keypad key to select the item.
16	Speaker	Provides ringer and speakerphone audio output.
17	Reversible Tab	Secures the handset in the handset cradle when the IP phone is mounted vertically. For more information on how to adjust the reversible tab, refer to Yealink Wall Mount Quick Installation Guide for Yealink IP Phones .

NO.	Item	Description
18	Hookswitch	Connects or disconnects the phone from the phone line. The hookswitch is automatically activated when a user lifts the handset from the cradle to get a dial tone.

Power LED Indicator

LED Status	Description
Solid red	The phone is initializing.
Fast-flashing red (300ms)	The phone is ringing.
Slow-flashing red (1s)	The phone receives a voice mail or text message.
Solid red for 500ms and off for 3000ms alternately.	The phone enters power-saving mode. It is only available on the SIP-T29G IP phone.

Note

The SIP-T19(P) E2 IP phone only has a yellow key light.

The above introduces the default LED status. Your system administrator can configure the status of the power LED indicator.

Line Key LED

By default, the line keys are associated with the phone lines. You can set line keys as phone feature keys, and press line keys to access the configured phone features.

Line key LED (default)

LED Status	Description
Solid green	The line is seized. The line is in conversation.
Fast-flashing green	The line receives an incoming call.
Slow-flashing green	The call is placed on hold.
Off	The line is inactive.

Line key LED (configured as a Forward key with a value (destination number))

LED Status	Description
Solid green	The always forward feature is activated.
Off	The always forward feature is deactivated.

Note

If the value (the destination number) is not configured for a Forward key, the key LED glows green when the always/busy/no answer forward feature is activated. It is off when the always/busy/no answer forward feature is deactivated.

Line key LED (configured as a BLF key or BLF List key)

LED Status	Description
Solid green	The monitored user is idle.

LED Status	Description
Fast-flashing red (200ms)	The monitored user receives an incoming call.
Solid red	The monitored user is busy. The monitored user's conversation is placed on hold (This LED status requires server support).
Slow-flashing red (1s)	The call is parked on the monitored user.
Off	The monitored user does not exist.

Line key LED (used as a page switch key)

LED Status	Description
Solid red	There is a call parked on the line whose line key is not on the current page.
Fast-flashing green	The line receives an incoming call on the line key of the non-current page.
Fast-flashing red	The monitored user receives an incoming call line whose line key is not on the current page.
Off	The line keys are idle.

Line key LED (associated with a shared line)

The Local SCA Phone is involved in an SCA call, while the Monitoring SCA Phone is not involved in the SCA call and used for monitoring shared line.

LED Status	Description
Off	The shared line is idle.
Fast-flashing green	The shared line receives an incoming call.
Solid green (Local SCA Phone) Solid red (Monitoring SCA Phone)	The shared line is busy or is in a call. The shared line is dialing. The shared line is seized. The call on shared line is barged in by the other shared line party.
Slow-flashing green (Local SCA Phone) Slow-flashing red (Monitoring SCA Phone)	The call on shared line is placed on public hold.
Slow-flashing green (Local SCA Phone) Solid red (Monitoring SCA Phone)	The call on shared line is placed on private hold. In a multi-party call, all the participants place the call on hold.

Line key LED (associated with a bridged line)

The Local BLA Phone is involved in a BLA call, while the Monitoring BLA Phone is not involved in a BLA call and used for monitoring bridged line.

LED Status	Description
Off	The bridged line is idle.
Fast-flashing green	The bridged line receives an incoming call.

LED Status	Description
Solid green (Local BLA Phone) Solid red (Monitoring BLA Phone)	The bridged line is busy or is in a call. The bridged line is dialing. The bridged line is seized.
Slow-flashing green (Local BLA Phone) Slow-flashing red (Monitoring BLA Phone)	The call on bridged line is placed on hold.

Screen and Icons

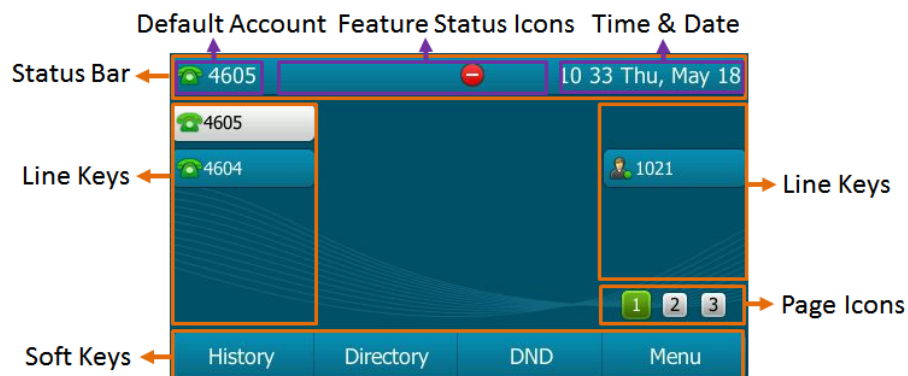

Before you use the phone, you need to understand the state of your phone, including phone screen layout and icons.

Topics

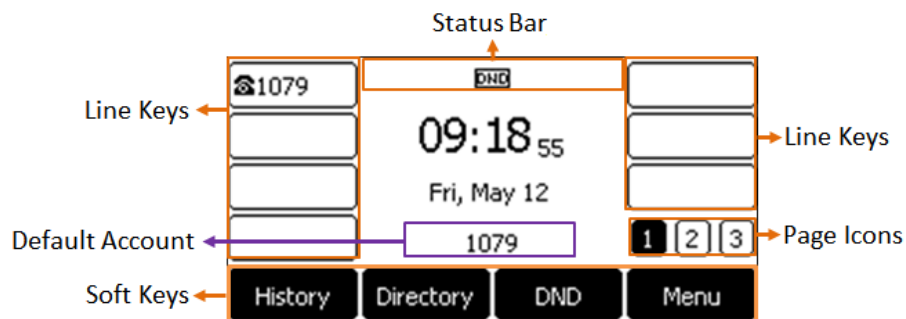

- [Idle Screen](#)
- [Dialing/Pre-dialing Screen](#)
- [Calls Screen](#)
- [Icons in the Status Bar](#)
- [Line Key Icons](#)
- [Call History Icons](#)

Idle Screen

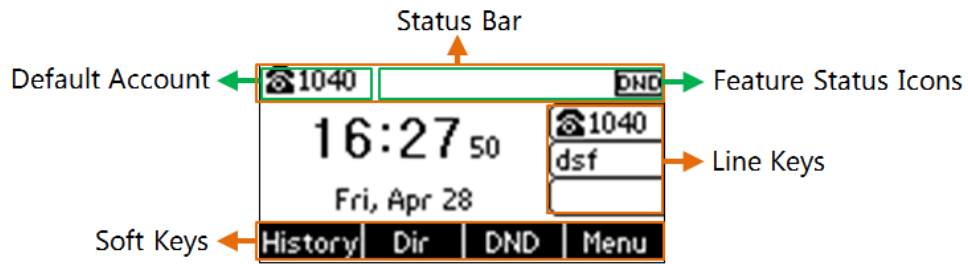

The Idle screen is made up of three parts: the status bar, line keys and soft keys. The time & date displays on the status bar or middle of screen that varies by phone models.

SIP-T29G

SIP-T27P/T27G

SIP-T23P/T23G

SIP-T19(P) E2

- **Status Bar:** Display the default account, feature status icons, and the time. The status icons display when features are activated.
- **Line Keys:** Display the information associated with the line and feature keys on the phone.
- **Page Icons:** The page icons appear only when you assign functionality to line key located in line key 11-27 on the SIP-T29G IP phone or line key 9-21 on the SIP-T27P/T27G IP phone.
- **Soft Keys:** Each soft key label indicates the action for the soft key below the screen.

Related Topics

[Icons in the Status Bar](#)

[Changing the Default Account](#)

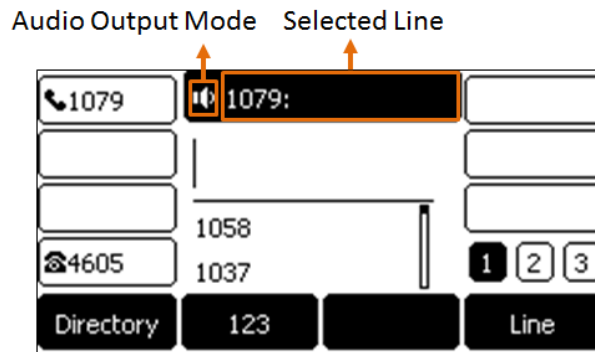

[Customizing the Soft Keys](#)

Dialing/Pre-dialing Screen

When the phone is idle, you can pick up the handset, press a line key, Speakerphone key or HEADSET key (if configured by your system administrator) to access the Dialing screen. Or you can enter a number directly using the keypad to access the Pre-dialing screen. The placed call records display on the LCD screen. From Dialing/Pre-dialing screen, you can use phone keypad to enter and edit data. The contacts whose name or phone number matches the entered characters appear on the LCD screen. You can select the desired contact to place a call directly.

Note

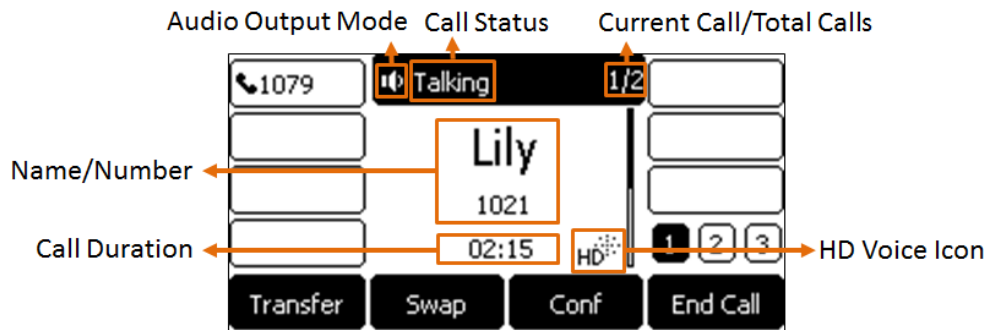

Your system administrator can configure search source list in dialing, and disable the phone to display the placed call records. Check with your system administrator to find out if they are available on your phone.

Calls Screen

All of your active and held calls display on the Calls screen. You can press up or down navigation keys to switch among calls.

When there is an active call and a held call, the Calls screen on the IP phone is shown as below:

SIP-T27P/T27G

Icons in the Status Bar

Icons in the status bar vary by phone models.

Entering Characters

You can use the keypad keys on your phone to enter or update field information. The following table describes how to enter different characters using the keypad keys.

Task	Action
Switch input mode	Press the ABC , abc , Abc , 2aB , or 123 soft key to switch the input mode.
Enter alphas	Select ABC , abc , 2aB or Abc mode. On the SIP-T27P/T27G/T23(P) E2/T19(P) E2 IP phone, press the keys labeled with letters until your desired letter appears. On the SIP-T29G IP phone, press a keypad key repeatedly to view the character options and stop when the letter you want to enter is displayed in the field. Wait one second, and then enter the next letter.
Enter numbers	Select 123 mode, press the corresponding keys.
Enter special characters	Select ABC , abc , 2aB , or Abc mode, press * key or # key one or more times to enter one of the following special characters: * key: *,?!\(-)@/._:~+&%=<> £ \$¥¤[]{}~^_` ;~#" # key: # In 123 mode, you can press * key to choose the following special characters: .*/@[].
Insert space	Select ABC , abc , 2aB , or Abc mode, press the 0 key.
Move cursor	Press  or  to position the cursor.
Delete one or more characters	Position the cursor to the right of the character, and press the Delete soft key.

Customizing Your Phone

You can make your IP phone more personalized by customizing various settings.

[Phone Lock](#)

Changing the Administrator Password

Some features on the phone can only be set from the Advanced settings. By default, you require a password to access the Advanced settings. The default administrator password is "admin".

For security reasons, you should change the default password as soon as possible.

Procedure

1. Navigate to **Menu->Settings->Advanced Settings->Change Password**.
For the SIP-T29G IP phone, navigate to **Menu->Advanced->Change Password**.
2. Enter the desired value in the **Old PWD**, **New PWD** and **Confirm PWD** field respectively.
3. Press **Save**.

Wallpaper

Yealink SIP-T29G IP phones support wallpaper.

The IP phone comes with a default picture, you can change it to another built-in picture. You can also add personal pictures as wallpapers using a USB flash drive.

Note

You can also change it to any custom picture uploaded by your system administrator.

Topics

[Changing Idle Screen Wallpaper](#)
[Adding a Wallpaper from a USB Flash Drive](#)

Changing Idle Screen Wallpaper

You can change the wallpaper displayed on your Idle screen to any built-in picture. If your system administrator has uploaded custom pictures to your phone, you can also choose a custom picture.

Procedure

1. Navigate to **Menu->Basic->Display->Wallpaper**.
2. Select a desired wallpaper image.
3. Press **Save**.

Adding a Wallpaper from a USB Flash Drive

When you set a picture in USB flash drive as wallpaper, the picture is added to the Wallpaper list.

The screens of SIP-T29G IP phones are 4.3 inches (Resolution: 480x272).

We recommend you to add a picture less than 1.8 megapixels. Either the smaller or larger picture will be scaled proportionally to fit the screen.

Before You Begin

Make sure that the picture is in the root directory of your USB flash drive, and the USB flash drive is connected to your phone successfully.

Procedure

1. Press **Menu->USB->Browse Photo**.
2. Select a desired picture, and then press **Preview**.
3. Press **Set as**, and then select **Set as wallpaper**.
4. Press **OK**.

The phone wallpaper will change to the selected picture.

Screen Saver

The screen saver will automatically start when the IP phone is idle for the preset waiting time. You can stop the screen saver at any time by pressing any key. When your phone is idle again for a preset waiting time, the screen saver starts again.

By default, your screen displays a built-in picture when screen saver starts. You can set custom pictures as the screen saver uploaded by your system administrator.

The time & date, certain status icons (for example, auto answer, DND, a new text message), or custom information (for example, notifications or company logo) can also display on the screen saver.

Note

The custom information is preset by your system administrator.

The SIP-T27P/T27G/T23P/T23G/T21(P) E2/T19(P) E2 IP phone only displays custom information as the screen saver.

Topics

- [Changing the Waiting Time for Screen Saver](#)
- [Enabling/Disabling Time & Date and Status Icons Display](#)
- [Adding a Screen Saver from a USB Flash Drive](#)
- [Setting the Screen Saver Type](#)

Changing the Waiting Time for Screen Saver

You can change the waiting time for screen saver.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Display->Screensaver**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Display->Screensaver**.
2. Select the desired waiting time from the **Wait Time** field.
3. Press **Save**.

Enabling/Disabling Time & Date and Status Icons Display

For the SIP-T29G IP phone, you can enable or disable your phone to display Time & Date and Status Icons on the screen saver.

Before You Begin

You cannot enable Time & Date and status icons display if your system administrator has set your phone to display custom information on the screen saver.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Display->Screensaver**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Display->Screensaver**.
2. Select the desired value from the **Display Clock** field.
3. Press **Save**.

The Time & Date and status icons displays on the screen saver, as shown below:

Adding a Screen Saver from a USB Flash Drive

You can use a picture that is stored in your USB flash drive as the screen saver on your phone. When you set one of your pictures as the screen saver, the picture is displayed on the screen saver list.

The screens of SIP-T29G IP phones are 4.3 inches (Resolution: 480x272).

We recommend you to add a picture less than 1.8 megapixels. Either the smaller or larger picture will be scaled proportionally to fit the screen.

Before You Begin

Make sure that the picture is in the root directory of your USB flash drive, and the USB flash drive is connected to your phone successfully.

Procedure

1. Press **Menu->USB->Browse Photo**.
2. Select the desired picture, and then press **Preview**.
3. Press **Set as**, and then select **Set as screensaver**.

4. Press **OK**.

Setting the Screen Saver Type

For the SIP-T27P/T27G/T23P/T23G/T21(P) E2/T19(P) E2 IP phone, you cannot set the screen saver type. The system administrator can set custom information displayed when screen saver starts.

For the SIP-T29G IP phone, you can choose one of the following screen saver types:

- System
- Custom
- Server XML (shows custom information on the screensaver)

Before You Begin

If you want to set a custom picture as the screen saver, make sure that the custom picture has uploaded by your system administrator.

If you want to show custom information on the screen saver, make sure that the custom information has set by your system administrator.

Procedure

1. Navigate to **Menu->Basic->Display->Screensaver**.
2. Select the desired screen saver type from the **Screensaver Type** field.
 - If you select **System**.
The IP phone will automatically set the built-in picture as the screen saver.
 - If you select **Custom**.
The IP phone will automatically set the custom pictures as the screen saver, and display these pictures alternately.
 - If you select **Server XML**.
The IP phone will automatically display the custom information (for example, notifications or company logo) on the screen saver.
3. Press **Save**.

Changing the Screen Backlight Brightness and Time

You can change the backlight brightness of the LCD screen during phone activity and inactivity. The backlight brightness automatically changes when the phone is idle for a specified time. It is not available for the SIP-T19(P) E2 IP phone.

You can change the screen backlight brightness and time in the following settings:

Active Level: The brightness level of the LCD screen when the phone is active. Digits (1-10) represent different brightness levels. 10 is the brightest level. It is only available for the SIP-T29G/T27G/T27P IP phone.

Inactive Level: The brightness of the LCD screen when the phone is inactive. You can select a low brightness or turn off the backlight. It is only available for the SIP-T29G IP phone.

Backlight Time: The delay time to change the brightness of the LCD screen when the phone is inactive. Backlight time includes the following settings:

- **Always On:** Backlight is on permanently.
- **Always Off:** Backlight is off permanently. It is not available for the SIP-T29G IP phone.

- **15s, 30s, 1min, 2min, 5min, 10min** or **30min**: Backlight is changed when the phone is inactive after the designated time (in seconds).

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Display->Backlight**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Display->Backlight**.
2. For the SIP-T29G/T27G/T27P IP phone, select the desired level from the **Active Level** field.
3. For the SIP-T29G IP phone, select the desired value from the **Inactive Level** field.
4. Select the desired time from the **Backlight Time** field.
5. Press **Save**.

Adjusting the Screen Contrast

You can adjust the screen contrast of the LCD screen to make it easier to read.

The intensity of screen contrast ranges from 1 to 10 and the highest intensity is 10. It is not available for the SIP-T29G IP phone.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Display->Contrast**.
2. Select the desired value from the **Contrast** field.
3. Press **Save**.

Changing the Language

The default language of the phone user interface is English. You can change the language for the phone user interface.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Language**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Language**.
2. Select the desired language.
3. Press **Save**.

Text displayed on the phone user interface will change to the selected language.

Time & Date

You can set the time and date manually. The time and date format is also customizable.

Topics

[Setting the Time and Date Manually](#)

[Changing the Date Format](#)

Setting the Time and Date Manually

If your phone cannot obtain the time and date automatically, you can set the time and date manually.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Time & Date->Manual Settings**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Time & Date->General->Manual Settings**.

- Enter the specific date and time in the corresponding fields.
For the SIP-T29G IP phone, you can also press the up or down navigate key to select the desired date and time.
- Press **Save**.
The time and date displayed on the LCD screen will change accordingly.

Changing the Date Format

You can customize the date by choosing among a variety of time and date formats.

The built-in date formats are listed as below:

Date Format	Example (2016-09-02)
WWW MMM DD	Fri, Sep 02
DD-MMM-YY	02-Sep-16
YYYY-MM-DD	2016-09-02
DD/MM/YYYY	02/09/2016
MM/DD/YY	09/02/16
DD MMM YYYY	02 Sep, 2016
WWW DD MMM	Fri, 02 Sep

Note

Your system administrator can customize the date format.

Procedure

- Navigate to **Menu->Settings->Basic Settings->Time & Date->Time & Date Format**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Time & Date->Time & Date Format**.
- Select the desired date format from the **Date Format** field.
- Select the desired time format from the **Time Format** field.
- Press **Save**.

Setting a Key as Send

You can set the “#” key or “*” key to perform as a send key while dialing.

Procedure

- Navigate to **Menu->Features->Key As Send**.
For the SIP-T29G IP phone, navigate to **Menu->Features->Others->General**.
- Select # or * from the **Key As Send** field, or select **Disabled** to disable this feature.
- Press **Save**.

Customizing the Soft Keys

You can customize the function of the soft keys displayed in the bottom of the Idle screen for all IP phones except the SIP-T29G IP phone. This feature is typically used to access frequently used functions, to create menu shortcuts to

access frequently used phone settings. The soft keys perform the same functions as the hard keys.

Caution

We recommend that you should keep a **Menu** soft key, otherwise you may not access the phone settings.

Procedure

1. Navigate to **Menu->Settings->Advanced Settings->Softkey Label**.
2. Select the desired soft key, and then press **Enter**.
3. Select the desired key type from the **Type** field.
4. (Optional.) Select the desired line from the **Account ID** field.
5. (Optional.) Enter the string that will appear on the LCD screen in the **Label** field.
6. (Optional.) Enter the corresponding value in the **Value** field.
7. Press **Save**.

Phone Lock

Phone lock helps you to protect your phone from unauthorized use. You can lock your phone manually when you are not using it or lock it automatically after being idle for a specified time.

Topics

[Phone Lock Types and Waiting Time](#)

[Setting the Phone Lock](#)

[Locking Your Phone Manually](#)

[Unlocking Your Phone](#)

[Changing Your Phone Unlock PIN](#)

Phone Lock Types and Waiting Time

There are three phone lock types:

- **Lock the Menu soft key:** it prevents unauthorized users from accessing the menu, changing the personal settings for your phone.
- **Lock the Function keys:** it only allows unauthorized users to use the keypad for placing a call, answering or rejecting an incoming call and ending a call.
- **Lock all keys:** it only allows unauthorized users to use the keypad for dialing emergency number or authorized numbers that set up by your administrator, answering or rejecting an incoming call and ending a call.

Note

The Volume key, HEADSET key and Speakerphone key are always available when you lock the phone.

You can set a waiting time to lock your phone automatically. If the waiting time is set to 0, the phone will not be automatically locked. You need to lock your phone manually.

Setting the Phone Lock

By default, the phone lock feature is disabled. If you want to lock your phone, you need to enable this feature. You can select to use which phone lock type and specify the waiting time to lock your phone automatically.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Phone Lock**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Phone Lock**.

2. Enter the desired PIN (default PIN: 123) in the **Unlock PIN** field.
3. Press **OK**.
4. Select **Enabled** from the **Lock Enable** field.
5. Select a desired type from the **Lock Type** field.
6. Enter the desired interval between 0 and 3600 (seconds) of automatic phone lock in the **Auto Lock** field.
7. Press **Save**.

Related Topics

[Phone Lock Types and Waiting Time](#)

Locking Your Phone Manually

If you have specified a timeout to lock your phone automatically, your phone will be locked after being idle for a specified time. You can also lock your phone manually.

Before You Begin

Make sure that the phone lock is enabled and you have set a phone lock type.

Procedure

1. Long press # key to lock your phone immediately on the Idle screen.
When the phone is locked, the lock icon will appear on the LCD screen.

Related Topics

[Setting the Phone Lock](#)

Unlocking Your Phone

Procedure

1. Press any locked key, the LCD screen prompts you to enter a unlock PIN.
2. Enter the desired PIN (default: 123) in the **Unlock PIN** field.
3. Press **OK**.

The lock icon disappears from the LCD screen.

Note

If you forget the unlock PIN, you can enter the administrator password to unlock your phone, and then change the unlock PIN if allowed.

Changing Your Phone Unlock PIN

The default unlock PIN is 123. You can change your unlock PIN at any time for security reasons.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Change PIN**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Change PIN**.
2. Enter the desired value in the **Old PIN**, **New PIN** and **Confirm PIN** field respectively.
The unlock PIN length must be within 15 digits.
3. Press **Save**.

Audio Settings

You can control certain audio settings on your phone, including adjusting the audio volume, setting a ring tone and key tone.

Topics

Setting a Ring Tone for a Contact

You can select a unique ring tone for various contacts in your directory. This helps you quickly identify callers according to the phone rings.

By default, the **Auto** is selected, and this contact uses the ring tone according to the priority: Group ring tone>Account ring tone>Phone ring tone.

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Enter the desired contact group.
If the contact is not in any group, enter the **All Contacts**.
3. Highlight a desired contact, and then press **Option**. Select **Detail**.
4. Select a desired ring tone from the **Ring** field.
The ring tone is played automatically. You can press the Volume key to adjust the ringtone volume.
5. Press **Save**.

Related Topics

Setting the Key Tone

You can set the phone to produce a sound when pressing the keypad keys. The key tone is enabled by default.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Sound->Key Tone**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Sound->Key Tone**.
2. Select the desired value from the **Key Tone** field.
3. Press **Save**.

Directory

The Yealink IP phone provides several types of phone directories, depending on the phone models and what the system administrator has set up for you.

The phone provides the following types of directories by default:

- [Local Directory](#)
- [Favorites](#)
- [Blacklist](#)
- [Mobile Contacts](#)
- [Remote Phone Book](#)

Local Directory

You can store up to 1000 contacts and 48 groups in your phone's local directory, allowing you to edit, delete, search or simply dial a contact from the local directory.

Note

You can back up the local directory to the provisioning server. For more information, contact your system administrator.

Adding Contact Groups

To help organize your contacts and make them easier to find, you can add additional groups in the local directory.

When you add a group in the local directory, you can specify a ring tone for this group.

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Press **AddGroup (AddGr)**.
3. Enter the desired group name in the **Name** field.
4. Select the desired group ring tone from the **Ring** field.
5. Press **Add**.
On the SIP-T29G IP phone, press **Save**.

Editing Contact Groups

You can change the group name at any time.

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Highlight a desired group.
3. Press **Option**, and then select **Detail**.
4. Edit the group information.
5. Press **Save** to accept the change.

Deleting Contact Groups

You can delete a group from local directory at any time. Note that you cannot delete the All Contacts group.

Procedure

1. Press **Directory (Dir)** or **Menu->Directory->Local Directory** to enter the local directory.
2. Highlight a desired group.
3. Press **Option**, and then select **Delete**.
A confirmation message is displayed, confirming that you want to delete the group.
4. Press **OK** to delete.

Managing the Local Directory Contacts

You can add, edit and delete contacts in the local directory.

Topics

[Adding Contacts](#)

[Deleting Contacts](#)

Adding Contacts

When you add a contact to your local directory, you can enter a unique name with up to three kinds of numbers of your choosing, including office number, mobile number or other number. You can set other information for your contact, including:

- Specify an account to use when calling this contact.
- Specify a ring tone for the contact.
- Specify a contact photo to the contact (only available on the SIP-T29GIP phone).

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Enter the desired contact group.
If the contact you want to add does not belong to any group, enter the **All Contacts**.
3. Press **Add**.
4. Enter the name and the office, mobile or other numbers in the corresponding fields.
5. Select the desired account from the **Account** field.
6. Select the desired ring tone from the **Ring** field.

7. On the SIP-T29G IP phone, select a desired photo from the **Photo** field.
8. Press **Add**.

On the SIP-T29G IP phone, press **Save**.

If the contact already exists in the local directory, the LCD screen will prompt "Contact name existed!".

[Deleting All Contacts](#)

Deleting a Contact

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Enter the desired contact group.
If the contact is not in any group, enter the **All Contacts**.
3. Highlight a desired contact, and then press **Option**.
4. Select **Delete**.
A confirmation message is displayed, confirming that you want to delete the contact.
5. Press **OK** to delete.

Deleting All Contacts

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.

2. Enter the desired contact group.
3. Press **Option**, and then select **Delete All**.
A confirmation message is displayed, confirming that you want to delete all contacts.
4. Press **OK** to delete.

Moving a Local Directory Contact to Blacklist

You can move a contact in the local directory to blacklist. Incoming calls from this contact will be rejected automatically.

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Enter the desired contact group.
If the contact is not in any group, enter the **All Contacts**.
3. Highlight a desired contact, and then press **Option**.
4. Select **Add to Blacklist**.
A confirmation message is displayed, confirming that you want to move to blacklist.
5. Press **OK**.

Searching for Local Directory Contacts

In the Local Directory, you can enter search criteria to find your desired contact quickly.

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Press **Search**.
3. Enter a few continuous characters of the contact name or continuous numbers of the contact number (office, mobile or other number).
The contacts whose name or phone number matches the entered characters will display in the result list.

Favorites

Favorites are the contacts in your local directory that you call most often. You can add contacts as favorites, view favorites, reorder favorites, and delete favorites. This feature is disabled by default. Check with your system administrator to find out if this feature is available on the phone.

The phone will automatically assign a Speed Dial key for a favorite from the first unused DSS key. If a DSS key is used, the IP phone will skip to the next unused DSS key. Favorites display consecutively according to their index numbers. The contact with the lowest number is displayed first. The contact name is displayed on the phone as a label. It is not available for SIP-T19(P) E2.

You can [quickly dial a number using the speed dial key](#). The order of speed dial number is office number>mobile number>other number.

Note

By default, the order of Speed Dial key assigned automatically is Line Key->Ext Key. Your system administrator can configure the assigned order of Speed Dial keys.

Enabling Anonymous Call

Before You Begin

Check with your system administrator if the anonymous call on code or off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to **Menu->Features->Anonymous Call (Anonymous)**.
2. Select a desired line from the **Line ID** field (not for the SIP-T19(P) E2 IP phone).
For the SIP-T29G IP phone, select a desired line.
3. Select **Enabled** from the **Local Anonymous** field.
4. (Optional.) Select the desired value from the **Send Anony Code (Send Anonymous Code)** field.
5. (Optional.) Enter the anonymous call on code and off code respectively in the **On Code** and **Off Code** field.
6. Press **Save**.

Placing a Anonymous Call

Before You Begin

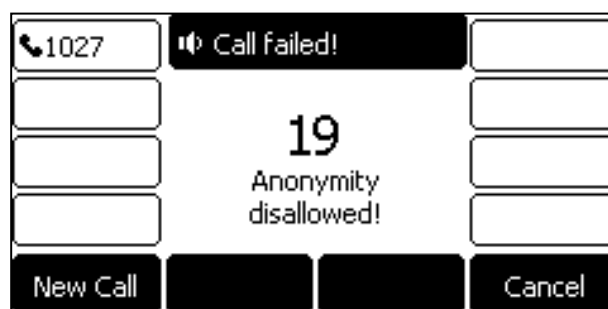

Enable anonymous call for a specific line.

Procedure

1. Select the anonymous line to place a call.
The LCD screen of callee's phone prompts an incoming call from anonymity.

If the callee enables anonymous rejection feature, your phone LCD screen may has a prompt that the callee does not accept calls from anonymous number.

Related Topics

Answering Calls

When your phone receives an incoming call on your phone, you can choose to answer it in various ways, including answering a call or multiple calls, or answering calls automatically.

Topics

[Answering a Call](#)

[Answering a Call When in a Call](#)

[Answering Calls Automatically](#)

Answering a Call

Procedure

1. Do one of the following:
 - Pick up the handset.
 - Press the Speakerphone key.
 - Press the HEADSET key. The key LED glows green (only on the SIP-T29G/T27G/T27P IP phone).
 - Press **Answer** or the line key that has the flashing green LED indicator.
The call is answered in the speakerphone (hands-free) mode by default.

Related Topics

[Switching Among the Handset, Speakerphone and Headset Modes](#)

Answering a Call When in a Call

When you are in an active call and an incoming call arrives on the phone, the call waiting tone beeps, and the incoming call information is displayed.

Before You Begin

Enable call waiting feature on the phone.

Procedure

1. Press the **Answer** soft key.
The active call is placed on hold, and the incoming call becomes active.

Related Topics

[Enabling Call Waiting](#)

Enabling Call Waiting

Call waiting enables you to receive another call when there is already an active call on your phone. If it is disabled, the new incoming call will be rejected automatically.

You can enable call waiting feature to avoid missing important calls during a call. You can also set the phone to play a warning tone when the new incoming call arrives.

Before You Begin

Check with your system administrator if the call waiting on code or off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to **Menu->Features->Call Waiting**.
2. Select **Enabled** from the **Call Waiting** field.
3. Select **Enabled** from the **Play Tone** field.
4. (Optional.) Enter the call waiting on code or off code respectively in the **On Code** or **Off Code** field.
5. Press **Save**.

Answering Calls Automatically

Auto answer enables you to automatically answer an incoming call in speakerphone (hands-free) mode when your phone is idle.

Note

When you are in an active call and an incoming call arrives on the phone, the incoming call will not be automatically answered even if auto answer is enabled.

Your system administrator can configure the phone to automatically answer the incoming call after ending all calls. Check with your system administrator to find out if it is available on your phone.

Procedure

1. Navigate to **Menu->Features->Auto Answer**.
2. Select a desired line (not for the SIP-T19(P) E2 IP phone).
3. Select **Enabled** from the **Status** field.
For the SIP-T29G IP phone, select **Enabled** from the **Auto Answer** field.
4. Press **Save**.

If the auto answer feature is enabled for the default account, the auto answer icon appears on the phone screen.

Silencing or Rejecting Incoming Calls

When you receive an incoming call, you can choose to silence or reject the call instead of answering.

Topics

[Silencing a Call](#)

[Rejecting a Call Manually](#)

[Rejecting Anonymous Calls Automatically](#)

Silencing a Call

You can silence a call to stop your phone from ringing. Even if you silence the call, the incoming call notification continues to display on your phone.

Procedure

1. Press **Silence**.

Rejecting a Call Manually

Procedure

1. Press **Reject** to reject an incoming call.

Rejecting Anonymous Calls Automatically

You can set your phone to automatically reject incoming calls from callers who have concealed their caller ID information (including name or phone number). Your phone does not ring, and you are not notified of an attempted call.

Before You Begin

Check with your system administrator if the anonymous call rejection on code or off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to **Menu->Features->Anonymous Call (Anonymous)**.
For the SIP-T29G IP phone, navigate to **Menu->Features->Anonymous**.
2. Select a desired line from the **Line ID** field (not for the SIP-T19(P) E2 IP phone).
For the SIP-T29G IP phone, select a desired line.
3. Select **Enabled** from the **Local Anony Reject (Local Anonymous Rejection)** field.
4. (Optional.) Select the desired value from the **Send Rejection Code** field.
5. (Optional.) Enter the anonymous call rejection on code and off code respectively in the **On Code** and **Off Code** field.
6. Press **Save**.

When the caller has anonymous call feature enabled and places a call to your IP phone, the call is automatically rejected.

Ending Calls

Procedure

1. Do one of the following:

- If you are using the handset, press the Cancel key, **End Call (EndCall)** or hang up the handset.
- If you are using the headset, press the Cancel key or **End Call (EndCall)**.
- If you are using the speakerphone, press the Cancel key, Speakerphone key or **End Call (EndCall)**.

Tip

You can press the HEADSET key to end calls. Check with your system administrator to find out if it is available on your phone.

Auto Redial

Auto Redial enables you to redial a phone number automatically when the callee is busy.

Topics

[Setting the Auto Redial](#)

[Redialing a Call Automatically](#)

Setting the Auto Redial

You can enable auto redial, set the number of auto redial attempts and the time to wait between redial attempts.

Procedure

1. Navigate to **Menu->Features->Auto Redial**.
For the SIP-T29G IP phone, navigate to **Menu->Features->Others->Auto Redial**.
2. Select **Enabled** from the **Auto Redial** field.
3. Enter the desired time (between 1 and 300 seconds) in the **Redial Interval** field.
4. Enter the desired times (between 1 and 300) in the **Redial Times** field.
5. Press **Save**.

Redialing a Call Automatically

Before You Begin

Enable auto redial feature on the phone.

Procedure

When the callee is busy, the phone screen prompts whether to auto redial the contact, press **OK**.

1. The phone screen displays the redial times and interval, press **OK**.

2. Wait for the designated period of time or press **OK** to redial the phone number immediately.
The phone will retry as many times as configured until the callee answers the call.

Related Topics

[Setting the Auto Redial](#)

Call Mute

You can mute the microphone of the active audio device during an active call so that the other party cannot hear you.

Call mute applies to all modes (Handset, Headset and Speakerphone).

Topics

[Muting/Unmuting Audio](#)

[Keep Mute](#)

Muting/Unmuting Audio

When you are in a call, you can mute the audio, so that you can hear the other person, but he/she cannot hear you.

Procedure

1. Press the MUTE key during a call.
On the SIP-T23G/T23P/T21(P) E2 IP phone, press the Cancel key.
2. Press the MUTE key again to unmute the call.
On the SIP-T23G/T23P/T21(P) E2 IP phone, press the Cancel key again.

Tip

You can also mute the microphone while phone is dialing or ringing, so that the other party cannot hear you when the call is set up.

It is available on the SIP-T23P/T23G/T21(P) E2 IP phone only when the keep mute feature is enabled by your system administrator.

Keep Mute

In a call center or meet room, if incoming calls are answered automatically, the callers may hear your discussion with your colleagues. You can mute the phone in an idle state to prevent the unintended situation. The mute state of your phone persists across calls. The phone stays in the mute state until you unmute the microphone manually or until the phone restarts.

Before You Begin

Check with your system administrator if keep mute is configured on your phone.

Procedure

1. Press the MUTE key when the phone is idle.
The mute icon appears on the Idle screen.

2. Press the MUTE key again to deactivate the mute state.

Call Hold

You can place an active call on hold and resume the call when you are ready. When you place a call on hold, your IP PBX may play music to the other party while waiting.

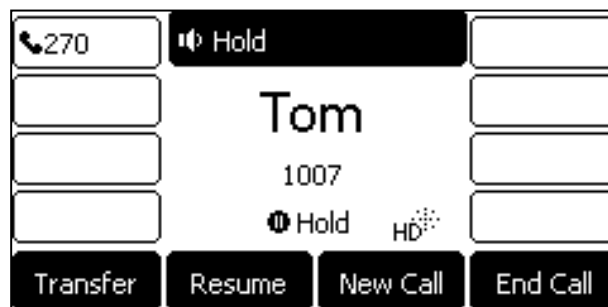

Topics

- [Holding a Call](#)
- [Resuming a Held Call](#)
- [Swapping Between Active and Held Calls](#)

Holding a Call

Procedure

1. Press the HOLD key or **Hold** during a call.
The LCD screen indicates that the call is on hold.

The phone ignores engaged audio device (handset or headset) and plays beep in the Speakerphone (hands-free) mode by default.

Note

The phone plays beep of a specified frequency softly to remind you that you still have a call on hold. Your system administrator can customize the frequency and configure when to play beep.

Resuming a Held Call

Procedure

1. Press the HOLD key again, corresponding line key or **Resume**.
If multiple calls are placed on hold, select the desired call first.

Swapping Between Active and Held Calls

You can easily switch between active and held calls.

Procedure

Do one of the following to swap the active and held calls:

- If the call is active, press the **Swap** soft key.
- If the call is held, press the corresponding line key to swap to the active call.

Do Not Disturb (DND)

DND enables your phone to reject all incoming calls automatically when you do not want to be interrupted. You can enable DND globally on the phone or enable DND for specific lines (not for the SIP-T19(P) E2 IP phone).

If you want to receive specific numbers when DND is enabled, you can ask your system administrator to set DND Authorized Numbers.

Note

Check with your system administrator to find out if the DND feature is available on your phone.

Topics

[Rejecting Calls with DND on All Lines](#)

[Rejecting Calls with DND on Specific Lines](#)

[Deactivating DND](#)

Rejecting Calls with DND on All Lines

You can activate DND for all the lines on your phone. The phone will reject all incoming calls automatically.

Note

If both DND and busy forward are activated on the phone, calls will be forwarded to the configured destination number.

Procedure

1. Navigate to **Menu->Features->DND**.
2. Select **Enabled** from the **DND Status** field.
3. Press **Save**.
The DND icon appears in the status bar.

**Tip**

To activate or deactivate DND quickly, press the **DND** soft key when the phone is idle.

Related Topics

Rejecting Calls with DND on Specific Lines

By default, the DND feature applies to all lines on your phone. Your system administrator can change the DND mode to Custom so that you can enable DND for specific lines. It is not available for the SIP-T19(P) E2 IP phone.

Before You Begin

The DND mode is set to Custom. Check with your system administrator if the DND on code or off code is required. If required, get it from your system administrator.

Procedure

1. Press **DND** when the phone is idle.
2. Select a desired line, and then press **Enter**.
3. Select **Enabled** from the **DND Status** field.
 On the SIP-T29G IP phone, set **DND Status** to **On**.
4. (Optional.) Enter the DND on code or off code respectively in the **On Code** or **Off Code** field.
5. Press **Save**.

The DND icon appears on the desired line. If you activate DND on the default line, the DND icon will appear both on the line and in the status bar.

Tip

You can press the **All On** soft key to activate DND for all lines.

Related Topics

[Deactivating DND](#)

Deactivating DND

You can deactivate DND when you are ready to resume receiving calls again.

Procedure

1. Navigate to **Menu->Features->DND**.
2. (Optional) If the DND is activated on specific lines, select a desired line, and then press **Enter**.
3. Select **Disabled** from the **DND Status** field.
On the SIP-T29G IP phone, set **DND Status** to **Off**.
4. Press **Save**.
The DND icon disappears.

Tip

To deactivate DND quickly, press the **DND** soft key when the phone is idle.
You can press the **All Off** soft key to deactivate DND for all lines when deactivating it for a specific line.

Redirecting Incoming Calls

You can redirect incoming calls by forwarding all incoming calls to a contact, forwarding an incoming call manually, forwarding incoming calls with a forward key or diverting calls from a specific contact to another contact.

Topics

- [Forwarding Calls](#)
- [Diverting Calls to a Contact](#)

Forwarding Calls

You can forward calls from any line on your phone to a contact. There are two ways of forwarding your calls:

- Forwarding calls in special situations, such as when the phone is busy or there is no answer, or forwarding all incoming calls to a contact immediately.
If you want to receive specific numbers when Forward is activated, you can ask your system administrator to set Forward Authorized Numbers.
- Manually forwarding an incoming call to a number.

Topics

- [Forwarding All Incoming Calls to a Contact](#)
- [Forwarding an Incoming Call Manually](#)
- [Forwarding Incoming Calls with a Forward Key](#)

Forwarding All Incoming Calls to a Contact

You can set up your phone to forward all incoming calls to a contact with one of the following types:

- **Always Forward:** Forwards all incoming calls immediately.
- **Busy Forward:** Forwards incoming calls when you are busy in a call.
- **No Answer Forward:** Forwards incoming calls when no one answers the calls.

Topics

- [Forwarding All Incoming Calls on All Lines](#)

[Forwarding All Incoming Calls on Specific Lines](#)
[Deactivating Call Forward](#)

Forwarding All Incoming Calls on All Lines

Before You Begin

Check with your system administrator if the forward on code or off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to **Menu->Features->Call Forward**.
2. Select a desired forwarding type and select **Enabled** from the corresponding field.
3. Do one of the following:
 - Enter the contact number you want to forward incoming calls to in the **Forward to** field.
 - For the SIP-T29G IP phone, highlight the **Forward to** field. Press **Directory (Dir)**, and then select a desired contact from the Directory list(s).
4. If you select the **No Answer Forward** option, select the desired ring time to wait before forwarding from the **After Ring Time** field.
5. (Optional.) Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.
6. Press **Save**.

The call forward icon on the Idle screen indicates that the call forward is activated.

Tip

When the phone is idle, you can press a Forward key to activate always forward feature to a specific contact.

Forwarding All Incoming Calls on Specific Lines

By default, the forward setting applies to all lines on your phone. Your system administrator can change the forward mode to Custom so that you can set Forward setting for specific lines. It is not available for the SIP-T19(P) E2 IP phone.

Before You Begin

The call forward mode is set to Custom. Check with your system administrator if the forward on code or off code is required. If required, get the forward on code or off code from your system administrator.

Procedure

1. Navigate to **Menu->Features->Call Forward**.
2. Select a desired line.
3. Select a desired forwarding type and select **Enabled** from the corresponding field.
4. Do one of the following:
 - Enter the contact number you want to forward incoming calls to in the **Forward to** field.
 - For the SIP-T29G IP phone, highlight the **Forward to** field. Press **Directory (Dir)**, and then select a desired contact from the Directory list(s).
5. If you select the **No Answer Forward** option, select the desired ring time to wait before forwarding from the **After Ring Time** field.
6. (Optional.) Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.
7. Press **Save**.

The forward icon appears on the desired line. If you activate forward on the default line, the forward icon will appear both on the line and in the status bar.

Tip

You can press the **All Lines** soft key to activate forward for all lines.

Deactivating Call Forward

You can deactivate call forward when you no longer want to forward your calls.

Procedure

1. Navigate to **Menu->Features->Call Forward**.
2. If the forward is activated for specific lines, select a desired line.
3. Select the desired forwarding type and select **Disabled** from the corresponding field.
4. Press the **Save** soft key.

Tip

You can press the **All Lines** soft key to deactivate forward for all lines when deactivating it for a specific line.

Forwarding an Incoming Call Manually

You can manually forward the call to another contact while your phone rings.

Procedure

1. When the phone is ringing, press **Forward**.
2. Enter the number you want to forward the incoming call to.
3. Press the OK key or **Send**.

The LCD screen prompts a call forward message.

Forwarding Incoming Calls with a Forward Key

By default, when the phone receives an incoming call, you can easily press the Forward key to forward the incoming call to a specific contact. When the phone is idle, you can also press the Forward key to activate always forward feature to forward incoming calls to a specific contact.

Topics

[Setting a Forward Key](#)

[Forwarding Incoming Calls Using a Forward Key](#)

Setting a Forward Key

You can set a line key as a Forward key, and specify a contact you want to forward the incoming calls to for this key. Line key is not available on the SIP-T19(P) E2 IP phone, so ask your system administrator to set a Forward key for your phone.

Procedure

1. Navigate to **Menu->Features->DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Forward (FWD)** from the **Key Type** field.
5. Do one of the following:
 - (Optional.) Enter the string that will display on the LCD screen in the **Label** field.

Enter the contact number you want to forward the incoming calls to in the **Value** field.

- For the SIP-T29G IP phone, highlight the **Label** or **Value** field. Press **Directory (Dir)** and then select a desired contact from the Directory list(s).

6. Press **Save**.

Tip

By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Forwarding Incoming Calls Using a Forward Key

Before You Begin

You need to set a Forward key with a specific contact. Make sure your system administrator has set the forward mode to Phone. If you are using the SIP-T19(P) E2 IP phone, check with your system administrator if the Forward key has set for your phone.

Procedure

1. Do the following:

- When the phone is idle, press the forward key to activate the always forward feature.
The LCD screen prompts you the Always Forward feature is activated and the contact number that all incoming call will forward to.
- When the phone is ringing, press the forward key to quickly forward the call to the specific contact.

Tip

If the forward feature is activated, you can press another Forward key to switch the target contact number when the phone is idle.

Diverting Calls to a Contact

You can divert all incoming calls from a particular contact to another contact. Auto divert has precedence over call forward.

Procedure

1. Press **Directory (Dir)** or navigate to **Menu->Directory->Local Directory** to enter the local directory.
2. Enter the desired contact group.
If the contact is not in any group, enter the **All Contacts**.
3. Highlight a desired contact, and then press **Option**. Select **Detail**.
4. Edit the contact information.
5. Enter a contact's number you want to divert the call to in the **Auto Divert** field.
6. Press **Save**.

Transferring Calls

During a call, you can transfer the call to another contact in one of three ways:

- **Blind Transfer:** Transfer a call directly to the third party without consulting.
- **Semi-Attended Transfer:** Transfer a call when receiving ringback.
- **Attended Transfer (Consultative Transfer):** Transfer a call with prior consulting.

Topics

[Performing a Blind Transfer](#)

[Performing a Semi-Attended/Attended Transfer](#)

[Performing Transfer to an Existing Call](#)

[Performing Transfer with a Transfer Key](#)

Performing a Blind Transfer

You can transfer a call to another contact immediately without consulting with her/him first.

Procedure

1. Press the TRAN key or **Transfer (Trans)** during a call.
2. On all IP phones except the SIP-T29G IP phone, select **New Call** first.
3. Do one of the following:
 - Enter the number or select a contact from the placed call list you want to transfer to.
 - If you have set a Speed Dial key, you can also press the Speed Dial key to transfer the call to the contact directly.
 - Press **Directory (Dir)**. Select a desired contact from the Directory list(s).
4. Press **B Transfer (B Trans)** or the TRAN key to complete the transfer.

Tip

If you are using a handset, the transfer can be completed by hanging up the handset.

Performing a Semi-Attended/Attended Transfer

You can transfer a call to another contact immediately when receiving ringback or after consulting with her/him first.

Procedure

1. Press the TRANkey or **Transfer (Trans)** during a call.
2. Do one of the following:
 - Enter the number or select a contact from the placed call list you want to transfer the call to.
 - Press **Directory (Dir)**. Select a desired contact from the Directory list(s).
3. Press the OK key or **Send**.
4. Do one of the following:
 - When you hear the ringback tone, press the TRANkey or **Transfer (Trans)** to finish a semi-attended transfer.
 - After the contact answers the call, press the TRANkey or **Transfer (Trans)** to finish an attended transfer.

Tip

If you are using a handset, the transfer can be completed by hanging up the handset.

- [Splitting a Conference Call](#)
- [Managing Conference Participants](#)
- [Ending a Conference Call](#)

Setting Up a Local Conference Call

Procedure

1. Place a call to the first party.
2. When the first party answers the call, press **Conference (Conf)** to place a new call.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.
3. Enter the number of the second party to dial out.
You can also select a desired contact from the search list, or select a contact from the placed call list or Directory before you enter the number.
The active call is placed on hold.
4. When the second party answers the call, press **Conference (Conf)** again to join all parties in the conference.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.

Joining Two Calls in a Conference

You can select a hold call to join into a conference call with the active call.

Procedure

1. Place two or more calls using the same or different accounts on the phone.
2. Select the desired call for conference and ensure that the call is active.
3. Press **Conference (Conf)**.
4. Select a desired hold call, and then press **Select**.

On the SIP-T29G IP phone, press **Send**.

The active call and the selected hold call are joined into a conference. If there are multiple hold calls, the other hold calls on the same or different accounts remain hold.

Joining a Transfer Target and a Transferee into a Conference

After consulting with the contact you want to transfer a call to, you can also join the two calls in a conference.

Procedure

1. Press **Conference (Conf)** after talking with the contact you want to transfer a call to.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.
The transferee and the transfer target are joined into a conference.

Related Topics

[Performing a Semi-Attended/Attended Transfer](#)

Holding/Resuming a Conference Call

When you place a conference call on hold, both the other two participants are placed on hold. The other two participants cannot hear each other until you resume the held conference call.

Procedure

1. Press the HOLD key or **Hold** to place the conference on hold.
2. Press the HOLD key again or **Resume** to resume the held conference call.

Muting/Unmuting a Conference Call

You can mute the local microphone during a conference call so that the other two participants can hear each other except you.

Procedure

1. Press the MUTE key to mute the conference.
On the SIP-T23G/T23P/T21(P) E2 IP phone, press the Cancel key.
2. Press the MUTE key again to unmute the conference.
On the SIP-T23G/T23P/T21(P) E2 IP phone, press the Cancel key again.

Splitting a Conference Call

You can split the conference call into two individual calls. After you split a conference call, the conference call ends, and the other two parties are held. You can resume one of the hold calls.

Procedure

1. Press **Split**.

Managing Conference Participants

You can manage conference participants in the following ways:

- Mute a participant
- Hold a participant
- Remove a participant from the conference

Procedure

Press **Manage**, and then select the desired party, you can do the following:

- Press **Far Mute (FarMute)** to mute the party. The muted party can hear everyone, but no one can hear the muted party.
- Press **Far Hold (FarHold)** to hold the party. The held party cannot hear anyone, and no one can hear the held party.
- Press **Remove** to remove the party from the conference call.
- Press **Back** to return to the previous screen.

Ending a Conference Call

By default, the other two parties drop the call when you end the conference call. However, your system administrator can set up that the other two parties remain connected when you end the conference call.

Procedure

1. Press **End Call (EndCall)** to drop the conference call.

Network Conference

If your system administrator has set network conference feature on your phone, you can initiate a conference with multiple participants.

Topics

[Setting Up a Network Conference](#)

Setting Up a Network Conference

1. Place a call to the first party.
2. Press **Conference (Conf)** to place a new call.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.
The active call is placed on hold.
3. Enter the number of the second party, and then press the OK key or **Send**.
4. When the second party answers the call, press **Conference (Conf)** to add the second party to the conference.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.
5. Press **Conference (Conf)** to place a new call.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.
The conference call is placed on hold.

6. Enter the number of the new party, and then press the OK key or **Send**.
7. When the new party answers the call, press **Conference (Conf)** to add the new party to the conference.
On the SIP-T29G/T27G/T27P IP phone, you can also press the CONF key.
8. Repeat steps 5 to 7 until you add all parties.

Note

The procedures for setting up a network conference call on specific servers may be different from introduction above. Contact your system administrator for more information.

Call Recording

On the SIP-T29G/T27G IP phone, you can record active calls onto a USB flash drive connected to your IP phone, and the recordings are saved as *.wav files.

Recording using a USB flash drive is not available by default. Check with your system administrator to find out if this feature is available on your phone.

Note

For more information on how to attach a USB flash drive, please refer to the Quick Start Guide for your IP phone on your phone's support page on [Yealink Support](#).
The size of a single recording file should be less than 2G.

Recording a Call

You can record active calls on the phone. You cannot record calls when there are no connected calls, when you place a new call, transfer a call or initiate a conference, or when you have an incoming call.

Important

Before call recording, especially those involving PSTN, it is necessary to know about the rules and restrictions of any governing call recording in the country where you are.
It is also very important to inform all the call parties that you are recording and ask for their consent before recording the conversation.

Procedure

1. During a call, press **More->Start REC**.
The LCD screen displays a recording icon and recording duration.

Managing a Call While Recording

You can hold/resume, mute, transfer, place a new call or set up a conference call during recording. All calls you handle during a recording are recorded in a same file.

If your call is placed on hold, the recording is paused. It means that both you and the remote party are not recorded. If you mute the call, the muted party is not recorded.

Pausing a Recording

You can pause a recording during a call at any time. Both you and other parties are not recorded.

Procedure

1. Press **More**, and then press **PauseREC**.

The pause recording icon appears on the LCD screen and the duration stops counting.

Resuming a Recording

You can resume a paused recording during a call.

Procedure

1. Press **More**, and then press **ReREC**.

The recording continues within the same file.

Stopping a Recording

You can stop recording during a call. When you end a call during recording, the recording will also be stopped and saved as *.wav file in the USB flash drive automatically.

Procedure

- Press **More**, and then press **StopREC**.

The recording icon and recording duration disappears. A message is displayed, prompting that the call is recorded successfully.

- Press **More** and then press **End Call (EndCall)**.

The recording icon and recording duration disappears, and the phone returns to the Idle screen. A prompt message is displayed, prompting that the call is recorded successfully.

Playing a Recorded Call

You can browse and play back the recorded files on your phone.

During the recording plays, you can switch among Speakerphone (hands-free) modes by pressing the speakerphone key, Handset modes by pressing the HEADSET key or Handset mode by picking up the handset.

Tip

You can also play back the recorded calls on the phone or on a computer using an application capable of playing ".wav" files.

Procedure

1. Navigate to **Menu->USB->Browse Audio**.

The LCD screen shows all recorded files (file name, duration time and file size) in the **Browse Audio** list. The file-name consists of the recording time & date, the other party's number/IP address/name (or the first person's number/IP address/name you called).

2. Select a desired file to play.

The length of the recording and a progress bar are displayed as the recording plays.

You can press the Volume key to adjust the volume of audio output.

Related Topics

[Switching Among the Handset, Speakerphone and Headset Modes](#)
[Adjusting the Audio Volume](#)

Pausing/Resuming a Recording

When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

Procedure

1. Press **Pause** to pause the playback. The **Play** soft key appears on the LCD screen.
2. Press **Play** to resume the playback.

Fast Forwarding/Rewinding a Played Recorded Call

While a recorded call plays, you can fast forward or rewind the playback at any time.

Procedure

- Press **F.Fwd** (▶▶) to skip forward the playback. Press once to skip forward 8 seconds.
- Press **F.Rew** (◀◀) to rewind the playback. Press once to rewind 8 seconds.

Stopping a Playback

When you finish listening to a recording, you can stop playing by pressing the **Back** soft key. The phone returns to the Browse Audio screen.

Deleting a Recorded Call

You can delete the recorded calls when you need additional space on your USB drive.

Procedure

1. Navigate to **Menu->USB->Browse Audio**.
2. Highlight a desired recording, and then press **Delete**.
A confirmation message is displayed, confirming that you want to delete the audio.
3. Press **OK** to delete.

Viewing the Available Recording Time

When you insert a USB flash drive to the IP phone during a call, a message will pop up to tell you how much time is available for recording.

During a recording, if there is insufficient free space (30 minutes or 10 minutes left) on the USB flash drive, the IP phone will prompt you a message (XX minutes left for call recording). If no free space on the USB flash drive during recording, recording is stopped and saved in the USB flash drive automatically.

You can also view the storage space of the USB flash drive and check the available recording time before recording, since the insufficient free space may result in call recording failure.

Procedure

1. Navigate to **Menu->USB->Storage Space**.

Multicast Paging

Multicast Paging allows you to easily and quickly broadcast instant audio announcements to users who are listening to a specific multicast group on a specific channel.

The IP phone supports the following 31 channels:

- **0:** Broadcasts are sent to channel 0. Note that the Yealink IP phones running firmware version 80 or earlier can be regarded as listening to channel 0. It is the default channel.
- **1 to 25:** Broadcasts are sent to channel 1 to 25. We recommend that you specify these channels when broadcasting with Polycom IP phones which have 25 channels you can listen to.
- **26 to 30:** Broadcasts are sent to channel 26 to 30. We recommend that you specify these channels when broadcasting with Yealink IP phones running firmware version 81 or later.

Note that all IP phones that you want to include in the multicast paging group need to be in the same network, since a broadcast is used. The IP phone can only send/receive broadcasts to/from the listened channels. Other channels' broadcasts will be ignored automatically by the IP phone.

Topics

[Sending Multicast Paging](#)
[Receiving Multicast Paging](#)
[Managing a Paging Call](#)

Sending Multicast Paging

Yealink IP phone supports up to 31 groups for paging. You can assign a label to each group to identify the phones in the group, such as All, Sales, or HR.

You can set a line key as Multicast Paging key or Paging list key on the phone, which allows you to send announcements to the phones with pre-configured multicast address(es) on specific channel(s).

Note

Multicast RTP is one way only from the sender to the multicast address(es) (receiver). For outgoing RTP multicasts, all other existing calls on the phone will be placed on hold.

Topics

[Setting a Multicast Paging Key](#)
[Setting a Paging List Key](#)
[Setting a Paging Group](#)
[Deleting a Paging Group](#)
[Sending a Paging by a Multicast Paging Key](#)
[Sending Pages by a Paging List Key](#)

Setting a Multicast Paging Key

You can set a Multicast Paging key for a paging group, which allows you to send announcements quickly on the idle screen. Line key is not available on the SIP-T19(P) E2 IP phone, so ask your system administrator to set an Multicast Paging key for your phone.

Before You Begin

Get the multicast IP address and port number from your system administrator.

Procedure

1. Navigate to **Menu->Features->DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Multicast Paging** from the **Key Type** field.
5. (Optional.) Enter the paging group name in the **Label** field.

6. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the **Value** field.
7. Enter the desired channel between 0 and 30 in the **Channel** field.
8. Press **Save**.

Tip

By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Setting a Paging List Key

You can set a Paging List key to easily access the paging groups on the idle screen. Line key is not available on the SIP-T19(P) E2 IP phone, so ask your system administrator to set an Paging List key for your phone.

Procedure

1. Navigate to **Menu->Features->DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Paging List** from the **Key Type** field.
5. (Optional.) Enter the string that will display on the LCD screen in the **Label** field.
6. Press **Save**.

Tip

By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Setting a Paging Group

Before You Begin

Get the multicast IP address and port number from your system administrator.

Procedure

1. Press the paging list key when the phone is idle.
If the paging list key is not set, you can also navigate to **Menu->Features->Others->Paging List** for the SIP-T29G IP phone or **Menu->Features->Paging List** for other IP phones.
2. Select a desired paging group.
The default tag is Empty if it is not configured before.
3. Press **Option**, and then select **Edit**.
4. Enter the multicast IP address and port number (for example, 224.5.6.20:10008) in the **Address** field.
5. Enter the string that will display on the LCD screen in the **Label** field.
6. Enter the desired channel between 0 and 30 in the **Channel** field.
7. Press **Save**.
8. To set more paging groups, repeat steps 2 to 7.

Deleting a Paging Group

Procedure

1. Press the paging list key when the phone is idle.
If the paging list key is not set, you can navigate to

Menu->Features->Others->Paging List on the SIP-T29G IP phone or **Menu->Features->Paging List** on other IP phones

2. Select a desired paging group.

3. Press **Option**, and then select **Delete**.

A confirmation message is displayed, confirming that you want to delete the paging group.

4. Press **OK**.

Sending a Paging by a Multicast Paging Key

Before You Begin

You need to set a Multicast Paging key in advance. If you are using the SIP-T19(P) E2 IP phone, check with your system administrator if the Multicast Paging key has set for your phone.

Procedure

1. Press the Multicast Paging key when the phone is idle.

Both your phone and receiver's phone play a warning tone and the multicast RTP session will be automatically answered on the receiver's phone in the speakerphone (hands-free) mode.

On all IP phones except the SIP-T19(P) E2 IP phone, the multicast paging key LED glows green.

The following figure shows a multicast RTP session on the phone:

Sending Pages by a Paging List Key

Before You Begin

You need to set a Paging List key in advance. If you are using the SIP-T19(P) E2 IP phone, check with your system administrator if the Paging List key has set for your phone.

Procedure

1. Press the paging list key when the phone is idle.

2. Select a desired paging group.

3. Press **Paging** to send RTP.

Both your phone and receiver's phone play a warning tone and the multicast RTP session will be automatically answered on the receiver's phone in the speakerphone (hands-free) mode.

Related Topics

Setting a Paging List Key

Receiving Multicast Paging

Your system administrator has set a listening paging group for you, and then you can receive a paging call when the phone is idle. The paging call is automatically answered on your phone.

When there is a voice call or a paging call in progress, or when DND is activated on your phone, the phone handles the new paging call differently which depends on multicast listening settings configured by your system administrator.

Managing a Paging Call

During a paging call, you can do the following:

- Press **Hold** to place the current paging call on hold.
The paging call is placed on hold and receiver's phone releases the session.
- Press **Resume** to resume the held paging call.
The multicast RTP session is re-established.
- Press **End Call (EndCall)** to end the paging call.

Advanced Features

This chapter explains how to use the advanced features on the IP phone.

Call Completion

When you place a call and the callee is temporarily unavailable to answer the call, call completion allows your phone to monitor the busy party and establish a call after the busy party becomes available to receive a call.

Note

Call completion is not available on all servers. For more information, contact your system administrator.

Topics

[Enabling Call Completion](#)

[Using Call Completion](#)

Enabling Call Completion

Procedure

1. Navigate to **Menu->Features->Call Completion**.
For the SIP-T29G IP phone, navigate to **Menu->Features->Others->Call Completion**.
2. Select **Enabled** from the **Call Completion** field.
3. Press **Save**.

Using Call Completion

Before You Begin

Enable call completion feature on the phone. You place a call and the callee is temporarily unavailable to answer the call.

Procedure

1. The phone screen prompts whether to wait for the callee, press **OK** to activate the call completion feature.

2. When the callee becomes idle, the phone screen prompts whether to dial the number, press **OK** to dial the number.

Call Pickup

You can use call pickup to answer someone else's incoming call on your phone. Check with your system administrator to find out if this feature is available on your phone.

The Yealink IP phone supports Directed Call Pickup and Group Call Pickup.

- **Directed Call Pickup:** allows you to pick up incoming calls from another phone.
- **Group Call Pickup:** allows you to pick up incoming calls to any phone within a predefined group of phones, without dialing the extension of another phone.

Topics

[Picking up a Call Directly](#)

[Picking up a Group Call](#)

[Picking up a Call with a Directed Pickup Key](#)

[Picking up a Call with a Group Pickup Key](#)

Picking up a Call Directly

You can answer a call that rings on another phone. If there are multiple incoming calls on the phone at the same time, you can only pick up the first incoming call.

Before You Begin

The target phone receives an incoming call. Your system administrator has enabled the directed call pickup and set the directed call pickup code.

Procedure

1. Pick up the handset, press the line key or the Speakerphone key.
The **DPickup** soft key appears on the LCD screen (You may need to press the **More** soft key to see the **DPickup** soft key).
2. Press **DPickup** on your phone.
3. Enter the phone number which is receiving an incoming call.
4. Press **DPickup** again.
The call is answered on your phone.

Tip

When the phone is idle, you can use a Directed Pickup or BLF/BLF List key to pick up a call to a specific contact directly. BLF/BLF List key is not available on the SIP-T19(P) E2 IP phone.

Related Topics

[Picking up a Remote Call by BLF List Key](#)

Picking up a Group Call

When any phone within a predefined group of phones receives an incoming call, you can pick up that call easily on your phone.

Before You Begin

Your system administrator has enabled the group call pickup and set the group call pickup code.

Procedure

1. Pick up the handset, press the line key or the Speakerphone key.
The **GPickup** appears on the LCD screen.
2. Press **GPickup** on your phone when any phone in the group receives an incoming call.
The call is answered on your phone.

Tip

When the phone is idle, you can use a Group Pickup key to pick up a group call directly.

Setting a Directed Pickup Key

You can set a line key as a Directed Pickup key, and specify a contact you want to pick up a call from for this key. Line key is not available on the SIP-T19(P) E2 IP phone, so ask your system administrator to set a Directed Pickup key for

your phone.

Before You Begin

Your system administrator has set the directed call pickup code.

Procedure

1. Navigate to **Menu->Features->DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Pick Up** from the **Key Type** field.
5. Select a desired line from the **Account ID** field.
6. Do one of the following:
 - (Optional.) Enter the string that will display on the LCD screen in the **Label** field.
Enter a contact number you want to pick up a call from in the **Value** field.
 - For the SIP-T29G IP phone, highlight the **Label** or **Value** field. Press **Directory (Dir)** and then select a desired contact from the Directory list(s).
7. Press **Save**.

Tip

By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Directed Picking up a Call Using a Directed Pickup Key

Before You Begin

You need to set a Directed Pickup key. If you are using the SIP-T19(P) E2 IP phone, check with your system administrator if the Directed Pickup key has set for your phone. The target phone receives an incoming call.

Procedure

1. Press the Directed Pickup key.
The call is answered on your phone.

Call Park and Call Retrieve

You can use this feature to park a call, and then retrieve the call either from your phone or another phone. After you park a call, the call is placed on hold, you can continue the conversation after retrieving it.

The IP phone supports this feature under the following modes:

- **FAC mode:** park the call to the local extension or a desired extension through dialing the park code.
- **Transfer mode:** park the call to the shared parking lot through performing a blind transfer. For some servers, the system will return a specific retrieve park number (park retrieve code) from which the call can be retrieved after parking successfully.

Note

Call park is not available on all servers. Check with your system administrator to find out if it is available on your phone.

Topics

Enter the phone number or the extension you want to monitor in the **Value** field.

- For the SIP-T29G IP phone, highlight the **Label** or **Value** field. Press **Directory (Dir)** and then select a desired contact from the Directory list(s).

6. Press **Save**.

State Indicator of Remote Line by BLF Key

The state indicator of the monitored line on a BLF key varies by phone models.

Before You Begin

Set a BLF key to monitor the state of specific remote line.

An idle screen is similar to the one shown below:

The following table shows the LED/icon indicator associated with the line you are monitoring.

LED Status	Icons	Description
	T29G	
Solid green		Monitored line is idle.
Fast-flashing red		Monitored line is ringing.
		Monitored line is dialing.
Solid red		Monitored line is busy or in a call.
Slow-flashing red		Monitored line places a call on hold.
		A call is parked to the monitored line.
Off		Monitored line fails to register or does not exist.

Audio Alert for Monitored Lines

Your system administrator can enable Audio Alert for BLF Pickup feature, which allows your phone to play a specified tone when the monitored line receives an incoming call.

Topics

[Setting an Alert Tone for Monitored Lines](#)

Setting an Alert Tone for Monitored Lines

After your system administrator enables the Audio Alert for BLF Pickup feature, you can set the phone to play an alert tone when a monitored line rings.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Sound->BLF Ring Type**.
For the SIP-T29G IP phone, navigate to **Menu->Basic->Sound->BLF Ring Type**.
2. Select the desired ring tone.
The ring tone is played automatically. You can press the Volume key to adjust the tone volume.
3. Press **Save**.

Visual Alert for Monitored Lines

Your system administrator can enable Visual Alert for BLF Pickup feature, which allows your phone to display the caller ID when the monitored line receives an incoming call.

Topics

[Handling a Remote Call when Visual Alert](#)

Handling a Remote Call when Visual Alert

When the monitored line receives an incoming call, your phone LCD screen displays an incoming call to the monitored line (for example, from 1008 to 1001). You can pick up the call to monitored line, place a call to monitored line, place a new call or go back to the Idle screen.

Before You Begin

If you want to pick up a remote call, check with your system administrator to make sure that the directed call pickup code is set in advance.

Procedure

Do one of the following:

- Press **Pick Up** to pick up the incoming call.
The remote phone stops ringing and the call is answered on your phone. The caller ID of the party that initiated the call appears on the screen.
- Press **Send** to place a call to the monitored line.
- Press **New Call** to place a new call.
- Press **Cancel** to go back to the Idle screen.

Note

If your phone is locked, you cannot use the **Pick Up**, **Send**, **New Call** and **Cancel** soft keys until unlocked. For more information, refer to [Phone Lock](#).

Picking up a Remote Call by BLF Key

When a monitored line receives an incoming call, you can pick up the incoming call by pressing the BLF key. For example, if the monitor user is not at his/her desk and someone rings his/her line, you can pick up the call simply by pressing the flashing BLF key.

Before picking up an incoming call, make sure that the directed call pickup code has been configured in advance.

Topics

[Setting the Directed Call Pickup Code for BLF key](#)

[Picking up a Remote Call](#)

Setting the Directed Call Pickup Code for BLF key

If your system administrator set the directed call pickup code in advance, you can use the BLF key to pick up the call directly. If not or if you want to set a pickup code for a specific BLF line, you can set a pickup code for BLF key manually.

Before You Begin

You need to set a BLF key and get the directed call pickup code from your system administrator.

Procedure

1. Long press the BLF key.
2. Enter the directed call pickup code in the **Extension** field.
3. Press **Save**.

Related Topics

[Setting a BLF Key](#)

Picking up a Remote Call

When the monitored line receives an incoming call, the BLF key LED indicator of the monitored line will flash red.

Before You Begin

Make sure that the directed call pick up code for a BLF key or your system administrator has set the call pickup feature.

Procedure

1. Pressing the BLF key to pick up the call to monitored line directly.

Related Topics

[Setting the Directed Call Pickup Code for BLF key](#)

Transferring a Call by BLF Key

When there is already an active call on the IP phone, you can transfer the active call to the monitored line by pressing the BLF key.

The phone transfers (Blind Transfer or Attended Transfer) the active call differently depending on the Transfer Mode via Dsskey feature configured by your system administrator.

Topics

[Performing a Blind Transfer](#)

[Performing a Semi-attended/Attended Transfer](#)

Performing a Blind Transfer

Before You Begin

Check with your system administrator if the Transfer Mode via Dsskey is set to **Blind Transfer**.

Procedure

1. During a call, press the BLF key of the monitored line which you want to transfer this call to.

Performing a Semi-attended/Attended Transfer

Before You Begin

Check with your system administrator if the Transfer Mode via Dsskey is set to **Attended Transfer**.

Procedure

1. During a call, press the BLF key of the monitored line which you want to transfer this call to. The phone will dial out the number of the monitored line.
2. Press the BLF key of the monitored line again or **Transfer (Trans)** to complete the transfer when the monitored user receives ringback or after the monitored user answers the call.

Parking/Retrieving a Call by BLF Key

You can use the BLF key to park a call or retrieve a parked call directly.

Note

Check with your system administrator to find out if it is available on your phone.

Topics

[Parking a Call](#)

[Retrieving a Parked Call](#)

Parking a Call

Before You Begin

Your system administrator has set call park feature in the FAC mode in advance.

Procedure

1. During a call, press **Park** (You may need to press the **More** soft key to see the **Park** soft key).
2. Press the desired BLF key to park the call to the monitored line.

Retrieving a Parked Call

Before You Begin

Your system administrator has set call park feature in the FAC mode.

Procedure

1. Press **Retrieve** on the dialing screen.
2. Press the desired BLF key to retrieve a call that is parked to the monitored line.

BLF List

BLF List feature enables you to monitor a list of users defined by your system administrator. For example, your system administrator has enabled BLF List feature and created a BLF List URL (for example, BLFList@example.com) with user1 and user2 in the list on the server. After configuration, the BLF List keys on the IP phone can present the status of user1 and user2, and the respective key LEDs or icons will either flash or glow depending on the status of monitored lines.

It is not available on the SIP-T19(P) E2 IP phone. Check with your system administrator to find out if this feature is available on your phone.

[Performing a Semi-attended/Attended Transfer](#)

Performing a Blind Transfer

Before You Begin

Check with your system administrator to make sure that the Transfer Mode via Dsskey is set to **Blind Transfer**.

Procedure

1. During a call, press the BLF List key of the monitored line which you want to transfer this call to.

Performing a Semi-attended/Attended Transfer

Before You Begin

Check with your system administrator if the Transfer Mode via Dsskey is set to **Attended Transfer**.

Procedure

1. During a call, press the BLF List key of the monitored line which you want to transfer this call to. The phone will dial out the number of the monitored line.
2. Press the BLF List key of the monitored user again or **Transfer (Trans)** to complete the transfer when the monitored user receives ringback or after the monitored user answers the call.

Retrieving a Call by BLF List Key

You can use the BLF List key to retrieve a call which is parked to the monitored line directly.

Check with your system administrator to find out if this feature is available on your phone.

Procedure

1. Press the desired BLF List key to retrieve a call that is parked to the monitored line.

Barging In an Active Call by BLF List Key

You can use the BLF List key to barge in a conversation and set up a conference call.

Check with your system administrator to find out if this feature is available on your phone.

Procedure

1. Press the BLF List key.

The IP phone dials out the barge-in code followed by the monitored line, and then you can join the call. Each of the three parties can hear the other two parties.

Shared Line

Yealink IP phone supports Shared Call Appearance (SCA) or Bridged Line Appearance (BLA) to share a line, which can be registered on more than one IP phone at the same time.

Your system administrator can set up your phone to use shared line.

Note

Check with your system administrator to find out if SCA or BLA is available on your phone.

Topics

[State Indicator of Shared Line](#)

[Barging In an Active Call on a Shared line](#)

[Pulling a Shared Call on a Shared line](#)

State Indicator of Shared Line

Your system administrator may assign multiple line keys to associate with a shared line, which enhances call visualization and simplifies call handling. Incoming calls/outgoing calls to/from this shared line will be distributed evenly among the available line keys.

The shared line is indicated by different line key icons (not available on the SIP-T19(P) E2 IP phone):

The following table shows the LED icon indicator associated with the shared line:

Line Key LED	Icon	Description
except SIP-T19(P) E2	T29G	
Off		The shared line is idle.
Solid green		The shared line is seized.
Fast-flashing green		The shared line receives an incoming call.
Solid green		The shared line is dialing.
Solid green		The shared line is busy or is in a call.
Slow-flashing green (Local Phone) Slow-flashing red (other Phones)		The call on shared line is placed on public hold.

Line Key LED	Icon	Description
except SIP-T19(P) E2	T29G	
Slow-flashing green (local Phone) Solid red (other Phone)	 (Local SCA Phone)  (other Phone)	The call on shared line is placed on private hold.
Solid green		The call on shared line is barged in by the other shared line user.
Slow-flashing green		In a multi-party call, place the call on hold locally.

Placing Calls on a Shared line

You can have one call or multiple calls on a shared line. The phone places a call on the first shared line key automatically. You can select the desired shared line key first and place a call using this key. Line key is not available on the SIP-T19(P) E2 IP phone.

Related Topics

[Placing Calls](#)

Answering Calls on a Shared line

When an incoming call arrives on the shared line, all the registered phones will ring simultaneously, and the call can be answered on any of the phones. You can answer one call or multiple calls on the shared line. Incoming calls will be distributed evenly among the available shared line keys. Line key is not available on the SIP-T19(P) E2 IP phone.

Note

If the number of incoming calls is greater than the configured line keys, the line keys will be used by sequence circulation. Contact your system administrator for more information.

Related Topics

[Answering Calls](#)

Placing a Call on Hold on a Shared Line

You can place a call on public hold or private hold. Private hold feature is not available for BLA.

Topics

[Placing a Call on Public Hold](#)

[Placing a Call on Private Hold](#)

Placing a Call on Public Hold

You can place a call on public hold that allows any shared line phone to retrieve the held call.

Procedure

1. During a call, press the HOLD key or **Hold**.

The call is held on your phone, and all of the phones registered with shared line show the call is in held state on the shared line key.

Placing a Call on Private Hold

In SCA scenario, you can place a call on private hold that only allows you to retrieve the held call. You can hold a call privately on a shared line using the **PriHold** soft key preset by your system administrator. If the **PriHold** soft key is not available on your phone, you can also set a line key as private hold key manually.

Topics

[Setting a Private Hold Key](#)

[Holding a Call Privately](#)

Setting a Private Hold Key

Private Hold key is not available on the SIP-T19(P) E2 IP phone.

Procedure

1. Navigate to **Menu->Features->DSS Keys**.
2. Select a desired line key.
3. Select **Key Event** from the **Type** field.
4. Select **Private Hold** from the **Key Type** field.
5. (Optional.) Enter the string that will display on the LCD screen in the **Label** field.
6. Press **Save**.

Tip

By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Holding a Call Privately

You can hold a call privately on a shared line using a **PriHold** soft key or Private Hold key. Private Hold key is not available on the SIP-T19(P) E2 IP phone.

Before You Begin

If **PriHold** soft key is not available on your phone, you need to set a Private Hold key in advance.

Procedure

1. During a call, press **PriHold** or Private Hold key on the phone (You may need to press the **More** soft key to see the **PriHold** soft key).

The call is held on your phone, and the other phones registered with shared line show the call is in busy state on the shared line key. Other users on the shared line cannot resume your call.

Related Topics

[Setting a Private Hold Key](#)

Retrieving a Held Call Remotely on a Shared line

If you place a call on hold on a shared line, you can resume this call at any time. When the shared line key shows a call that is in held state, you can resume the held call remotely from other users' phone.

It is not available on the SIP-T19(P) E2 IP phone.

Before You Begin

There is at least one call placed on public hold on the shared line.

Procedure

1. Do one of the following:
 - Press the line key.
 - In SCA scenario, long press the shared line key.
The **Cancel**, **Call Pull (CallPull)**, **New Call (NewCall)** and **Retrieve** appear on the screen.
Press **Retrieve** to retrieve the call.

Barging In an Active Call on a Shared line

In SCA scenario, both you and other users can barge into an active call on shared line. Only one user can barge in on a call at a time. After a user barges into a call, the call becomes a three-party conference.

It is not available on the SIP-T19(P) E2 IP phone.

Before You Begin

There is at least one active call on the shared line.

Procedure

1. Long press the line key, and then select an active call.

The **Cancel**, **Call Pull (CallPull)**, **New Call (NewCall)** and **Barge In (BargeIn)** appear on the LCD screen.

2. Press **Barge In (BargeIn)** to interrupt the active call.

Pulling a Shared Call on a Shared line

In SCA scenario, both you and other users can pull an existing call from another shared phone that is in active or hold state.

It is not available on the SIP-T19(P) E2 IP phone. Check with your system administrator to find out if this feature is available for your phone.

Before You Begin

There is an active or held call on the shared line.

Procedure

1. Long press the line key, and then select a call.

2. Press **Call Pull** (**CallPull**) to pull the call.

Intercom

Intercom is a useful feature in an office environment to quickly connect with the operator or the secretary. This enables you to place an intercom call that is answered automatically on the contact's phone as long as the contact is not in an active call.

Note

Intercom is not available on all servers. Contact your system administrator for more information.

Topics

[Placing an Intercom Call](#)

[Answering an Intercom Call](#)

Placing an Intercom Call

To use the intercom feature, you should set a line key as an Intercom key in advance. Line key is not available on the SIP-T19(P) E2 IP phone, so ask your system administrator to set an Intercom key for your phone.

Topics

[Setting an Intercom Key](#)

[Placing an Intercom Call to the Target Extension](#)

Setting an Intercom Key

Procedure

1. Navigate to **Menu->Features->DSS Keys**.
2. Select a desired line key.
3. Select **Intercom** from the **Type** field.
4. Select the desired line from the **Account ID** field.
5. Do one of the following:
 - (Optional.) Enter the string that will display on the LCD screen in the **Label** field.
Enter the target extension number in the **Value** field.
 - For the SIP-T29G IP phone, highlight the **Label** or **Value** field. Press **Directory (Dir)** and then select a desired contact from the Directory list(s).
6. Press **Save**.

Tip

By default, you can long press a desired line key to set it. But your system administrator can configure the phone to enter the Add Contact screen by long pressing the line key.

Placing an Intercom Call to the Target Extension

You can place an intercom call when the phone is idle or during a call. The target phone plays a warning tone and automatically answers the call in speakerphone (hands-free) mode by default.

When the target phone has an active call, the intercom call is answered automatically after the active call ends.

Before You Begin

You need to set an Intercom key in advance. If you are using the SIP-T19(P) E2 IP phone, check with your system administrator if the Intercom key has set for your phone.

Procedure

1. Press the intercom key.
2. To end the intercom call, press the intercom key again or **End Call (EndCall)**.

Tip

You can also press the BLF/BLF List key to initiate an outgoing intercom call to the monitored user. Check with your system administrator to find out if it is available on your phone.

Related Topics

[Setting an Intercom Key](#)

Picking Up an Incoming Call of the Target Extension

When a target extension receives an incoming call, you can pick up the incoming call by pressing the Intercom key. Check with your system administrator to find out if this feature is available on your phone.

Before picking up an incoming call, make sure that the directed call pickup code has been configured either for an Intercom key or for Call Pickup feature in advance.

Note

If the directed call pickup code is not set, the phone will place a call to the target extension instead of picking up an incoming call of the target extension when you press the intercom key.

Topics

[Setting the Directed Call Pickup Code for Intercom Key](#)

[Picking Up a Remote Call by Intercom Key](#)

Setting the Directed Call Pickup Code for Intercom Key

The directed call pickup code can be configured for the intercom key.

Before You Begin

Get the directed call pickup code from your system administrator.

Procedure

1. Long press the intercom key.
2. Enter the directed call pickup code in the **Extension** field.

3. Press **Save**.

Related Topics

Picking Up a Remote Call by Intercom Key

When the target extension receives an incoming call, the intercom key LED of the target extension will flash green on all other IP phones.

Before You Begin

The directed pickup code has set for Call Pickup feature or you have assigned the directed pickup code for an Intercom key in advance.

Procedure

1. Press the Intercom key to pick up the incoming call directly.

Related Topics

[Setting the Directed Call Pickup Code for Intercom Key](#)

Answering an Intercom Call

By default, when there is an incoming intercom call, the phone will play a warning tone and this incoming call will be answered automatically. You can configure the behavior when receiving an intercom call.

Setting Intercom

You can configure the following behavior when receiving an intercom call.

Intercom Allow

Intercom Allow allows the IP phone to automatically answer an incoming intercom call. If you disable this feature, the IP phone will handle an incoming intercom call like a normal incoming call. Intercom Allow is enabled by default.

Note

Your administrator can set a period of delay time before the phone automatically answers intercom calls.

Intercom Mute

Intercom Mute allows the IP phone to mute the microphone when incoming intercom calls is answered automatically. Intercom Mute is disabled by default.

Intercom Tone

Intercom Tone allows the IP phone to play a warning tone before answering an intercom call automatically. Intercom Tone is enabled by default.

Intercom Barge

Intercom Barge allows the IP phone to automatically answer an incoming intercom call while an active call is in progress. The active call will be placed on hold. If you disable this feature, the IP phone will handle an incoming intercom call like a normal incoming call while there is already an active call on the IP phone. Intercom Barge is disabled by default.

Note

To enable the phone to receive a new incoming call when it already has an active call, make sure that call waiting feature is enabled on the phone in advance.

Procedure

1. Navigate to **Menu->Features->Intercom**.
2. Make the desired changes.
3. Press **Save**.

Related Topics

Reading a Text Message

If the phone prompts you there is a new text message, you can press the **View** soft key to read the new messages directly, or press the **Exit** soft key to close the prompt box when you do not want to read your message.

Note

Your system administrator can disable the prompt box for new message(s).

You can also read the messages if the prompt box disappears.

Procedure

1. Navigate to **Menu->Message->Text Message->Inbox**.
2. Highlight a desired message, and then press **View**.

Sending a Text Message

Sending a text message from your IP phone is a quick way of getting in touch with contacts.

Procedure

1. Navigate to **Menu->Message->Text Message->New Message**.
2. Compose the new text message.
3. Press **Send**.
4. Select the desired account from the **From** field.
5. Do one of the following:
 - Enter the number you want to send the message to in the **To** field.
 - For the SIP-T29G IP phone, highlight the **To** field. Press **Directory (Dir)**, and then select a desired contact from the Directory list(s).
6. Press **Send** to send the message.

Replying to a Text Message

You can reply a message after reading a text message.

Procedure

1. Navigate to **Menu->Message->Text Message->Inbox**.
2. Highlight the desired message, and then press **Reply**.
3. Compose the new text message.
4. Press **Send**.

Deleting a Text Message

You can delete messages from your phone after reading.

Procedure

1. Navigate to **Menu->Message->Text Message->Inbox (Sentbox, Outbox or Draftbox)**.
2. Highlight the desired message.
3. Press **Delete**.

On the SIP-T29G IP phone, press **Option**, select **Delete**.

A confirmation message is displayed, confirming that you want to delete the message.

4. Press **OK** to delete.

You can also delete all text messages by selecting the **Delete All**.

Voice Mail

Voice Mail feature allows you to leave voice mails for someone or listen to your voicemail messages on your IP phone. This feature is set up on the server side and not all servers support this feature.

Topics

[Setting the Voice Mail Code](#)

[Receiving a Voice Message](#)

[Leaving Voice Mails](#)

[Listening to Voice Mails](#)

Setting the Voice Mail Code

If you want to connect your phone to the message center, you need to set the voice mail code on your phone.

Before You Begin

Get the voice mail code from your system administrator.

Procedure

1. Navigate to **Menu->Message->Voice Mail->Set Voice Mail Code**.
You can also press the MESSAGE key when the voice mail code is not configured.
2. Enter the voice mail code (for example, *4) in the desired account field.
3. Press **Save**.

Receiving a Voice Message

When receiving a new voice mail, the phone plays a warning tone and the power LED indicator slowly flashes red. A message of "n New Voice Mail(s)" ("n" indicates the number of unread voice messages) is displayed on the LCD screen.

If the voice mail prompt box disappears, it will not pop up again unless the user receives a new voice mail or the user re-registers the account that has unread voice mail(s).

Note

Your system administrator can disable the prompt box for new message(s).

Leaving Voice Mails

You can leave a voice mail for someone when he/she is busy or inconvenient to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

Listening to Voice Mails

When the LCD screen prompts that the phone receives a new voice mail, you can press the MESSAGE key or **Connect** soft key to dial out the voice mail access code directly, or press the **Exit** soft key to close the prompt box when you are not ready to listen to your voice mail.

You can also listen to your voice mails after the voice mail pop-up message box disappears.

Before You Begin

You need to set the voice mail code in advance.

Procedure

1. Navigate to **Menu->Message->VoiceMail->View Voice Mail**.
The LCD screen displays the amount of new and old voice mails.
2. Highlight an account, and then press **Connect**.
3. Follow the voice prompt to listen to your voice mails.

[Setting the Voice Mail Code](#)

Hot Desking

Hot desking is regularly used in places where not all the employees are in the office at the same time, or not in the office for very long, which means that actual personal offices would be often vacant, consuming valuable space and resources.

You can use hot desking to log out from the current account and then log into a new account. As a result, many users can share one same phone resource at different times.

Note

Hot desking is not available on all servers. Contact your system administrator for more information.

Before You Begin

Your system administrator has set a Hot Desking key for you to use this feature. Get the login account information from your system administrator.

Procedure

1. Press the Hot Desking key when the phone is idle.
A confirmation message is displayed, confirming that you want to clear the account configuration.
2. Press **OK**.
Registration configurations of all accounts on the phone will be cleared immediately.
The login wizard will be displayed.
3. Enter the login information.
4. Press **Save** to login.

Automatic Call Distribution (ACD)

ACD is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. ACD on all IP phones allows the ACD system to distribute large volumes of incoming calls to the registered ACD users.

ACD is not available by default. Check with your system administrator to find out if this feature is available on your phone.

Topics

[Logging into the ACD System](#)

[Changing the ACD Status](#)

Logging into the ACD System

You can log into the ACD system. After logging in, you are ready to receive calls from the ACD system.

Before You Begin

Your system administrator has set an ACD key for you to log into the ACD system. Get the User ID and Password to access the ACD system from your system administrator.

Procedure

1. Press the ACD key when the phone is idle.
The LCD screen prompts you the following information:
User ID: the identity used to log into the queue.
Password: the password used to log into the queue.

The screenshot shows a phone's LCD screen with the title "ACD" at the top. Below the title, there are two prompts: "1. User ID:" and "2. Password:". At the bottom of the screen, there are four buttons: "Cancel", "123", "Delete", and "Login".

2. Press **Login** to log in.

Changing the ACD Status

You can press the ACD key to show your current ACD user status.

When you set the ACD user status to be available, the ACD key LED glows green, the server begins distributing calls to your IP phone.

When you set the ACD user status to be unavailable, the ACD key LED flashes green, the server temporarily stops distributing calls to your IP phone.

Procedure

1. Press the **Available (Avail)/Unavailable (Unavail)** soft key.
ACD user status synchronizes on both IP phone and ACD system.
2. To log out of the ACD system, press the **Logout** soft key.

Optional Accessories with Your Phone

This section describes the optional accessories that you can use to extend your phone's capabilities.

Topics

[Supported Accessories](#)

[Headset](#)

[Bluetooth](#)

[Wireless Network](#)

[Expansion Module and Your Phone](#)

Supported Accessories

You can use your phone with different types of accessories. The following optional accessories need to purchase separately if required for your particular phone:

- Headset YHS32/YHS33
- Wireless Headset Adapter EHS36
- Bluetooth USB Dongle BT40
- Wi-Fi USB Dongle WF40
- Expansion Module EXP20

Check with your system administrator to find out which of these applications or accessories are available on your phone.

Caution

We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in poor performance.

Headset

Yealink IP phone supports wired or wireless headset, USB headset and Bluetooth headset to place and answer calls.

You can connect an analog headset to all IP phones or connect a USB headset to the SIP-T29G/T27G IP phones. You can also pair and connect a Bluetooth headset with your SIP-T29G/T27G IP phone. On all IP phones, you can use a wireless headset adapter EHS36 to connect an EHS-compatible wireless headset.

Note

Your system administrator can disable the headset feature. Check with your system administrator to find out if it is available on your phone.

Topics

[Analog Headset](#)

[Wireless Headset](#)

[Bluetooth Headset](#)

[USB Headset](#)

[Using Headsets](#)

Analog Headset

If you want to use an analog headset, you require an optional headset YHS32/YHS33.

Connecting a YHS32/YHS33 Headset

Procedure

1. Simply insert the headset connector into the headset port on the back of your IP phone.
For the information on how to connect headset YHS32/YHS33, refer to the YHS32/YHS33 user guide on [Yealink Technical Support](#) page.

Wireless Headset

You can use most wireless headsets with your phone.

EHS36 provides the technical interface between your IP phone and an EHS-compatible wireless headset, such as Senheiser/Jabra (GN Netcom) or Plantronics headset.

For more information on how to connect EHS36, see the EHS36 User Guide on [Yealink Technical Support](#) page.

After the EHS36 and your headset are connected successfully, you can handle calls by your headset.

For more information on how to use your headset, see your headset documentation from the manufacturer.

Bluetooth Headset

You can use a Bluetooth headset to handle calls on the SIP-T29G/T27G IP phone. If both a Bluetooth headset and an analog headset are connected, only the Bluetooth headset can be used.

For more information, refer to the documentation from your Bluetooth headset manufacturer.

Related Topics

[Analog Headset](#)

USB Headset

You can use a USB headset to handle calls on the SIP-T29G/T27G IP phone.

For a list of supported headsets, refer to [Tested headset list compatible with Yealink IP Phone](#) for your IP phone on [Yealink Support](#). USB headsets that are not listed may not function properly if you connect them to your IP phone.

For more information on how to use your USB headset, refer to the related documentation from the manufacturer.

Connecting a USB Headset

Procedure

1. Simply insert the headset connector into the USB port on the back of your IP phone.
For the information on how to connect a USB headset, see the Quick Start Guide for your IP phone on [Yealink Support](#).

Using Headsets

You can use only one headset at a time. The IP phone will use the headset according to the priority: USB/Bluetooth headset>YHS32/YHS33/wireless headset.

Topics

- [Activating the Headset Mode](#)
- [Deactivating the Headset Mode](#)

- [Placing Calls](#)
- [Answering Calls](#)

Activating the Headset Mode

After connecting a headset to your phone, you can activate the headset mode and use the headset when answering and placing calls.

Procedure

1. Press the HEADSET key on the phone.

The HEADSET key LED glows green on the SIP-T29G/T27G/T27P IP phone, and the headset icon appears on the LCD screen of all IP phone except the SIP-T27G/T27P IP phone.

Note

You can initiate or end calls by pressing the HEADSET key. Check with your system administrator to find out if it is available on your phone.

Deactivating the Headset Mode

If you do not want to use a headset to handle calls, you can deactivate the headset mode.

Procedure

1. Press the HEADSET key again on the phone.

The HEADSET key LED goes out on the SIP-T29G/T27G/T27P IP phone. The headset icon disappears from the LCD screen of all IP phone except the SIP-T27G/T27P IP phone.

Bluetooth

The SIP-T29G/T27G IP phone supports Bluetooth. Bluetooth enables low-bandwidth wireless connections within a range of 10 meters (32 feet). The best performance is in the range of 1 to 2 meters (3 to 6 feet).

Connecting the Bluetooth USB Dongle BT40

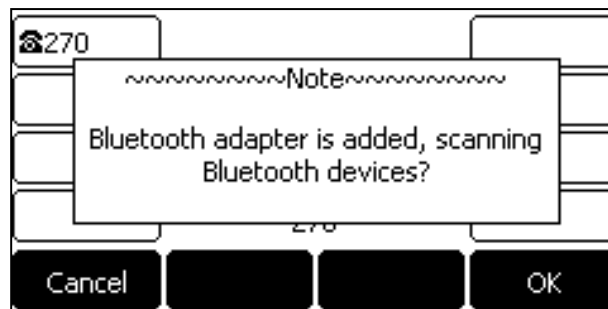

Procedure

1. Insert the USB dongle with "TOP" facing upwards into the USB port on the back of the phone.

For more information on Bluetooth USB dongle BT40, see the user guide on the Bluetooth USB dongle BT40's support page on [Yealink Technical Support](#).

Activating the Bluetooth Mode

When you insert Bluetooth USB dongle BT40 into the USB port on the back of the IP phone, a message is displayed on the LCD screen:

You can press **OK** to activate the Bluetooth mode directly.

If you press **Cancel**, you can activate the Bluetooth mode when you want to use the Bluetooth feature.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth**.
2. Select **On** from the **Bluetooth** field.
3. Press **Save** on all IP phones.
The IP phone scans the available Bluetooth devices automatically.

Deactivating the Bluetooth Mode

You can deactivate the Bluetooth mode when you no longer use a Bluetooth device.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth**.
2. Select **Off** from the **Bluetooth** field.
3. Press **Save**.

The Bluetooth device will not be connected anymore, but it will still be paired. When you activate the Bluetooth mode again, the paired Bluetooth device will appear in the **Paired Bluetooth Device** list.

Using Bluetooth Feature

When the Bluetooth mode is activated, you can pair and connect your Bluetooth device (Bluetooth headset or Bluetooth-Enabled mobile phone) to the phone. You can scan and pair up to 60 Bluetooth devices with your phone. However, only one device can be connected at a time. If you connect your Bluetooth-Enabled mobile phone to the IP phone, you can synchronize the mobile contacts to the IP phone.

Pairing and Connecting the Bluetooth Headset

Before You Begin

Make sure that the Bluetooth headset is discoverable.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth**.

On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth**.

2. Press **Scan** to search the Bluetooth devices.

The phone proceeds to scan the local Bluetooth devices, and LCD screen displays the available Bluetooth devices.

3. Find your Bluetooth headset, and then press **Connect**.

The Bluetooth icon appears on the LCD screen.

Related Topics

[Activating the Bluetooth Mode](#)

Pairing and Connecting the Bluetooth-Enabled Mobile Phone

You can pair and connect the Bluetooth-Enabled mobile phone to the IP phone.

Before You Begin

Make sure that the Bluetooth-Enabled mobile phone is discoverable.

Procedure

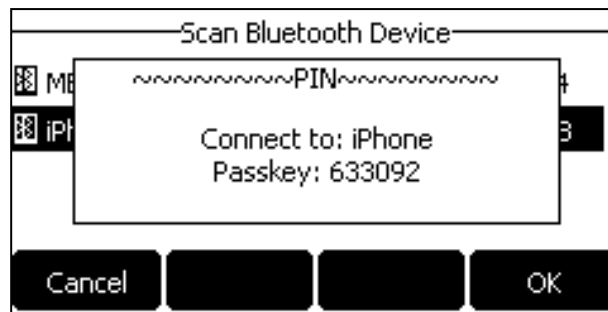

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth**.

On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth**.

2. Press **Scan** to search for the Bluetooth-Enabled mobile phone.

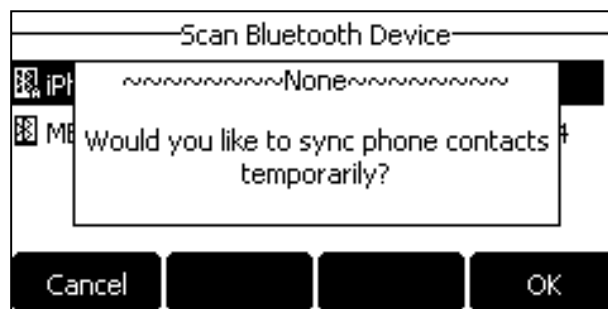

3. Find your Bluetooth-Enabled mobile phone, and then press **Connect**.

The IP phone will prompt the connect passkey on the LCD screen, as shown below:

4. Make sure your mobile phone is showing the same passkey, and then press **OK** on both mobile phone and IP phone.

A message is displayed on the LCD screen:

5. (Optional.) Press **OK** to enable the mobile contacts sync feature and the IP phone will sync the mobile contacts temporarily, or press **Cancel** to disable mobile contacts sync feature and the IP phone will not sync the mobile contacts.

Note

If you enable mobile contacts sync feature, you also need to authorize the IP phone to sync the contacts temporarily on the mobile phone.

Enabling the Mobile Contacts Sync Feature

Before You Begin

Make sure that the Bluetooth-Enabled mobile phone is paired and connected to your IP phone.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth->Paired Bluetooth Device**.

On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth->Paired Bluetooth Device**.

2. Press **Option**, and then select **Detail**.
3. Select **On** from the **Mobile Contacts Sync** field.

You need to authorize the IP phone to synchronize the contacts temporarily on the mobile phone first, and then the mobile contacts directory will appear in the IP phone directory list.

Related Topics

Viewing your Mobile Contacts on the IP Phones

You can view your mobile contacts on the IP phone.

Before You Begin

Make sure that the mobile contact sync feature is enabled.

Procedure

1. Navigate to **Menu->Directory->Mobile Contacts**.

The contacts stored in your mobile phone will display in the Mobile Contacts list.

Related Topics

[Enabling the Mobile Contacts Sync Feature](#)

Disabling the Mobile Contacts Sync Feature

You can disable the IP phone to sync your mobile phone contacts.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth->Paired Bluetooth Device**.
2. Press **Option**, and then select **Detail**.
3. Select **Off** from the **Mobile Contacts Sync** field.

The mobile contacts directory disappears from the IP phone directory list.

The mobile contacts directory also disappears from the IP phone directory list after deactivating the Bluetooth mode.

Editing Device Name of your Phone for Recognition

You can edit the device name of your phone to display in scanning list of other Bluetooth devices.

Before You Begin

Make sure that the Bluetooth mode is activated.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth->Edit My Device Information**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth->Edit My Device Information**.
The LCD screen displays the device name and Bluetooth dongle MAC address.
2. Enter the desired name in the **Device Name** field.
3. Press **Save**.

Related Topics

[Activating the Bluetooth Mode](#)

Deleting the Paired Bluetooth Device

You can delete your Bluetooth device from your phone. When you delete the Bluetooth device, it disappears from the **Paired Bluetooth Device** list.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth->Paired Bluetooth Device**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth->Paired Bluetooth Device**.
2. Press **Option**, and then select **Delete** or **Delete All**.
A confirmation message is displayed, confirming that you want to delete the device.
3. Press **OK** to delete.

Disconnecting the Bluetooth Device

You can disconnect the Bluetooth device from your phone. After you disconnect the Bluetooth device, it remains paired so you can easily connect it to your IP phone next time.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Bluetooth->Paired Bluetooth Device**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Bluetooth->Paired Bluetooth Device**.
2. Highlight the connected Bluetooth device, and then press **Disconnect**.
The Bluetooth device is disconnected when deactivating the Bluetooth mode.

Tip

You can quickly disconnect your Bluetooth headset by turning your headset off. When you turn your Bluetooth headset on, the Bluetooth headset is connected again.

[Using the Wi-Fi Feature](#)

Connecting the Wi-Fi USB Dongle WF40**Procedure**

1. Insert the Wi-Fi USB Dongle WF40 into the USB port on the back of the phone.

For more information on WF40, refer to the Wi-Fi USB dongle WF40 user guide on [Yealink Technical Support](#) page.

Activating the Wi-Fi Mode

When Wi-Fi USB dongle WF40 is connected to the USB port on the back of the IP phone, a message is displayed on the LCD screen:

You can press **OK** to activate Wi-Fi mode directly and to scan Wi-Fi devices automatically.

If you press **Cancel**, you can activate Wi-Fi mode manually when you want to use the Wi-Fi feature.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Select **On** from the **Wi-Fi** field.
3. Press **Save**.
The IP phone scans the available wireless networks in your area.

Deactivating the Wi-Fi Mode

You should deactivate the Wi-Fi mode when you need to connect your phone to the wired network.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Select **Off** from the **Wi-Fi** field.
3. Press **Save**.

Using the Wi-Fi Feature

When the Wi-Fi mode is activated on the IP phone, you can connect your phone to a desired wireless network.

Connecting to the Wireless Network

There are three ways to connect IP phone to the wireless network:

- [Connecting to an Available Wireless Network Manually](#)
- [Connecting to the Wireless Network Using Wi-Fi Protected Setup \(WPS\)](#)
- [Adding a Wireless Network Manually](#)

Connecting to an Available Wireless Network Manually

Before You Begin

Get the password of the wireless network from your system administrator. Make sure that the Wi-Fi mode is activated.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Highlight the **X Available Network(s)** (X represents the number of available networks), and then press **Enter**.
3. (Optional.) To re-search the available network, press **Scan**.
4. Select the desired wireless network and then press **Connect**.
5. If the network is secure, enter its password.
6. Press **OK**.

Related Topics

[Activating the Wi-Fi Mode](#)

Connecting to the Wireless Network Using Wi-Fi Protected Setup (WPS)

Wi-Fi Protected Setup (WPS) provides simplified mechanisms to configure secure wireless networks which can automatically configure a wireless network with a network name (SSID) and strong WPA data encryption and authentication.

There are two methods supported by Yealink IP phones in the Wi-Fi protected setup:

- **Push Button Configuration (PBC):** The user simply has to press WPS key on both the IP phone and gateway/router to connect.
- **Personal Identification Number (PIN):** The user has to enter a PIN generated randomly by the IP phone on the gateway/router to connect.

Before You Begin

Make sure that the Wi-Fi mode is activated.

Push Button Configuration (PBC)

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Press the **WPS**, and then select **WPS**.
The LCD screen prompts "WPS has been activated, connect in 120s!".
3. Long press the WPS key on your gateway/router.
Once WPS setup has completed successfully, the LCD screen will prompt "Connect Success."

Personal Identification Number (PIN)

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Press the **WPS**, and then select **WPS-PIN**.
The LCD screen prompts "Please input below PIN code on your Wi-Fi router and press OK to connect: xxx".
3. Log into your gateway/router's web interface, and configure it to search the clients. For more information, refer to the documentation from the gateway/router manufacturer.
Once WPS-PIN setup has completed successfully, the gateway/router's web interface will prompt success.

Related Topics

[Activating the Wi-Fi Mode](#)

Adding a Wireless Network Manually

If your gateway/router has SSID broadcast disabled, it might not appear in the scanning results. In that case, you must manually add a wireless network. The connected wireless networks will be saved to **Known Network(s)** list.

Before You Begin

Get the available wireless network information from your system administrator. Make sure that the Wi-Fi mode is activated. The **Known Network(s)** list can store up to 5 wireless networks.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Highlight **Known Network(s)**, and then press **Add**.

3. Use the WLAN settings obtained from your gateway/router to configure this WLAN Profile on the IP phone. Do the following:
 - If you select **None** or **WEP** from the **Security Mode** field, enter the desired values in the corresponding fields.
 - If you select **WPA-PSK**, **WPA2-PSK**, **WPA-EAP** or **WPA2-EAP** from the **Security Mode** field, select the desired cipher type first and enter the desired values in the corresponding fields.
4. Press **Save**.
The connected wireless networks will be saved to **Known Network(s)** list.

Related Topics

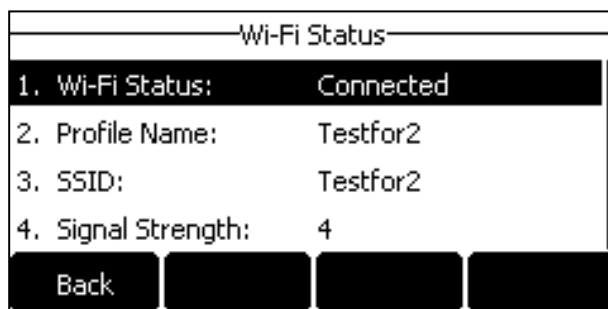

[Activating the Wi-Fi Mode](#)

Viewing the Wireless Network Information

You can view the wireless network information when the Wi-Fi mode is activated.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi->X Available Network(s)**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi->X Available Network(s)**.
2. Press **Detail** to view the detailed wireless network information (for example, Profile Name, SSID or Signal Strength).
If the IP phone is connected to a wireless network successfully, you can also navigate to **Menu->Basic->Wi-Fi->Wi-Fi Status** to view the connected wireless network information.

Managing the Saved Wireless Network

Once the IP phone has been connected to a wireless network successfully, this wireless network profile will be saved in **Known Network(s)** list. The next time you activate Wi-Fi mode, the IP phone will be automatically connected to the wireless network which has the highest priority (the top one). Up to 5 wireless network profiles can be saved in **Known Network(s)** list. If you want to add a new one when the IP phone has already saved 5 wireless network profiles, please delete an older one before adding.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi->Known Network(s)**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi->Known Network(s)**.
2. Press **Option**.
3. Do one of the following:
 - Select **Edit** to edit the wireless network profile, and press **Save**.
 - Select **Move Up** or **Move Down** to change the priority of the wireless network.
 - Select **Delete** or **Delete All** to delete the saved wireless network profile.

Disconnecting the Wireless Network Connection

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Wi-Fi**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Wi-Fi**.
2. Highlight the **X Available Network(s)** (X represents the number of available networks), and then press **Enter**.
3. Highlight the connected wireless network, and then press **Disconnect**.

You can also disconnect the wireless network when deactivating the Wi-Fi mode.

Expansion Module and Your Phone

The expansion module is a console you can use to connect to an IP phone to add additional line keys and expand the functions of your phone. Yealink SIP-T29G/T27P/T27G IP phone supports expansion module EXP20. It features a 160*320 graphic LCD screen and 20 physical keys with dual-color LEDs. You can add 20 additional keys via a page switch key, bringing the number of keys up to 40. This section provides you how to connect the expansion module EXP20, how to assign the features for ext keys and how to adjust the contrast and backlight of expansion module EXP20.

For more information on expansion module EXP20, refer to the LCD Expansion Module EXP20 user guide on [Yealink Technical Support](#) page.

Topics

[Connecting the Expansion Module](#)

[Assigning the Features for Ext Keys](#)

[Adjusting the Contrast of Expansion Module](#)

[Adjusting the Backlight of Expansion Module](#)

Connecting the Expansion Module

Procedure

1. Connect the expansion module to the IP phone using the supplied connecting sheet and screws.
2. Connect the supplied cord from the Ext jack on the host phone to the Ext in jack on the expansion module.

Assigning the Features for Ext Keys

You can customize features for ext keys on the connected IP phone.

Procedure

1. Long press the desired ext key on expansion module.
The IP phone LCD screen will enter the user setting interface of this key.
2. Customize the specific feature for this key on the IP phone.
3. Press **Save**.

Adjusting the Contrast of Expansion Module

You can configure the contrast of the expansion module via the host phone.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Display->Contrast**.

On the SIP-T29G IP phone, navigate to **Menu->Basic->Display->Contrast**

If EXP20 is not connected to SIP-T29G IP phone, the Contrast screen displays "No EXP".

2. Select the desired value between 1 and 10 (highest intensity) from the **Contrast** field.
3. Press **Save**.

Adjusting the Backlight of Expansion Module

When you change the backlight intensity settings on your SIP-T29G/T27G/T27P IP phone, the backlight on expansion module connected to your phone automatically changes to match the new settings.

[Updating the Phone Configuration](#)

Diagnosing the Network

The wrong network settings may result in inaccessibility of your phone and poor network performance. Your system administrator may ask you to use the ping or trace route to troubleshoot network connectivity problems.

Topics

[Checking the Network Using "Ping" Method](#)

[Checking the Network Using "Trace Route" Method](#)

Checking the Network Using "Ping" Method

Procedure

1. Navigate to **Menu->Features->Diagnostics->Network->Ping**.
2. Enter the desired IP address or URL in the **Ping IP or URL** field.
3. Press **Start**.

The screen displays the network status information.

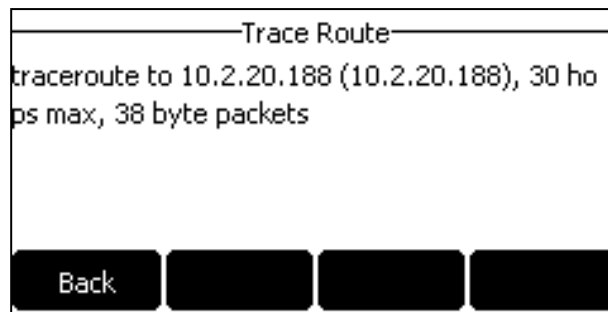

4. Press **Back** to go back to the preview screen.

Checking the Network Using "Trace Route" Method

Procedure

1. Navigate to **Menu->Features->Diagnostics->Network->Trace Route**.
2. Enter the desired IP address or URL in the **Trace Route IP or URL** field.
3. Press **Start**.

The screen displays the network status information.

4. Press **Back** to go back to the preview screen.

Rebooting Your Phone

The improper operation may cause malfunction. If malfunction occurs, your system administrator may ask you to reboot your phone.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Reboot**.
On the SIP-T29G IP phone, navigate to **Menu->Basic->Reboot**.
A confirmation message is displayed, confirming that you want to reboot the phone.
2. Press **OK** to reboot the phone.

Tip

You can also long press the X key when the phone is idle to reboot the phone.

Resetting to Factory Settings

Generally, some common issues may occur while using the IP phone. Your system administrator may ask you to reset your phone to factory configurations after you have tried all troubleshooting suggestions but still do not solve the problem. This operation will delete all your personal configuration settings, and reset all settings to the factory defaults. Check with your system administrator if the personalized settings are kept before resetting your phone to factory settings.

Procedure

1. Navigate to **Menu->Settings->Advanced Settings->Reset Config**.
On the SIP-T29G IP phone, navigate to **Menu->Advanced->Reset Config**.
2. Highlight the **Reset to Factory Settings**, and then press **Reset**.
A confirmation message is displayed, confirming that you want to reset the setting.
3. Press **OK**.
The phone begins resetting.

Tip

You can also long press the OK key when the phone is idle.

After reset, the LCD screen prompts "Welcome Initializing...Please wait".

The phone will be reset successfully after startup.

Note

Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.

Updating the Phone Configuration

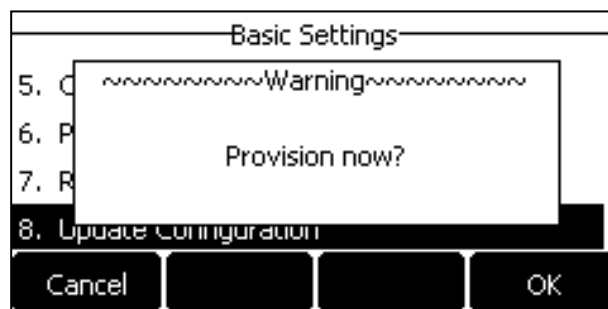

Your system administrator may ask you to update your phone configurations.

Procedure

1. Navigate to **Menu->Settings->Basic Settings->Update Configuration**.

On the SIP-T29G IP phone, navigate to **Menu->Basic->Update Configuration**.

A message is displayed on the LCD screen:

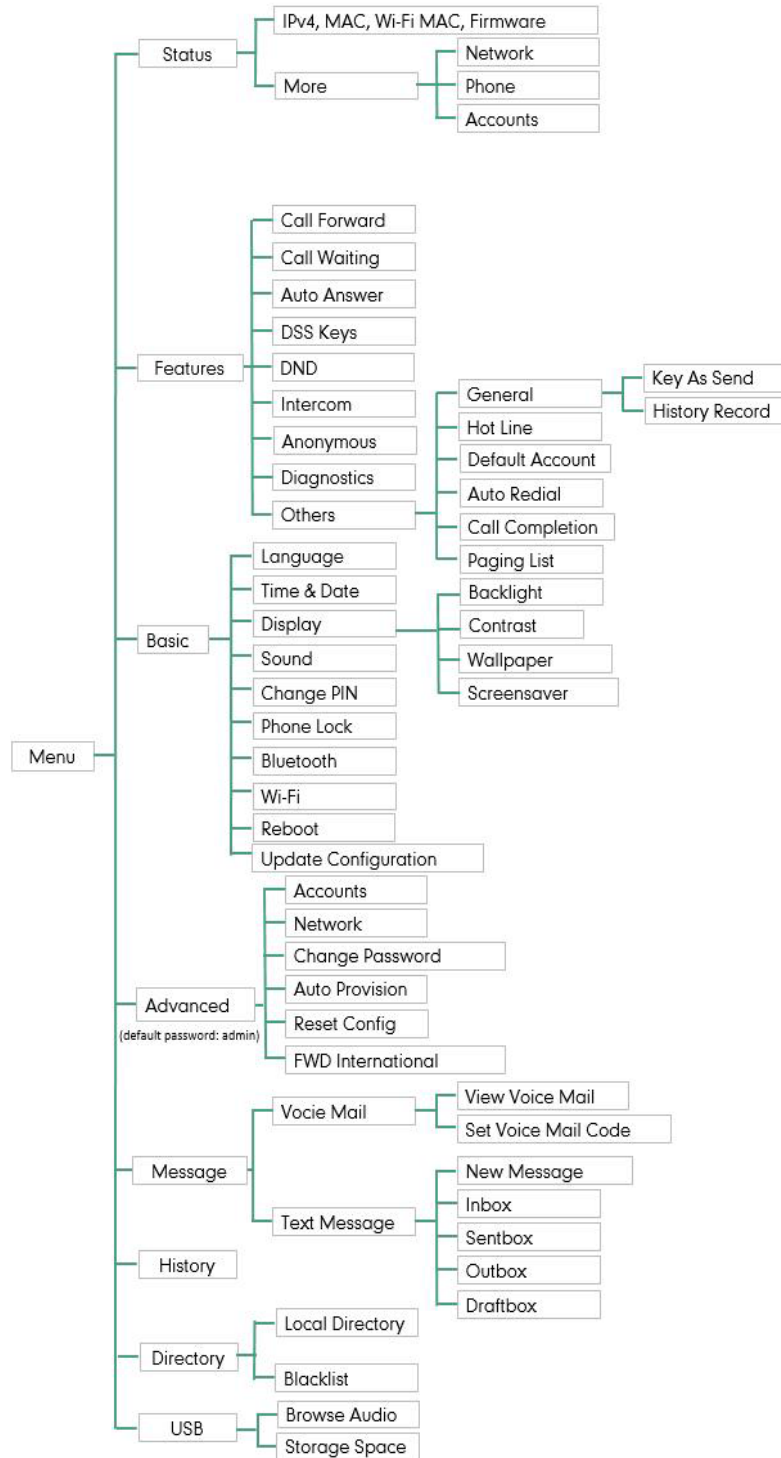

2. Press **OK**.

Tip

You can also long press the REDIAL key when the phone is idle to update the phone configuration.
